

Working together to plan for the future

INTERAGENCY CONSULTATION COMMITTEE (ICC)

April 24, 2015 - 9:00 AM

COMPASS, 700 NE 2nd Street, 2nd Floor Large Conference Room
Meridian, Idaho

** AGENDA **

I. CALL TO ORDER (9:00)

II. AGENDA ADDITIONS/CHANGES

III. OPEN DISCUSSION/ANNOUNCEMENTS

IV. CONSENT AGENDA

Page 2 *A. Approve February 26, 2015, Meeting Notes

V. ACTION ITEM

9:10 *A. Approve Chair and Vice Chair Rotation
Page 4

Chair

VI. INFORMATION/DISCUSSION ITEMS

9:15 *A. Review the Regional Emissions Analysis Modeling
Page 5 Assumptions for the Draft FY2016-2020 Regional
Transportation Improvement Program

MaryAnn
Waldinger

9:35 *B. Review the Project List for the Draft FY2016-2020 Regional
Page 7 Transportation Improvement Program

MaryAnn
Waldinger

10:10 C. Agency Updates

*ICC members are welcome to provide updates and share
information on items pertaining to air quality.*

VII. OTHER

A. Next Meeting: Tuesday, June 9, 2015

VIII. ADJOURNMENT (10:30)

*Enclosures will be sent 14-days in advance of the meeting. Times are approximate. Agenda is subject to change.

**INTERAGENCY CONSULTATION COMMITTEE
FEBRUARY 26, 2015
COMMUNITY PLANNING ASSOCIATION**

****MEETING NOTES****

ATTENDEES:

Beth Baird, City of Boise
Jen Cole, Idaho Department of Environmental Quality
Scott Frey, Federal Highway Administration, Ex-officio
Maureen Gresham, ACHD Commuteride
Ryan Head, Ada County Highway District, **Chair**
Brian Shea, Idaho Transportation Department
Michael Toole, Idaho Department of Environmental Quality
Greg Vitley, Idaho Transportation Department–District 3
MaryAnn Waldinger, COMPASS

OTHERS PRESENT:

Sabrina Anderson, COMPASS
Nancy Brecks, COMPASS
Tracy Olsen, HDR
Curt Overcast, HDR, via telephone

CALL TO ORDER:

Chair Ryan Head called the meeting to order at 9:01 a.m.

AGENDA ADDITIONS/CHANGES

MaryAnn Waldinger requested to add the October 30, 2014, meeting notes to the Consent Agenda, and Brian Shea will be providing an agency update under the Information/Discussion Item.

OPEN DISCUSSION/ANNOUNCEMENTS/INTRODUCTIONS

None.

CONSENT AGENDA

A. Approve October 30, 2014, Meeting Notes

Maureen Gresham moved and Greg Vitley seconded approval of the Consent Agenda as presented. Motion passed unanimously.

ACTION ITEM

A. Approve Project-Level Conformity Modeling Assumptions

Tracy Olsen and Curt Overcast presented assumptions proposed for the project-level analysis for the State Street and Collister Drive Intersection.

After discussion, Jen Cole moved and Maureen Gresham seconded to approve the project level conformity modeling assumptions as presented and to use MOVES 2010b for this particular analysis and input. Motion passed unanimously.

INFORMATION/DISCUSSION ITEMS

A. Agency Updates

Brian Shea provided an update on the June 2014 Memorandum of Understanding (MOU) between ITD and DEQ, which is being funded with federal Statewide Planning & Research dollars.

Brian also discussed ITD and DEQ priorities: update of PLAQ screening and analysis tool including the threshold Hot Spot Analysis; education and training for ITD management and staff on air quality conformity; and ITD clearly outlining stakeholders' respective roles and responsibilities in the air quality conformity process both internal and external to ITD.

OTHER

Next Meeting: April 7, 2015, at COMPASS.

ADJOURNMENT

Chair Head adjourned the meeting at 9:55 a.m.

T:\FY15\800 System Maintenance\820 Committee Support\ICC\Minutes\minutes022615.docx

INTERAGENCY CONSULTATION COMMITTEE ITEM V-A

DATE: April 8, 2015

Topic: ICC Chair and Vice Chair Rotation

Request/Recommendation:

COMPASS is requesting that the Idaho Department of Environmental Quality, Boise Region representative serve as Chair and the ACHD Commuteride representative serve as Vice Chair of ICC starting with the April 24, 2015 meeting.

Background/Summary:

The ICC policy, Section V, adopted in September 2006, included a rotation of Chair and Vice Chair to serve a one-year term. Therefore, it is time to rotate the Chair and Vice Chair responsibilities. The Ada County Highway District (ACHD) representative has served as Chair and Idaho Department of Environmental Quality, Boise Region representative has served as Vice Chair since July 2, 2013.

Per ICC Policy Section V:

The rotational order of the Chair will be:

- *ACHD Commuteride representative*
- *Valley Regional Transit representative (VRT)*
- *City of Boise representative*
- *Idaho Transportation Department District 3 (ITD D3) representative*
- *Ada County Highway District (ACHD) representative*
- *Idaho Department of Environmental Quality, Boise Region representative*

The rotational order of the Vice Chair will be:

- *Valley Regional Transit representative (VRT)*
- *City of Boise representative*
- *Idaho Transportation Department District 3 representative*
- *Ada County Highway District (ACHD) representative*
- *Idaho Department of Environmental Quality, Boise Region representative*
- *ACHD Commuteride representative*

More Information

INTERAGENCY CONSULTATION COMMITTEE ITEM VI-A

DATE: April 8, 2015

Topic: Review the Regional Emissions Analysis Modeling Assumptions for the Draft FY2016-2020 Regional Transportation Improvement Program (TIP)

Request/Recommendation:

COMPASS staff seeks review of the Regional Emissions Analysis Modeling Assumptions for use in the air quality conformity demonstration of the Draft *FY2016-2020 Regional TIP*.

Background/Summary:

The Interagency Consultation Committee is required to review and approve the assumptions and emissions estimation methodologies used in regional emissions analyses. These analyses are conducted for transportation conformity purposes per state and federal regulations. Any northern Ada County Transportation Improvement Program or long-range transportation plan must demonstrate conformity to the motor vehicle emissions budgets for particulate matter 10 microns or less in diameter (PM₁₀), nitrogen oxides (NO_x), and volatile organic compounds (VOCs) established in the *Northern Ada County PM10 State Implementation Plan, Maintenance Plan: Ten-Year Update*. A regional emissions analysis is not federally required for carbon monoxide (CO). However, *Northern Ada County Air Quality Maintenance Area Second 10-Year Carbon Monoxide Limited Maintenance Plan* requires COMPASS to conduct a build/no build emissions analysis for local planning purposes.

Budget tests will be performed for:

- 2016: Base year of the draft FY2016-2020 TIP
- 2020: Last year of the TIP
- 2025: Intermediate analysis year, as there can be no more than 10 years between analysis years
- 2035: Intermediate analysis year, as there can be no more than 10 years between analysis years
- 2040: Horizon year for the regional long-range transportation plan (*Communities in Motion 2040*)

More Information

- 1) Attachment 1
- 2) For detailed information contact: MaryAnn Waldinger, Principal Planner
mwaldinger@compassidaho.org

T:\FY15\800 System Maintenance\820 Committee Support\ICCPackets\04242015\REAmemo_draft.docx

Regional Emission Analysis Modeling Assumptions

Source type population and fleet age distribution:

DEQ decoded individual Idaho Department of Motor Vehicles (DMV) registration records of vehicles registered in the Treasure Valley using the Polk vehicle identification number (VIN) decoding system. The decoded VINs provide information regarding the vehicle make, model, age, and fuel types. This information was then used to develop the MOVES input.

Inspection Maintenance Program – June 1, 2010 - future

Ada County:

- 1) Two speed test (idle and 2500 RPM) for pre 1996 vehicles only.
- 2) Exhaust OBD check for 1996 and newer vehicles.
- 3) Evaporative system OBD check for 1996 and newer vehicles.
- 4) Compliance rate = 98.0%.
- 5) Waiver rate = 1.0%
- 6) Four-year grace period for new vehicles
- 7) Biennial testing – effective January 1, 2010.

Canyon County:

- 1) Two speed test (idle and 2500 RPM) for pre 1996 vehicles only.
- 2) Evaporative gas cap check for 1996 and newer vehicles.
- 3) Exhaust OBD check for 1996 and newer vehicles.
- 4) Evaporative system OBD check for 1996 and newer vehicles.
- 5) Compliance rate = 98.0%.
- 6) Waiver rate = 1.0%
- 7) Five-year grace period for new vehicles
- 8) Biennial testing – effective January 1, 2010.

Meteorology

The meteorology input compiles the average hourly temperature and relative humidity data for each county. Base- and future-year inventories were modeled using average hourly temperature and relative humidity data by county for each month from a representative weather station for each county. Ada County is represented by the National Weather Service station at the Boise Air Terminal and Canyon County is represented by the data set from the Caldwell Industrial Airport.

Fuel-Related Inputs

Alternative Vehicle Fuels and Technology (AVFT): Ada and Canyon Counties were modeled using a custom AVFT input file derived from VIN-decoded registration data. The same AVFT input was used for base and future years.

Fuel Supply: National default fuel supply inputs were used for all source types except transit buses. A large portion of the transit bus fleet in the Treasure Valley operates on compressed natural gas (CNG). For this reason, CNG fuels were included in base- and future-year modeling.

Fuel Formulation: With the exception of 10% ethanol in gasoline (E10), MOVES national default fuel formulations were used as base-year inputs for each county. These default values were judged to be reasonable based on local knowledge, except for the E10 market share. The base-year E10 market share was updated with information provided by fuel suppliers.

Average Speed Distribution

The average speed distribution allocates the different source types (vehicles) for each roadway type to 16 speed bins ranging from 0 to >75 miles per hour. Average speed distributions were developed from the regional travel demand model average daily estimates or forecasts for each roadway segment and hourly traffic count statistics developed from detailed automatic traffic recorder (ATR) traffic count data provided by Idaho Transportation Department (ITD).

The hourly ATR-based traffic count profiles for each roadway type were used to estimate hourly volume on each segment and the modified Bureau of Public Roadways volume/capacity curve was used to develop the average speed distribution database for each hour.

$$\text{Hourly Vehicle Speed} = \text{Free Flow Speed} * \left(1 + A * \left(\frac{\text{Volume}}{\text{Capacity}} \right)^B \right)$$

Where A and B are local coefficients used in the regional travel demand model as provided by COMPASS.

Base- and future-year average speed distributions were developed for all four MOVES road types using travel demand model base and future-year outputs developed by COMPASS for the Treasure Valley and detailed ATR data provided by ITD.

INTERAGENCY CONSULTATION COMMITTEE ITEM VI-B

DATE: April 8, 2015

Topic: Review the Project List for the Draft FY2016-2020 Regional Transportation Improvement Program (TIP)

Request/Recommendation:

COMPASS staff seeks review of the project list for use in the air quality conformity demonstration of the draft *FY2016-2020 Regional TIP*.

Background/Summary:

The Interagency Consultation Committee (ICC) is required to review and approve the assumptions and emissions estimation methodologies used in regional emissions analyses per 40CFR93 and IDAPA 58.01.01.563. The Regional Transportation Improvement Program (TIP) inclusive of northern Ada County and long-range transportation plan must demonstrate conformity to the motor vehicle emissions budgets established in the *Northern Ada County PM₁₀ State Implementation Plan, Maintenance Plan: Ten-Year Update*.

COMPASS staff prepared the listing of projects to make up the “build” travel demand model networks for use in the draft FY2016-2020 Regional TIP conformity demonstration for northern Ada County (attachment 1). The model networks include programmed and planned-funded projects listed in the following reports:

- Ada County Highway District’s Capital Improvement Plan, as of April 2012
- FY2015-2019 Integrated Five-Year Work Program
- Recommendations to the 2016 to 2020 Five-Year Idaho Transportation Investment Program
- draft FY2016-2020 Regional Transportation Improvement Program
- [CIM 2040 \(table 6.3, pages 103 to 107\)](#)

Note: A regional emissions analysis is not federally required for carbon monoxide (CO). However, *Northern Ada County Air Quality Maintenance Area Second 10-Year Carbon Monoxide Limited Maintenance Plan* requires COMPASS to conduct a build/no build emissions analysis for local planning purposes. The same “build” networks are used to estimate the motor vehicle emission estimates for the budget and CO-build analyses.

Draft FY 2016-2020 Regional Transportation Improvement Program
Regional Emissions Analysis Model Networks
As of April 9, 2015

Current Network

The following table lists the transportation projects recently completed or under construction. Projects under construction are expected to be open to the motoring public by December 31, 2015.

No.	Project	Location	No. of lanes	Source	Key# - IFYWP, CIP, ITD	Regionally Significant	Federal Aid	Exempt from Regional Conformity	Construction Year
1.	Broadway Ave IC	Reconstruct interchange	NA	ITIP/ CIM 2040	09821	Yes	Yes	Yes - (40CFR 93.127)	Under Construction
2.	Gowen Rd IC	Reconstruct interchange	NA	ITIP/ CIM 2040	09822	Yes	Yes	Yes - (40CFR 93.127)	Under Construction
3.	Hill Rd Extension	State St - Horseshoe Bend Rd	3	IFYWP / CIP	RD308	No	No	Yes	Under Construction
4.	I-84	Broadway Ave IC to Gowen IC	6	ITIP/ CIM 2040	13812	Yes	Yes	No	Under Construction
5.	Lake Hazel Rd Extension	Connect existing Lake Hazel Rd to Cole Rd	2	IFYWP/ CIM 2040	RD213-17	Yes	No	No	2015
6.	McMillan Rd	Locust Grove Rd - Eagle Rd	5	IFYWP/ CIP	RC0240/ RD2012-100	No	No	Yes	Under Construction
7.	Meridian Rd IC	Reconstruct interchange	NA	ITIP/ CIM 2040	10939	Yes	Yes	Yes - (40CFR 93.127)	Under Construction
8.	Ten Mile Rd	Cherry Ln - Ustick Rd	5	IFYWP/CIP	RD188/ RD2012-131	No	No	Yes	Under Construction

The 2016 network uses 2016 demographics and includes the construction year networks for 2015 plus the following list of projects. The network is built for planning purposes only.

No.	Project	Location	No. of lanes	Source	Key# - IFYWP, CIP, ITD	Regionally Significant	Federal Aid	Exempt from Regional Conformity	Construction Year
9.	Broadway Bridge Replacement	Front St to University Dr	6	ITIP/ CIM 2040	11588	Yes	Yes	No	2016
10.	Eagle Rd (SH 55)	River Valley Rd to I-84 (Southbound from River Valley Rd to Franklin Rd may be delayed)	6	ITIP	13349 / 13473	Yes	No	No	2016

Source of Projects:

IFYWP = Ada County Highway District's Integrated Five Year Work Plan FY 2015-2019

CIP = ACHD 2012 Draft Capital Improvements Plan FY 2012-2031

ITIP = recommendations to the 2016 to 2020 Five-Year Idaho Transportation Investment Program

TIP = draft FY 2016-2020 Regional Transportation Improvement Program list

CIM 2040 = *Communities in Motion 2040* Project List – Current Long Range Transportation Plan

Unfunded = Unfunded projects listed in the ACHD's 2012 Draft Capital Improvements Plan FY 2012-2031 and *Communities in Motion 2040*

FYWP #/ITD Key #:

FYWP# = ACHD GIS Numbers are alpha numeric identification numbers (ex. RD169)

ITD Key# = ITD Key Numbers are from the Transportation Improvement Program and the State Transportation Improvement Program and are strictly numeric (ex. 6299)

Regionally Significant:

Yes = Represents functional classification on the 2015 Federal *Functional Classification Map*

http://www.compassidaho.org/documents/prodserv/maps/adacan2015_E.pdf

Regionally Significant Roadway Project Definition:

Regional emissions analyses, for the purposes of demonstrating transportation conformity of a TIP or long-range plan, must include all regionally significant and/or federally funded projects in the nonattainment or maintenance area. On January 30, 2002, the ICC developed the following definition of a "Regionally Significant" project:

"A transportation project in Ada County, Idaho is designated 'Regionally Significant' if:

- (a) the project is for the improvement of either:
 - (i) a principal arterial or higher functional classification; or
 - (ii) a minor arterial which will have a twenty (20) year projected traffic volume of at least 45,000 vehicles a day after completion of the project; and

- (b) the project will add at least one new continuous vehicular lane which either:
 - (i) extends from one intersecting principal or minor arterial to another intersecting principal or minor arterial; or
 - (ii) in the case of an interstate, extends from the on ramp of one interstate interchange to a point beyond the off ramp of the next adjacent interstate interchange."

Despite these definitions, the ICC maintains discretionary authority in interpreting and applying them to the area's transportation programs, plans, and projects. For the purposes of this conformity determination, all applicable roadway projects, despite their significance, were included in the travel demand model networks.

Exempt:

Pursuant to 40CFR93.126 (Exempt Projects), certain projects listed in a long-range transportation plan or TIP may proceed even in the absence of a conformity finding/demonstration. Exempt projects include highway safety or mass transit projects, landscaping projects, roadway rehabilitation and repair, transportation enhancement projects, and transportation planning activities that do not lead directly to construction.

Pursuant to 40CFR93.127 (Exempt Projects from the Regional Emissions Analyses), certain projects listed in a long-range transportation plan or TIP may proceed even in the absence of a conformity finding/demonstration. Exempt projects include intersection channelization or signalization at individual intersections, interchange reconfiguration, changes in vertical and horizontal alignment, truck size and weight stations, bus terminals and transfer points.

However, the exempt projects listed in 40CFR93.126 or 40CFR93.127 are not considered exempt if the ICC concludes that they may have an adverse impact on air quality or has potential regional impacts.

Status:

Based on project information provided by ITD or ACHD.

The regional model covers two counties – Ada and Canyon. The projects in Ada and Canyon County are included in the appropriate model network year. Air quality conformity is required for northern Ada County only therefore, only the projects within Ada County are listed above.
