COMPASS Education Series Presents: Snow, Floods, and Fires – Oh My! A case for regional transportation resilience

Meridian, ID – While the Treasure Valley is relatively safe from catastrophic weather events such as hurricanes and widespread tornados, winter storms, spring flooding, and summer wildfires can still wreak havoc on our transportation system. The resulting impacts can range from mere inconveniences to being deadly.

Join COMPASS as we welcome Suseel Indrakanti from Cambridge Systematics to learn why proactively planning for a resilient transportation system is key to minimizing the impacts and disruptions caused by extreme weather and natural hazards and how we can make our transportation system more resilient when severe weather hits.

- Wednesday, May 29, 2024
- COMPASS; 700 NE 2nd Street, Meridian (first floor Board room)
- 5:30 pm reception
- 6:00 pm – 7:00 pm presentation
- **FREE!** Please RSVP to jgallup@compassidaho.org or 208/475-2226

COMPASS will also host a more technical workshop, "A planning framework for regional transportation resilience," on Thursday, May 30, from 8:30 am – 10:30 am at the same location. This workshop is also free and open to the public but will have a more technical focus. Seating for the workshop is limited; please RSVP as above to reserve your spot.

These presentations are being offered by COMPASS as part of its annual education series. For more information, visit <https://compassidaho.org/public-events/>.
