

# **Leadership by Example, Elected Official**

## **Brad Little, Governor State of Idaho**

Governor Little's Leading Idaho Initiative has ensured the state's continued success during challenging times by achieving record investments in transportation and education, along with record tax relief.

This historic transportation initiative includes \$200 million for local bridges, as well as an ongoing investment of \$200 million annually to help eliminate the statewide backlog of transportation maintenance needs. This was accomplished without raising taxes or fees.

Governor Little's leadership in raising awareness of transportation needs, then funding local, regional, and state transportation priorities has served as Idaho's catalyst for improving, maintaining, and building the state's infrastructure and economy.
