

# Acknowledgements

Developing a regional long-range transportation plan such as *Communities in Motion 2040 2.0* is a complex endeavor involving individuals with expertise in a wide variety of subjects, including transportation, finance, demographics, environmental issues, land use, and much more.

The COMPASS Board of Directors, COMPASS and member agency staff, private consultants, and committee and workgroup members put in countless hours to develop this plan. It could not have come to fruition without the input and expertise of the following:

## LEADERSHIP

- COMPASS Board of Directors
- Executive Director: Matt Stoll

## WORKGROUPS AND COMMITTEES

- Active Transportation Workgroup
- Demographic Advisory Workgroup
- Environmental Review Workgroup
- Freight Advisory Workgroup
- Interagency Consultation Committee
- Performance Measure Framework Workgroup
- Public Participation Workgroup
- Public Transportation Workgroup
- Rails with Trails Workgroup
- Regional Operations Workgroup
- Regional Transportation Advisory Committee

## CONSULTANTS

- Atlantic and Pacific Data Corporation
- CPCS Transcom Inc., in association with Parametrix and American Transportation Research Institute
- Economic Development Research Group, Inc., in association with ALTA Planning + Design
- Kittelson Associates
- McFarland Management, in association with IBI Group
- Neighborhood Allstars
- Parsons-Brinkerhoff

In addition, this plan could not have come to fruition without the members of the public who took the time to share thoughts, posts, and photos through social media; attend presentations, workshops, and open houses; and provide input, feedback, and comments on proposed projects and the draft plan itself.

Thank you for helping to make *Communities in Motion 2040 2.0* the best it can be.
