Introduction

The 2006 Development Monitoring Report for Ada and Canyon Counties provides an overview of development activity using information gathered from building permits submitted from January 1, 2006 through December 31, 2006. Community Planning Association of Southwest Idaho (COMPASS) has compiled similar reports for Ada County since 1980 and for Canyon County since 1999.

Building permits in this report are tabulated at several levels of geography:

City Limits are the official jurisdictional and taxing boundaries of the cities. City limits boundaries tend to expand year after year as city councils approve property annexations. Building permits in this report reflect the city limits boundaries at the time of reporting.

Areas of Impact are established by agreement between each city and the County. Impact areas are typically larger than the city limits boundaries and show areas of land that the city is likely to annex over the next 10 to 20 years. Every city develops a comprehensive plan that outlines how growth will occur and services will be provided within the impact area. Because the Treasure Valley has seen a high rate of growth and an everincreasing demand for new land to develop, cities are under pressure to continually expand their areas of impact.

Demographic Areas are collections of multiple Transportation Analysis Zones (TAZ) that roughly follow city areas and sub-areas within cities. A TAZ is a special area delineated by state and/or local transportation officials for tabulating traffic-related data. City limits and area of impact boundaries are continuously expanding. Demographic area and TAZ boundaries stay the same for about ten years and therefore provide a good geography by which to analyze growth trends within a constant boundary over a range of time. In 2005 the demographic areas near Meridian, Nampa, and Caldwell were subdivided into smaller sections to allow for better analysis of specific growth areas within the city region. As an example, the Meridian demographic area was subdivided into three sections: North Meridian, Central Meridian, and South Meridian. COMPASS can still analyze the change in building permit activity within the Meridian demographic area as a whole because the overall Meridian area boundary did NOT change. Now, we can more easily see what specifically occurred in the rapidly developing North Meridian sub-area.

Building permits are also geocoded, or given a spatial reference on a map, allowing for even greater flexibility in analyzing permit activity. For example, COMPASS staff can now determine how many new residential units were permitted in a particular school district, or in a certain neighborhood.

COMPASS tracks building permit information primarily as a tool to analyze transportation needs in the Treasure Valley. This purpose affects the type of building permits included in the report as well as those that are not. For example, when looking at residential permits, only new residential structure permits are included. Home addition and remodel permits are discarded. COMPASS also keeps track of the total number of residential units. A permit for a new single family home counts as one unit. A permit for a house demolition or conversion to a commercial use (such as a law office) counts as one negative unit. Manufactured homes, including mobile homes, are recorded separately and counted as one dwelling unit. The number of units in a new apartment complex is also recorded. Sometimes a building is constructed for multiple uses and includes space for both residential and commercial purposes. Usually the total residential units in those buildings are more difficult to record because the builder may not yet know exactly how many residential units will be in the building. The finish permits for those units trickle in over a longer period of time.

COMPASS does not include value per square foot of residential construction in the report for several reasons. Residential values vary greatly between areas. Also, value and square footage information is not always reported. Because demolitions and changes of use are included in the unit count, using units to calculate average values and square footage may be misleading. Value per square foot calculations can be completed for specific geographic areas upon request.

Non-residential permits are also analyzed by their impact on the overall transportation system. All new structure permits are included. Those permits are separated from non-residential additions and changes in use. Non-residential addition permits are only recorded if there is a significant addition of square footage and if the value is over \$10,000. Store and office remodel permits are discarded, regardless of value. Change of use is a more difficult category. COMPASS includes the permit if, for example, a restaurant space changes to a tanning salon or a law firm moves into an empty tenant space. The permit is discarded if one restaurant tenant moves out and another restaurant tenant moves in, or even if one kind of professional office (real estate) replaces another (law firm). If a commercial shell building is built, permits that establish occupancy are kept.

Non-residential permits are divided into three categories: Commercial, Industrial and Public/Quasi Public. COMPASS uses the Standard Land-Use Coding Manual to assign every building permit a four-digit code. Those codes are then compiled into the three main categories. Commercial uses make up the largest percentage of non-residential permits and are defined as wholesale or retail trade and personal or professional services. Industrial uses are for the production of goods; examples could include timber, canned foods or computer parts. Hewlett Packard and Micron are the Treasure Valley's larger contributors to permits in this category. Public/Quasi Public uses include churches, schools, athletic centers, city buildings and charitable services.

When looking at value and square footage data, it is important to note that while information is included with most permits, it is not included with every permit. Also, because COMPASS discards many permits when developing this report, as explained above, the value and square footage information included in this report may differ greatly from building permit reports generated by a city, for example. The values listed in the tables are for the cost of the structure only and do not include the cost of the building lots or small building improvements made after initial construction.

The data shown in this report reflects the building permits issued by each jurisdiction during the year. It does not reflect which of those permits were actually completed within the year. There is sometimes a delay between the date the permit is issued and the date of construction. Some never get built at all.

The 2006 report includes preliminary platting and final platting data. For the purposes of this report, developments are shown as preliminary when they have received preliminary approval from a city or county jurisdiction, but have not yet received final approval or been recorded by the county. The final plat tables reflect the number of lots and acres that the counties show as having recorded within the year. The data shown in these tables reflect the best available information available from the city and county jurisdictions at the time of the report. Preliminary plat information in particular is somewhat difficult for city and county jurisdictions to track. Development boundaries and the number of lots and acres change several times throughout the approval process.

The City of Star annexed across the county line in 2006 making it the only multi-county city within the COMPASS jurisdiction. This necessitates special consideration within this report. The city did not issue any building permits within Canyon County in 2006 and will therefore not be listed in any of the permit tables or charts within this report. They did, however, issue a preliminary plat for the East Canyon Subdivision in November. This subdivision consists of approximately 22 parcels and 1,525 lots falling on 485 acres. In January of 2007, an additional subdivision was annexed and preliminarily platted. These two plats are found within the map and table on page 29. Further editions of this report will begin to report on the cities growth in both Ada and Canyon County.

Custom data analysis for more specific areas is available. Shape files and the original database are also available upon request. The 2006 Development Monitoring Report and previous year reports are available on the COMPASS website http://www.compassidaho.org/prodsery/gtsm-devmonitoring.htm.

Overview of Ada County Permit Activity

Residential Construction

A total of 4,681 units were permitted in Ada County in 2006, a 40.2 percent decrease countywide over the same period last year and the first decrease since 2002. All cities and the unincorporated area experienced a decrease in residential permits of at least 25 percent, with the most notable decreases falling in Eagle (51.3%) and Meridian (49.1%). Meridian fell in both single family and multi-family permits with a net decrease of 1,626 permits. On average within Ada County in any given month in 2006, the entities issued 263 less permits than in the same month in 2005. The large decrease in single family units (46.3%) in the county was offset by an increase in multi-family units (26.2%) and mobile and manufactured home units (13.8%). Nearly 26 percent of the permits were issued for units outside of city limit boundaries. That is more permits than were issued in the city of Boise in 2006.

Table 1: Ada County Total New Residential Units by City Limits 2000 to 2006

| Year | | | Garden City | Kuna | Meridian | Star | Unincorporated | Total |
|------|-------|-----|----------------|------|----------|------|----------------|-------|
| 2000 | 1,302 | 456 | 116 | 344 | 759 | 74 | 844 | 3,895 |
| 2001 | 1,823 | 361 | 103 | 321 | 921 | 43 | 950 | 4,522 |
| 2002 | 1,209 | 268 | 196 | 410 | 950 | 46 | 878 | 3,957 |
| 2003 | 1,119 | 421 | 88 | 232 | 1,766 | 102 | 1,036 | 4,764 |
| 2004 | 815 | 483 | 69 | 230 | 2,567 | 146 | 1,200 | 5,510 |
| 2005 | 1,189 | 530 | 70 | 563 | 3,314 | 548 | 1,617 | 7,831 |
| 2006 | 877 | 258 | 53 | 296 | 1,688 | 300 | 1,209 | 4,681 |

The number of new multi-family units increased over 2005. This was in direct contrast to the major decrease in single family dwelling units.

Table 2: Ada County Multi-Family Units as a Percentage of Total Units 2000 to 2006

| Year | Total Residential Units | Multi-Family Dwelling Units | % Total |
|------|-------------------------------|-----------------------------------|---------|
| 2000 | 3,895 | 399 | 10% |
| 2001 | 4,522 | 1180 | 26% |
| 2002 | 3,957 | 635 | 16% |
| 2003 | 4,764 | 784 | 16% |
| 2004 | 5,510 | 591 | 11% |
| 2005 | 7,831 | 608 | 8% |
| 2006 | 4,681 | 735 | 16% |

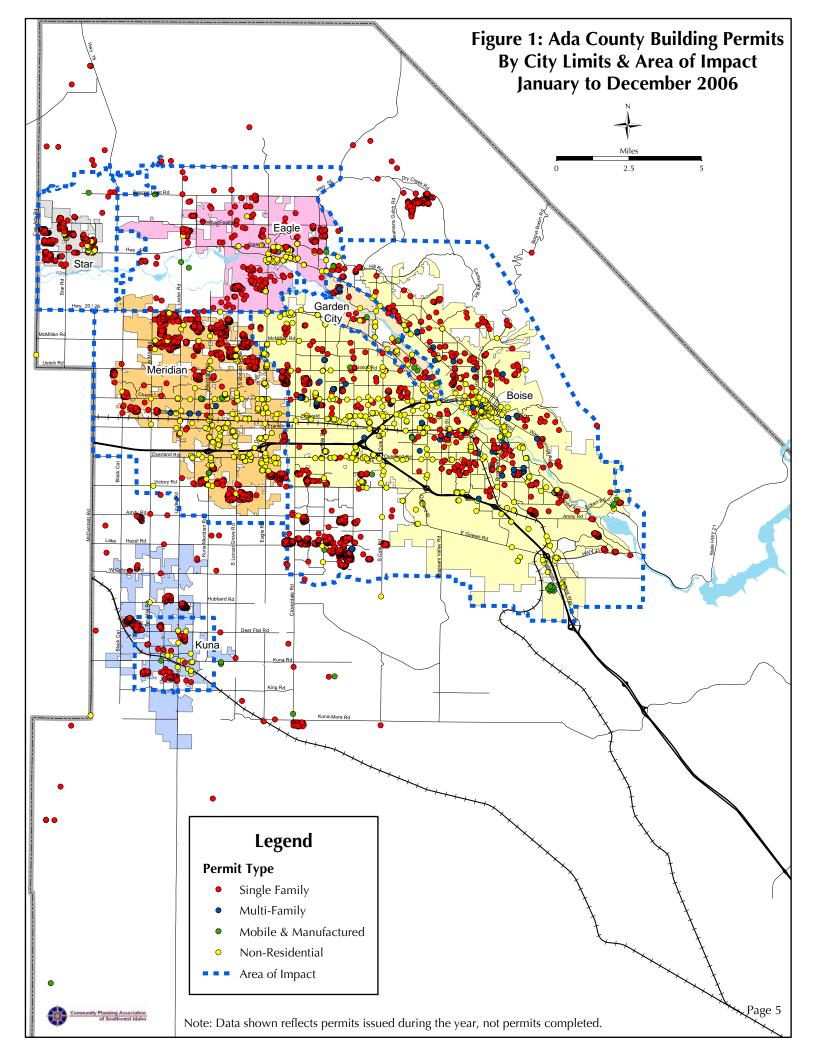

Non-Residential Construction

The highest value new commercial construction projects were in Meridian for 2006, including three new schools and one technology education building that fell in the top ten most expensive projects. The highest project in Meridian was the construction of Rocky Mountain High School at \$46.3 million. Eagle had one project in the top ten also being a school. The highest value projects in Boise were the new Royal Plaza mixed use building shell (\$8.26 million), the Anthem Office Building Shell (\$7.79 million), and an assisted living complex. Kuna even joined the top ten most expensive projects with the construction of Crimson Point Elementary School (\$6.5 million).

While residential permitting has decreased heavily in Ada County, non-residential construction has increased in most areas. Since the size of commercial units vary and is not always reported, the best estimate of the growth of commercial development is the number of permits issued for new construction. While it is hard to determine the impact of the developments on the local economy due to the lack of consistent statistics, it can be reasonably assumed that an increase in permitting would result in an increase in economic activity. The non-residential permitting activity for the last several years is shown below. As can be seen, the number of non-residential new construction permits, while varying within the individual cities, has increased steadily over the last five years.

Table 3: Ada County Non-Residential New Construction by City Limits 2002 to 2006

| Year | Boise | Eagle | Garden City | Kuna | Meridian | Star | Unincorporated | Total |
|------|-------|-------|----------------|------|----------|------|----------------|-------|
| 2002 | 69 | 10 | 8 | 4 | 20 | 3 | 1 | 115 |
| 2003 | 120 | 19 | 21 | 1 | 55 | 3 | 2 | 221 |
| 2004 | 104 | 28 | 12 | 13 | 79 | 7 | 22 | 265 |
| 2005 | 106 | 28 | 14 | 6 | 139 | 9 | 30 | 332 |
| 2006 | 132 | 35 | 26 | 13 | 113 | 12 | 15 | 346 |

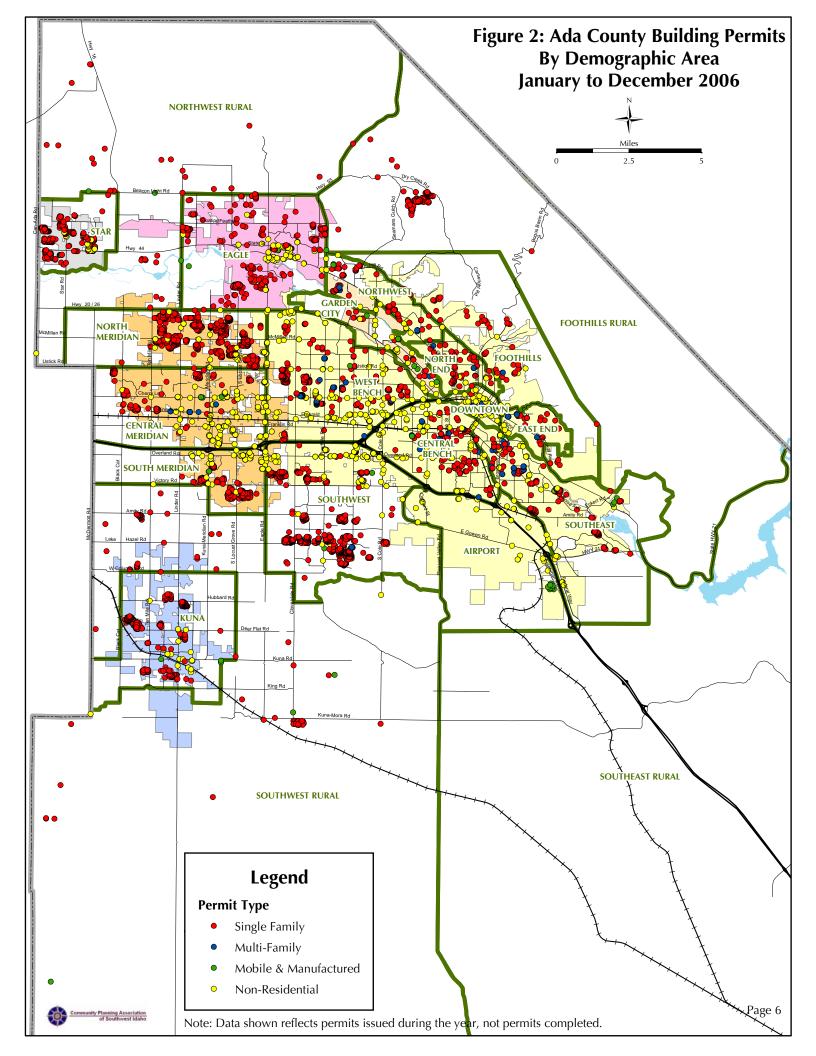

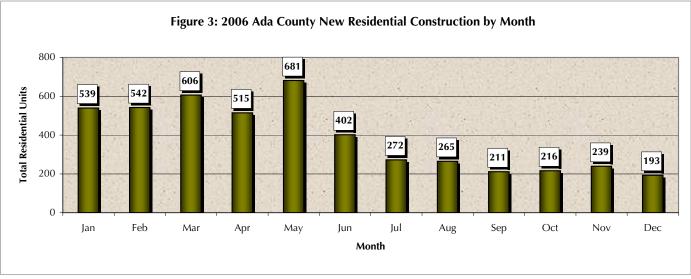

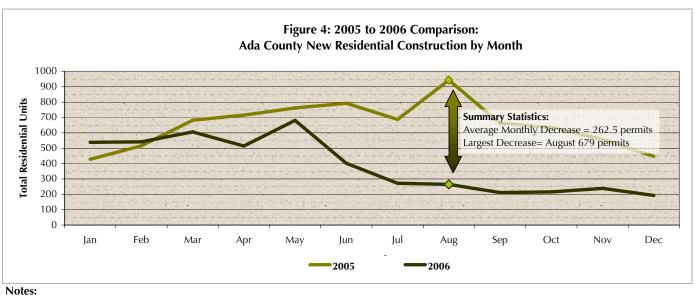

Table 4: Ada County New Residential Construction By City Limits January to December 2006

| City | | Single Family | | | Multi Family | , | Mobile Homes & Manufactured Homes | Total Units | Percent of Total |
|----------------|-------|---------------|-------------|-----------------------|--------------|-------------|---|----------------|---------------------|
| | Units | Value | Square Feet | Units Value Square Fe | | Square Feet | Units | | |
| Boise | 415 | \$140,940,852 | 1,411,433 | 452 | \$38,113,381 | 669,602 | 10 | 877 | 18.7% |
| Eagle | 228 | \$89,100,355 | 851,854 | 28 | \$3,352,426 | 36,818 | 2 | 258 | 5.5% |
| Garden City | 32 | \$8,021,422 | 6,223 | 15 | \$4,623,118 | 24,543 | 6 | 53 | 1.1% |
| Kuna | 295 | \$61,271,959 | 691,802 | 0 | \$0 | 0 | 1 | 296 | 6.3% |
| Meridian | 1,556 | \$333,959,116 | 3,967,697 | 112 | \$8,607,660 | 47,647 | 20 | 1,688 | 36.1% |
| Star | 268 | \$56,468,993 | 677,696 | 32 | \$609,708 | 6,846 | 0 | 300 | 6.4% |
| City Subtotal | 2,794 | \$689,762,697 | 7,606,705 | 639 | \$55,306,293 | 785,456 | 39 | 3,472 | 74.2% |
| Unincorporated | 1,054 | \$260,388,986 | 3,662,998 | 128 | \$11,081,456 | 150,912 | 27 | 1,209 | 25.8% |
| Total | 3,848 | \$950,151,683 | 11,269,703 | 767 | \$66,387,749 | 936,368 | 66 | 4,681 | |

Data reflects city limits boundaries at the time of reporting.

Unit data reflects both new units and substracts units for residential demolitions and change of use to multi-family or commercial.

Value data are not always reported; therefore totals represent only those records for which value was given.

Square footage data are not always reported; therefore totals represent only those records for which square footage was given.

Table 5: Ada County New Residential Construction By Area of Impact January to December 2006

Notes:

Data reflects area of impact and city limit boundaries as of February 2007.

Unit data reflects both new units and substracted units for residential demolitions and change of use to multi-family or commercial.

Value data are not always reported by the cities; therefore totals represent only those records for which value was given.

Square footage data are not always reported; therefore totals represent only those records for which square footage was given.

Data shown reflects permits issued during the year, not permits completed.

*Indicates percent of growth outside city limits but within the city's area of impact.

^{**}Kuna city limits extend outside their area of impact.

Table 7: Ada County New Residential Construction By Demographic Area January to December 2006

Notes:

Data reflects the 2006 Demographic Area boundaries.

Demographic Area boundaries do not mirror area of impact or city limit boundaries.

Unit data reflects both new units and substracted units for residential demolitions and change of use to multi-family or commercial.

Value data are not always reported; therefore totals represent only those records for which value was given.

Square footage data are not always reported; therefore totals represent only those records for which square footage was given.

Notes:

Data reflects city limits boundaries at the time of reporting.

Data reflects area of impact boundaries as of February 2007.

Value data are not always reported; therefore totals represent only those records for which value was given.

Square footage data are not always reported; therefore totals represent only those records for which square footage was given.

Data reflects city limit and impact boundaries at the time of reporting.

Unit data reflects both new units and substracted units for residential demolitions and change of use to multi-family or commercial.

Data shown reflects permits issued, not permits completed.

Table 20: Ada County Residential & Non-Residential Final Plats by City Limits January to December 2006

| City | Lots | Acres | Average Lots Per Acre | Percent Total Lots | Percent Total Acres |
|----------------|-------|-------|-----------------------|-----------------------|------------------------|
| Boise | 1,617 | 340 | 4.76 | 20.5% | 10.4% |
| Eagle | 516 | 434 | 1.19 | 6.5% | 13.3% |
| Garden City | 229 | 39 | 5.88 | 2.9% | 1.2% |
| Kuna | 663 | 211 | 3.15 | 8.4% | 6.4% |
| Meridian | 2,741 | 879 | 3.12 | 34.7% | 26.9% |
| Star | 732 | 245 | 2.99 | 9.3% | 7.5% |
| City Subtotal | 6,498 | 2,147 | 3.03 | 82.3% | 65.7% |
| Unincorporated | 1,396 | 1,119 | 1.25 | 17.7% | 34.3% |
| Total | 7,894 | 3,266 | 2.42 | | |

Data Highlights:

Meridian outpaced other Ada County cities in building activity, however, this slowed from 2005. Meridian saw a reduction in platted lots finaled of approximately 1,050, falling from 3,790 to 2,741.

Incorporated cities hold 82.3% of the total platted lots for the year and 65.7% of the total platted acres, indicating that lot sizes are significantly larger outside of city limits. Boise finaled 455 more lots than last year at the same time that building permitting slowed.

While there is great variance between lot sizes in each development, the average lots per acre platted in each city indicates the trend of development within the city. Garden City averages the highest density lots per acre at 5.88 while Eagle averaged the lowest density at 1.19 lots per acre. The unincorporated county region, which historically holds the lowest average lots per acre, fell to 1.25 lots per acre. With a 26.2 percent increase in multi-family dwellings, the increase in lots per acre is not surprising, in particular when looking at the large condominium complexes which are in construction in Boise. The increase in multi-family permitting tends to increase the average lots per acre.

2005 Information is based on the best available data. May not be complete.

Data reflects city limits boundaries at the time of reporting.

Overview of Canyon County Permit Activity

Residential Construction

A total of 3,283 units were permitted in Canyon County in 2006, a 2.2 percent increase over the previous year. While this change seems minimal, the results varied between the different cities. Caldwell experienced an increase in residential permitting going from 999 permits in 2005 to 1,182 permits in 2006, a difference of 18.3 percent. Nampa, on the other hand, experienced a slight slowing in permitting, dropping from 1,384 permits in 2005 to 1,332 in 2006. As can be seen in the graph on page 21, building permit activity was strong for the first eight months of 2006, averaging a 21 percent increase over 2005 numbers, but the last four months of the year saw an average of a 33 percent decrease in permitting. A summary of the number of permits issued from 2000 to 2006 by city limits is available below. As mentioned in the introduction, the City of Star will not appear in Canyon County building permit tables in this report as they did not issue any building permits during the 2006 calendar year.

Table 22: Canyon County Total New Residential Units by City Limits 2000 to 2006

| Year | Caldwell | Greenleaf | Melba | Middleton | Nampa | Notus | Parma | Wilder | Unincorporated | Total |
|------|----------|-----------|-------|-----------|-------|-------|-------|--------|----------------|-------|

| 2002 | 703 | 0 | 4 | 129 | 1,624 | 6 | 6 | 1 | 432 | 2905 |
| 2003 | 694 | 0 | 9 | 99 | 1,446 | 3 | 15 | 4 | 520 | 2790 |
| 2004 | 696 | 9 | 0 | 108 | 1,512 | 12 | 13 | 3 | 552 | 2905 |
| 2005 | 999 | 3 | 3 | 137 | 1,384 | 8 | 11 | 20 | 648 | 3213 |
| 2006 | 1182 | 0 | 1 | 159 | 1,332 | 9 | 11 | 27 | 562 | 3283 |

Permits for multi-family units in Canyon County increased over 2005 numbers; however, the numbers were still low compared to previous years.

Table 23: Canyon County Multi-Family Units as a Percentage of Total Units 2000 to 2006

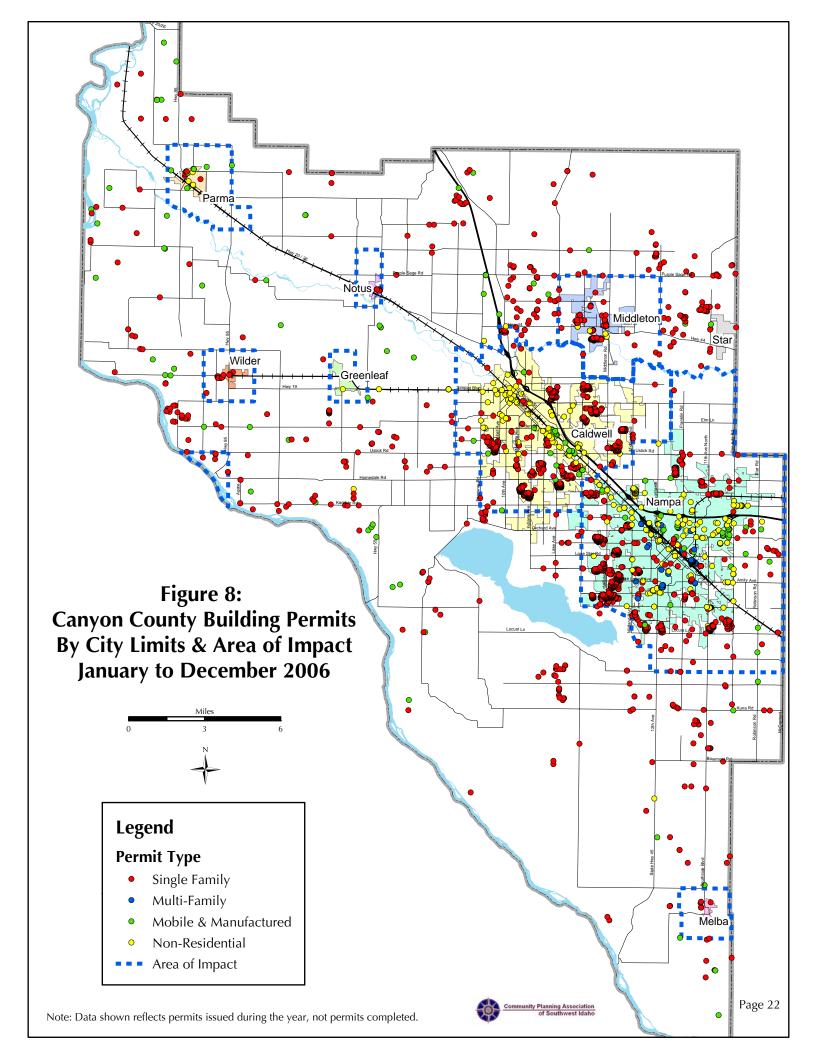

| Year | Total Residential Units | Multi-Family Dwelling Units | % Total |
|------|-------------------------------|-----------------------------------|---------|
| 2000 | 2,234 | 126 | 6% |
| 2001 | 2,520 | 133 | 5% |
| 2002 | 2,905 | 193 | 7% |
| 2003 | 2,790 | 294 | 11% |
| 2004 | 2,905 | 492 | 17% |
| 2005 | 3,213 | 105 | 3% |
| 2006 | 3,283 | 184 | 6% |

Non-Residential Construction

The highest value new non-residential projects were in Nampa for 2005, including two new schools (\$13.2 million and \$6.5 million) and two shell buildings at the Treasure Valley Marketplace (\$8.87 million and \$7.5 million) near the Karcher I-84 Interchange. Total non-residential permits fell slightly from 2005, mostly due to a drop in permits in the unincorporated area of the County.

Data reflects city limits boundaries at the time of reporting.

Unit data reflects both new units and substracted units for residential demolitions and change of use to multi-family or commercial.

Value data are not always reported; therefore totals represent only those records for which value was given.

Square footage data are not always reported; therefore totals represent only those records for which square footage was given.

Notes:

Data reflects area of impact boundaries as of February 2007.

Unit data reflects both new units and substracted units for residential demolitions and change of use to multi-family or commercial.

Value data are not always reported by the cities; therefore totals represent only those records for which value was given.

Square footage data are not always reported; therefore totals represent only those records for which square footage was given.

Data shown reflects permits issued during the year, not permits completed.

*Indicates percent of growth outside city limits but within the city's area of impact.

Notes:

Data reflects the 2006 Demographic Area boundaries.

Demographic Area boundaries do not mirror area of impact or city limit boundaries.

Unit data reflect both new units and substracted units for residential demolitions and change of use to multi-family or commercial.

Value data are not always reported; therefore totals represent only those records for which value was given.

Square footage data are not always reported; therefore totals represent only those records for which square footage was given.

Notes:

Data reflects the 2005 Demographic Area boundaries.

Demographic Area boundaries do not mirror area of impact or city limit boundaries.

Value data are not always reported; therefore totals represent only those records for which value was given.

Square footage data are not always reported; therefore totals represent only those records for which square footage was given.

Data reflects area of impact and city limit boundaries at the time of reporting.

Unit data reflects both new units and substracted units for residential demolitions and change of use to multi-family or commercial. Data shown reflects permits issued, not permits completed.

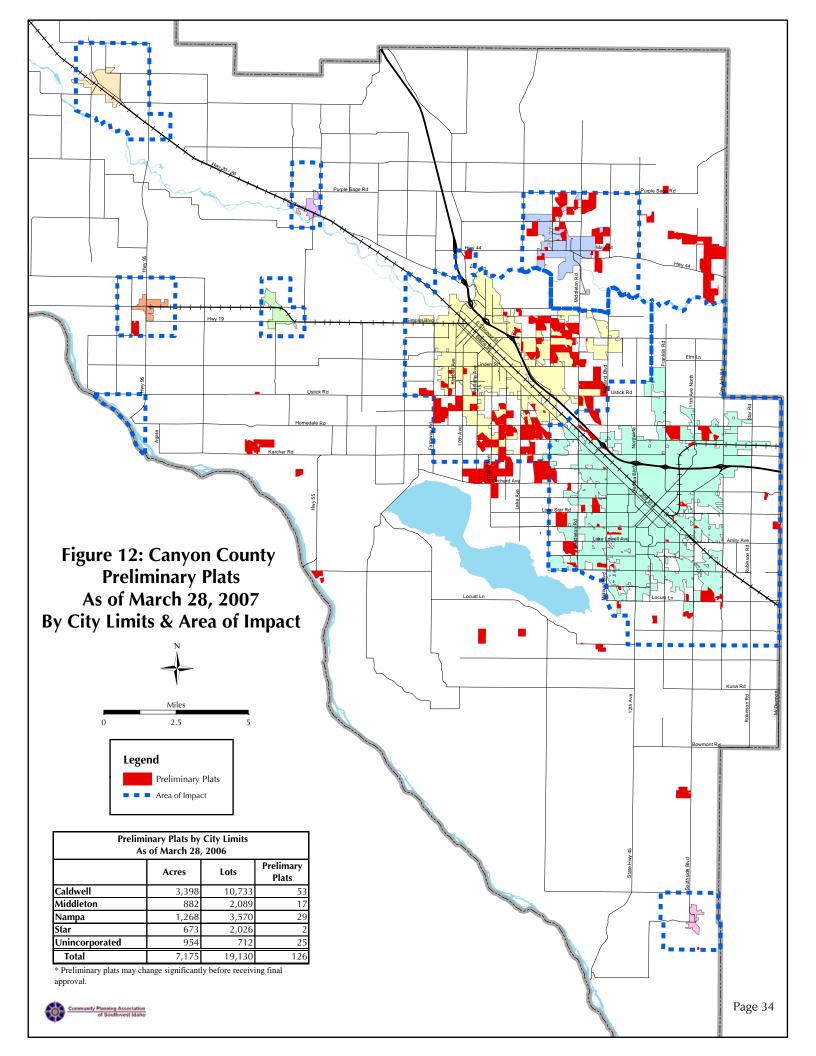

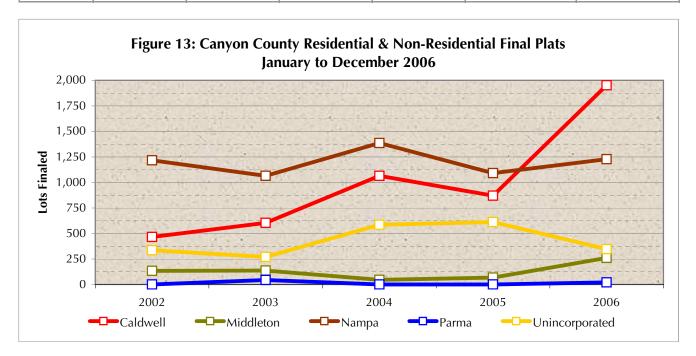

Table 41: Canyon County Residential and Non-Residential Final Platting History
Number of Lots Finaled
by City Limits 2002 to 2006

| Year | Caldwell | Middleton | Nampa | Parma | Unincorporated | Total |
|------|----------|-----------|-------|-------|----------------|-------|
| 2002 | 466 | 134 | 1,217 | 0 | 336 | 2,153 |
| 2003 | 603 | 137 | 1,065 | 44 | 269 | 2,118 |
| 2004 | 1,064 | 45 | 1,385 | 0 | 584 | 3,078 |
| 2005 | 870 | 68 | 1,091 | 0 | 612 | 2,641 |
| 2006 | 1952 | 260 | 1227 | 21 | 346 | 3,806 |

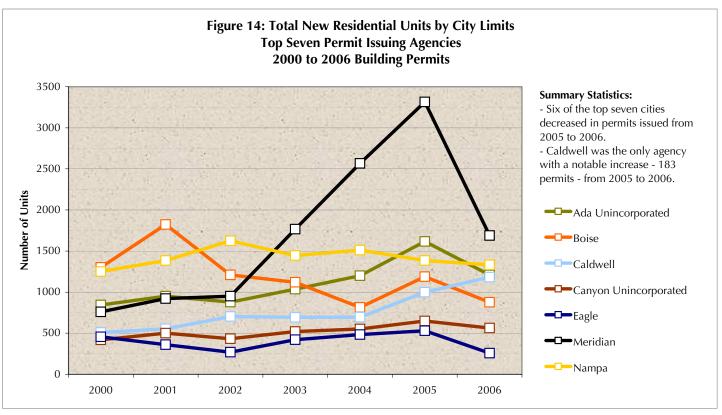

Data Highlights:

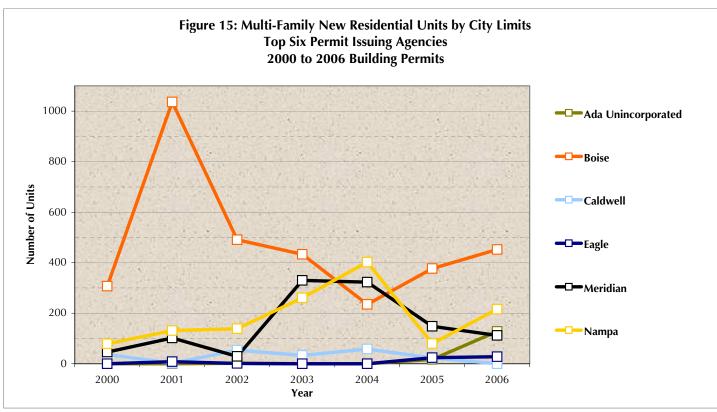

Without the availability of the acreage of the plats which were finaled in 2006, certain statistics are not available for this Canyon County data. However, by reviewing the above data, it is clear that the final platting activity within the county is following the trend of the building permit activity; it is increasing. Caldwell experienced the highest growth in plats finaled, surpassing for the first time the City of Nampa, obtaining the highest number of plats finaled in the last five years.

Notes:

Source: Canyon County Assessor's Office

2005 information is based on the best available data. County staff is not certain that all recorded plats are included in these numbers.

Data reflects city limits at the time of reporting.

Unit data reflects both new units and substracted units for residential demolitions and change of use to multi-family or commercial. Data shown reflects permits issued during the year, not permits completed.
