# IN A NUTSHELL

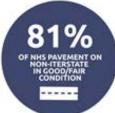

TOTAL BUDGETED FOR TRANSPORTATION IMPROVEMENT PROJECTS IN THE TREASURE VALLEY

TOTAL BUDGETED OVER SEVEN YEARS

\$828,682,000\*

\*INFLATED COSTS

TRUCK TRAVEL ON NON-INTERSTATE HIGHWAY SYSTEM DOES NOT MEET RELIABILITY

\$60 MILLION IN DEFERRED LOCAL ROADWAY MAINTENANCE

\$21.6 MILLION IN DEFERRED TRANSIT ASSET REPLACEMENT

More information available starting on page 22.

### INTRODUCTION

A regional Transportation Improvement Program (TIP) is a short-range (sevenyear) capital improvement program (budget) of transportation projects consistent with federal regulations and area policies and strategies. The State Transportation Improvement Program (STIP) is the state's short-range capital improvement program. The Idaho STIP references projects in Ada County and Canyon County via the Community Planning Association of Southwest Idaho's (COMPASS') TIP.

The TIP is developed through a cooperative process by COMPASS, the designated metropolitan planning organization (MPO) for the Boise Urbanized Area Transportation Management Area (TMA) and the Nampa Urbanized Area. This process involves extensive participation by Ada County, Ada County Highway District (ACHD), Boise State University, Canyon County, Canyon Highway District No. 4, Capital City Development Corporation, Idaho Department of Environmental Quality, Golden Gate Highway District No. 3, Idaho Transportation Department (ITD), Valley Regional Transit (VRT), and the Cities of Boise, Caldwell, Eagle, Garden City, Greenleaf, Kuna, Melba, Meridian, Middleton, Nampa, Notus, Parma, Star, and Wilder.

The TIP must be consistent with the regional long-range transportation plan, Communities in Motion 2040 2.01 (CIM 2040 2.0). The COMPASS Board of Directors adopted CIM 2040 2.0 on December 17, 2018.

The first four years of the TIP are of particular interest since these years are considered "budgeted," while the remaining years are more informational in nature. The latter projects are listed to provide a framework for transportation needs that move from the planning stage to the implementation stage. Per federal regulations, information on the status of projects in the first year of the previous TIP will be posted online<sup>2</sup> by the end of each calendar year.

This document includes all federally and state-funded projects and those nonfederally funded projects deemed "regionally significant." The TIP projects identified in this document are within the estimates of available funds from a variety of sources, both federal and non-federal.

The Boise TMA includes the cities of Boise, Eagle, Meridian, and Garden City; the Nampa Urbanized Area includes the cities of Nampa, Caldwell, and Middleton. Both urbanized areas also include adjacent densely settled areas outside of city limits. The smoothed urbanized area boundaries for the Boise and Nampa Urbanized Areas were adopted by the COMPASS Board of Directors, via Resolution 15-2013, on August 19, 2013. COMPASS' planning area includes all of Ada and Canyon Counties (Figure 1), an area broadly referred to as the "Treasure Valley."

http://www.compassidaho.org/prodserv/transimprovement.htm#Annual

<sup>&</sup>lt;sup>1</sup> Communities in Motion 2040 2.0: http://compassidaho.org/CIM2040-2.0/

<sup>&</sup>lt;sup>2</sup> Annual Listing of Projects:

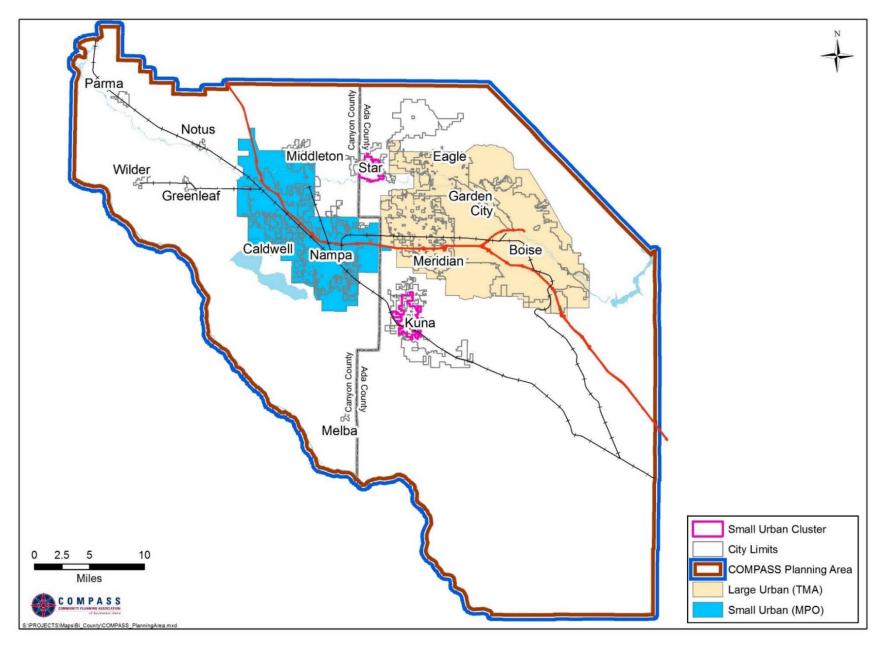

Figure 1: COMPASS Planning Area

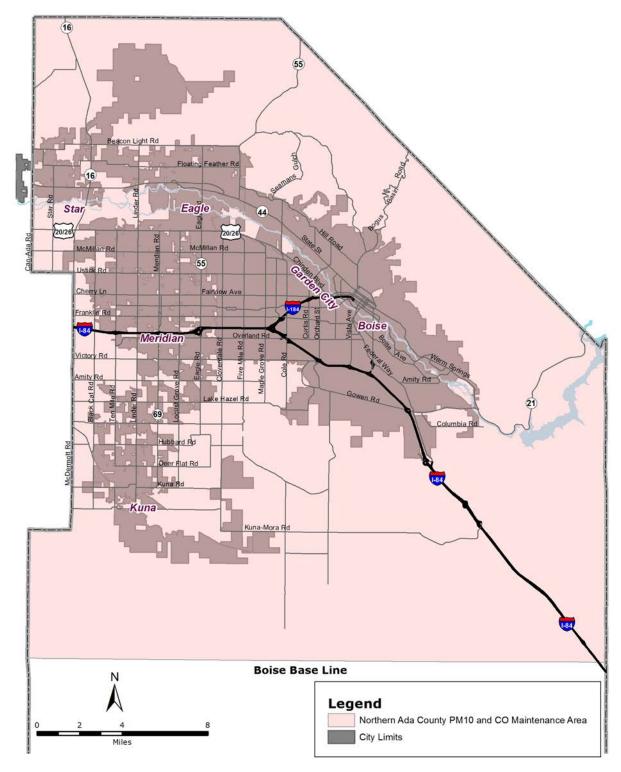

Figure 2: Northern Ada County Air Quality Maintenance Area

Northern Ada County is a "maintenance area" for two air pollutants – coarse particulate matter (airborne dust and other particulates; referred to as "PM<sub>10</sub>") and carbon monoxide. Northern Ada County violated the federal standards for these pollutants in the 1980s and early 1990s, and has been in compliance ever since. Plans are in place to ensure the area maintains its compliance with these standards. COMPASS must show that the projects contained in this TIP "conform" to these plans – a process referred to as an "air quality conformity demonstration." This is discussed in more detail in Section VI. The Ada County air quality "maintenance area" encompasses the entire area of Ada County north of the Boise Baseline (Figure 2) (above), which is an imaginary line located seven miles south of the City of Kuna.

This report includes more detail in the following appendices:

- APPENDIX A LIST OF PROJECTS, provides a detailed list of projects that
  are funded with federal or state funds, or considered "regionally significant,"
  no matter the funding source.
- APPENDIX B FUNDING TYPES AND ACRONYMS, provides a way to decipher transportation and federal jargon.
- APPENDIX C PUBLIC COMMENTS, provides verbatim comments received on the project list, as well as any amendments that require a public comment period.
- APPENDIX D PERFORMANCE MEASURE ANALYSIS, provides in-depth analysis, using modeling tools, to explain how projects in the TIP will affect the transportation system.
- APPENDIX E HISTORICAL AND PROJECTED BUDGET DATA, provides additional information about transportation agency budgets.
- APPENDIX F PRIOR YEAR PROJECTS, provides a list of projects that are still active, but no longer have budgeted funds. Projects could still need additional funding or release excess funding throughout the life of this program.

#### I. INFLATION FACTORS

The Federal Highway Administration (FHWA) requires all reporting documents show project costs in the year of expenditure. This means project costs must be shown with inflationary factors expected by the year funds will be expended.

COMPASS also maintains a project list for balancing purposes in "current dollar format," meaning the costs are not inflated. This format is posted on the <u>TIP web page</u><sup>3</sup> and is the project list most typically used by COMPASS and sponsoring agencies.

Agencies in the State of Idaho currently use a 2% inflation factor to adjust the cost of future expenditures for most projects.

<sup>&</sup>lt;sup>3</sup> TIP web page: https://www.compassidaho.org/prodserv/transimprovement.htm

## II. PUBLIC OUTREACH EFFORTS

The public outreach process for the annual TIP update begins approximately 16 months prior to its final approval. This effort includes requesting input from local governments in the Boise and Nampa Urbanized Areas, local governments outside of the urbanized areas within Ada and Canyon Counties, and the general public. Public outreach efforts are guided by, and comply with, requirements and recommendations outlined in the COMPASS Public Participation Plan (Chapter 2 of the <u>COMPASS Integrated Communication Plan</u><sup>4</sup>).

The COMPASS Public Participation Plan specifically outlines the public involvement process for the TIP on pages 11 - 13.

**Local Government Input.** COMPASS staff met with elected officials and local government staff in Ada and Canyon Counties to solicit their desired transportation projects for inclusion in this document from August through December 2019.

COMPASS Regional Transportation Advisory Committee (RTAC). RTAC is comprised of technical experts representing counties, cities, highway districts, state agencies, and other public agencies in Ada and Canyon Counties. RTAC members reviewed and ranked all project applications, and recommended a list of projects to be funded to the COMPASS Board of Directors. RTAC members were also involved throughout the TIP development process, including recommending selection criteria in the COMPASS Funding Application Guide and federal performance measure targets.

**30-Day Public Comment Period.** Public comment on the draft FY2021-2027 TIP project list was solicited from August 14 through September 14, 2020. The public comment period was promoted through the COMPASS <a href="website">website</a>, COMPASS social media accounts, online community calendars, a news release, newspaper advertisements, legal notices, email blasts, and postcards.

In addition to the TIP and associated air quality conformity demonstration, public comments on a proposed amendment to *Communities in Motion 2040 2.0*, the regional long-range transportation plan for Ada and Canyon Counties, were also solicited during the comment period.

<u>COMPASS website.</u> All draft TIP materials were available on the <u>"Comments and Questions" webpage</u><sup>6</sup> from August 14 through September 14, 2020.

Public comment materials posted online included detailed and basic project lists, a "major changes" list, the draft air quality conformity demonstration (see Section VI), and interactive map of projects contained in the TIP, a TIP brochure, and fact

<sup>&</sup>lt;sup>6</sup> COMPASS "Comments and Questions":

sheets related to air quality conformity and understanding the TIP. Comment forms and information on how and where to comment, including information on open houses, were also posted online.

Open House. COMPASS hosted two virtual open houses: Wednesday, August 26, 2020, starting at noon and again at 6:30 p.m. using Facebook Live (Figure 3). COMPASS staff provided an overview of the TIP, and representatives from ACHD, ITD, and VRT gave brief presentations on projects in the TIP that are managed by their agencies.

<u>Legal Notice</u>. COMPASS published a legal notice for the TIP public comment period in the *Idaho* 

Virtual Open House

Communities in Motion 2040 2.0,
Transportation Improvement Program, and Air Quality Conformity Demonstration

Presentations By:
Liisa Itkonen, Principal Planner
Toni Tisdale, Principal Planner
Stephen Hunt, Valley Regional Transit
Austin Miller, Ada County Highway District
Mark Wasdahl, Idaho Transportation Department

Figure 3: COMPASS Virtual Open House

Statesman and the Idaho Press on four dates: August 14, August 17 (Idaho Statesman only), August 18, and August 19 (Idaho Press only), 2020.

Figure 4: Newspaper Advertisement

<u>Display Advertisements.</u> Display advertisements (Figure 4) promoting the public comment period and open house (as appropriate) appeared in:

- Idaho Statesman: August 14, August 24, and August 28, 2020
- Idaho Press: August 14, August 25, and September 8, 2020
- Kuna Melba News: August 19, September 2, and September 9, 2020
- Meridian Press: August 14, September 4, and September 11, 2020

No Spanish-language newspapers were in business in Ada or Canyon Counties during the public comment period.

News Release. COMPASS distributed a news release notifying the public of the comment period and open house; the news release was sent to local and regional media on August 14, 2020. One <u>news article</u> (KIVI<sup>7</sup>, August 14, 2020) resulted from the news release.

<sup>&</sup>lt;sup>7</sup> News article (reposted on COMPASS website):

<u>Email and Mail.</u> COMPASS sent four emails to 2,735 people publicizing the TIP public comment period. COMPASS mailed 20 postcards on August 13, 2020, to interested individuals who prefer to be contacted via US Mail.

<u>Flyer.</u> COMPASS created a flyer (<u>English</u><sup>8</sup> and <u>Spanish</u><sup>9</sup>) advertising the TIP public comment period and open house. Additionally, COMPASS requested that committee, workgroup, and agency members post flyers on their websites and other public locations in their jurisdictions.

<u>Social Media.</u> COMPASS posted information about the TIP public comment period on its social media throughout the public comment period.

- <u>Facebook</u><sup>10</sup>: COMPASS posted information about the public comment period nine times from August 14 September 14, 2020. These Facebook posts resulted in a total audience reach of 2,232 and 160 engagements.
- <u>Twitter</u><sup>11</sup>: COMPASS tweeted information about the public comment period 17 times from August 14 September 12, 2020. These tweets resulted in a total of 1,042 viewer impressions and 16 engagements.
- <u>Instagram</u><sup>12</sup>: COMPASS posted information about the public comment period five times from August 14 – September 14, 2020. These posts resulted in 332 engagements.
- Nextdoor: COMPASS sent information about the public comment period to six member agencies to post on their Nextdoor accounts on August 14, 2020.

<u>Community Calendars.</u> COMPASS posted the TIP open house information on the COMPASS Facebook events page, the COMPASS website calendar, and on the following community calendars:

- Boise Weekly online calendar
- Idaho Business Review online calendar
- Idaho Press online calendar
- Idaho Statesman online calendar
- Meridian Chamber of Commerce online calendar
- Nampa Chamber of Commerce online calendar

<sup>&</sup>lt;sup>12</sup> Instagram: <u>www.instagram.com/compassidaho/</u>

<u>Brochure.</u> COMPASS staff updated a brochure explaining the TIP; the <u>English</u><sup>13</sup> and <u>Spanish</u><sup>14</sup> versions were posted on the COMPASS website.

<u>Spanish Translation.</u> COMPASS translated the public comment flyer, TIP brochure, and the TIP comment form (hard copy and online) into Spanish. In addition, the COMPASS website has a Spanish translation option, allowing for translation of all web content.

Comments Received. The public was encouraged to submit written comments throughout the public comment period. Comments were accepted via email, letter, fax, or hard copy or online comment forms. Assistance was offered to those unable to submit comments in writing. Sixty public comments were received (see Appendix C). Figure 5 shows the demographic data collected from public comment forms submitted to COMPASS.

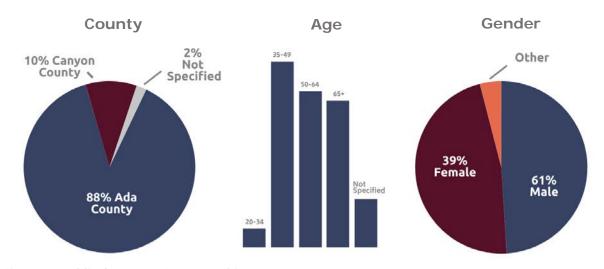

Figure 5: Public Comment Demographic Data

<u>Disposition of Comments.</u> Questions submitted as part of public comments were answered, and all comments were provided to RTAC and the COMPASS Board of Directors. Comments related to specific projects or studies were forwarded to the appropriate agencies. The disposition of individual comments is included with the verbatim comments and staff responses in Appendix C.

**Special Assistance.** COMPASS notifications, advertisements, other promotional information, and the COMPASS website, included the following statement for those who require special assistance in submitting comments:

Those needing assistance, including assistance in submitting written comments, may call 208/855-2558 with 48 hours advance notice. Personas que necesitan asistencia especial, llamar al número 208/855-2558 con 48 horas de aviso.

# III. PROJECT SELECTION

COMPASS serves as a regional forum for making decisions about transportation and related planning, and sets priorities for spending federal transportation funds. COMPASS accepts applications annually for transportation funding and manages the following federal-aid programs:

- Surface Transportation Block Group Transportation Management Area (STBG-TMA for Boise Urbanized Area)
- Transportation Alternatives Program Transportation Management Area (TAP-TMA for Boise Urbanized Area)
- Surface Transportation Block Group Urban (STBG-U for Nampa Urbanized Area)

The STBG funding policy was originally adopted by the COMPASS Board of Directors in July 2014 as part of *Communities in Motion 2040*. This policy directs STBG funding in the Boise and Nampa Urbanized Areas to be programmed (budgeted) as follows:

Specific "off-the-top" funds for each urbanized area:

- ACHD Commuteride
  - o \$220,000 in the Boise Urbanized Area
  - o \$55,000 in the Nampa Urbanized Area
- COMPASS Planning
  - o \$232,000 in the Boise Urbanized Area
  - o \$99,000 in the Nampa Urbanized Area

Percentage splits of remaining funding:

- 82% for roadway maintenance projects
- 15% for public or alternative transportation maintenance projects
- Up to 3% for planning or special projects

The funding split is calculated as a five-year rolling average to allow flexibility for a larger project in any of the categories to move forward and still remain consistent with the policy.

#### Application process:

- Applications are ranked by members of RTAC using a paired comparison method, explained in the <u>COMPASS Application Guide</u><sup>15</sup>.
- COMPASS staff presents the initial ranking results to RTAC for discussion and approval.
- COMPASS staff presents a funding plan to RTAC, based on the final rankings, for discussion and recommendation to the COMPASS Board of Directors.
- Final recommended projects are included in the draft TIP project list provided for public comment

Programs managed by other agencies (ITD, VRT, and the Local Highway Technical Assistance Council [LHTAC]) follow the managing agency's application and prioritization process. Once projects are selected for funding, they are submitted to COMPASS for inclusion in the TIP. RTAC reviews the full list of projects, including new projects and changes to existing projects, in light of public comments received, and recommends it to the COMPASS Board of Directors for approval.

Additional information about the application process and project selection can be found on the Resource Development and Funding web page 16 under the COMPASS Application Guide.

# IV. CONGESTION MANAGEMENT PROCESS

The Congestion Management Process (CMP) is the application of strategies to improve transportation system performance and reliability by reducing the adverse impacts of congestion on the movement of people and goods. It is a systematic, cyclical, and regionally accepted approach for managing congestion that provides accurate, up-to-date information on transportation system performance and identifies strategies for mitigating congestion and achieving regional transportation goals and objectives. These mitigation strategies include:

- Transportation Demand Management (TDM)
- Transportation Management and Operations (TSMO)
- Intelligent Transportation Systems (ITS)
- Transit operations improvements
- Roadway capacity improvements (when necessary)

As a part of the CMP, COMPASS uses the National Performance Management Research Data Set (NPMRDS) to develop the Congestion Management Annual Report, which shows where and when congestion is occurring in the Treasure

https://www.compassidaho.org/prodserv/resourcedev.html#appquide

http://www.compassidaho.org/prodserv/resourcedev.html#appquide

<sup>&</sup>lt;sup>15</sup> COMPASS Application Guide:

<sup>&</sup>lt;sup>16</sup> COMPASS Application Guide:

Valley. These reports are available on the <u>Congestion Management Process</u><sup>17</sup> web page. This information helps COMPASS and its member agencies prioritize projects for congested areas and select which types of congestion mitigation strategies to apply. However, the data are limited and not available for every corridor. Figure 6 shows a map of the corridors where NPMRDS data are provided, highlighting the ten most congested roadway segments in Ada and Canyon Counties for 2019.

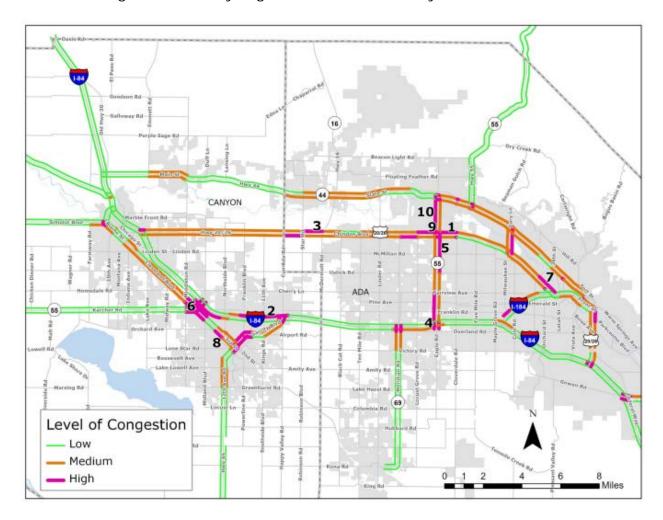

Figure 6: Top Ten Congested Tier 1 Network Segments Greater than Half a Mile (Peak period maximum, 2019)

For more details about how congestion is defined, please see the <u>Congestion Management Process</u><sup>18</sup> web page.

Another way to look at congestion is in terms of reliability. This measure is discussed in detail in Section V, TIP Achievement. Figure 7 shows the segments considered "unreliable" on the National Highway System (NHS).

<sup>&</sup>lt;sup>17</sup> Congestion Management Process: <a href="http://www.compassidaho.org/prodserv/cms-intro.htm">http://www.compassidaho.org/prodserv/cms-intro.htm</a>

<sup>&</sup>lt;sup>18</sup> Congestion Management Process: <a href="http://www.compassidaho.org/prodserv/cms-intro.htm">http://www.compassidaho.org/prodserv/cms-intro.htm</a>

Figure 7: Level of Travel Time Reliability (2019)

The CMP also serves as a mechanism for monitoring the effects transportation projects have on system efficiency after they are completed. This information is helpful for monitoring the effectiveness of specific congestion management strategies as projects are funded and constructed/implemented. These findings are published in the Congestion Management Annual Report as well.

ITD and local agencies manage specific programs to address congestion issues.

#### ITD

ITD's Safety and Capacity Program ensures projects are selected to provide safety, mobility, and economic benefits throughout the state. Projects are nominated by ITD district staff, and are then analyzed through a competitive process using the following criteria:

- Benefit/cost ratio
- Benefit as a result of the project to the gross state product
- Number of jobs created over a 20-year period as a result of the project

No single project may use more than 50% of the available funds.

Projects funded through ITD's safety and capacity programs are selected through this process. The following programs also provide a mechanism for ITD to fund projects to relieve congestion:

#### Grant Anticipation Revenue Vehicle (GARVEE)

The GARVEE program allows the state to issue bonds for large capital projects. The bonds are then repaid using future federal-aid funds. GARVEE funds were initially made available for 13 specific corridors across the state (later reduced to 12), including Interstate 84 and State Highway 16 in the Treasure Valley. The Idaho Legislature first approved the use of GARVEE funds in Idaho in 2005, then extended the GARVEE program in 2017 to allow for an additional \$300 million in bonding authority.

#### <u>Transportation Expansion and Congestion Mitigation (TECM)</u>

The Idaho Legislature also approved funding for the Transportation Expansion and Congestion Mitigation (TECM) program in 2017. This program is specifically for expansion and congestion-related projects. TECM funds use 1% of the state's sales tax (not less than \$15 million per year). In 2019, the Idaho Legislature expanded the program to include the ability to bond against these funds for more efficient use of the funds.

TECM funds are limited to the state highway system for projects selected by the Idaho Transportation Board to improve travel times and traffic flow and to mitigate traffic congestion.

#### Sales Tax Anticipated Revenue (STAR)

In 2007, the Idaho Legislature passed a bill to create a funding mechanism for developers to build large transportation projects to mitigate traffic issues stemming from new developments, and then be repaid using the new sales tax the developments create (known as "STAR Financing"). The bill was modified in 2008, expanding the accessibility of the new financing tool. ITD and local agencies may enter into a STAR financing agreement with a developer.

#### Congestion Mitigation/Air Quality (CMAQ)

ITD receives approximately \$13 million of CMAQ funds per year, of which \$3 million are set-aside for two areas in non-attainment of the National Ambient Air Quality Standard for fine particulate matter (2.5 microns in diameter or less; called "PM<sub>2.5</sub>"): the Cache Valley area in southeast Idaho and the Pinehurst area in north Idaho; neither of which is in the COMPASS planning area. ITD holds these funds, which will eventually lapse or be returned to FHWA if a rescission occurs.

The remaining \$10 million is allowed by federal regulation to be either transferred to another program or used on STBG-eligible activities. ITD chooses to use the CMAQ funds on STBG-eligible activities across the state.

# Local Agencies

#### **ACHD**

ACHD is a county-wide transportation agency, responsible for local (non-ITD) roadways and related public right-of-way in Ada County, including within the city limits of the Cities of Boise, Meridian, Eagle, Kuna, Garden City, and Star. ACHD right-of-way includes sidewalks, bikeways, roadways, bridges, storm drains, and other infrastructure dedicated to the movement of people, goods, and services.

ACHD's <u>Strategic Plan 2035</u><sup>19</sup> includes two priority focus areas: (1) maintenance and safety needs by asset category (pavement, sidewalks, bridges, traffic signals and materials, and stormwater facilities and (2) system enhancements for congestion management and relief. According to the ACHD <u>Integrated Five Year Work Plan</u><sup>20</sup> (IFYWP), system enhancements in the form of widening a roadway are only intended to reach a corridor's "buildout" – the maximum number of lanes

planned for a particular roadway. <u>ACHD's</u> <u>Master Street Map</u><sup>21</sup> defines the buildout for each road. Once a road reaches its maximum number of lanes, no more lanes will be added. Congestion may still increase as land uses develop, which may require other measures to maximize efficiency of the network.

As shown in Figure 8, ACHD's IFYWP seeks to implement its Complete Streets Policy and meet the needs of all users with the project limits in order to take the most advantage of work going on in the area.

Figure 8: ACHD's Complete Street Policy

#### City of Nampa

According to the City of Nampa's <u>Citywide Transportation Plan</u><sup>22</sup>, the city needs more than 100 capital improvement projects over the next 25 years; however, the cost of these projects is much greater than projected city revenues. Traffic levels

<sup>&</sup>lt;sup>19</sup> ACHD Strategic Plan: <a href="https://www.achdidaho.org/AboutACHD/StrategicPlan.pdf">https://www.achdidaho.org/AboutACHD/StrategicPlan.pdf</a>
<sup>20</sup> ACHD IFYWP 2021-2025:

http://achdidaho.org/Departments/PlansProjects/IFYWP\_2125draft.aspx

<sup>&</sup>lt;sup>21</sup> ACHD Master Street Map: https://www.achdidaho.org/Documents/Projects/MasterStreetMap\_11x17.pdf

have increased due to the city's large growth rate and new development. Increased traffic has led to congestion, increased travel times, and associated problems.

# **Development Impact Fees**

ACHD and the City of Nampa use impact fee programs under <u>Idaho Code 67</u> <u>Chapter 82</u><sup>23</sup>. The Idaho Development Impact Fee Act allows collection of fees from developers to cover the costs associated with the new developments. Existing transportation deficiencies are covered with other resources.

The City of Nampa adopted a new <u>Transportation Master Plan</u><sup>24</sup> in July 2019. During development of the plan, the shortage of funding was clear. One preliminary recommendation was to increase the city's impact fees, which was discussed and approved by the City Council in March 2019, and took effect in July 2019. As the city determines a project list for new funds generated through new impact fees, updates on regionally significant corridors will be included in the project list.

# Current Projects in the FY2021-2027 TIP

Approximately 21 miles of roadway and 5 intersections with high or moderate congestion, as identified in the <u>Congestion Management Annual Report</u><sup>25</sup>, are budgeted for improvements in the FY2021–2027 TIP; additional improvements are budgeted that are classified as low congestion or not classified in the Congestion Management Annual Report. The total cost of projects that are expected to improve congestion is almost \$618 million. Table 1, below, highlights all of the projects in the TIP categorized under the congestion management strategies listed above (page 11).

<sup>\*</sup>Descriptions of acronyms are available in Appendix B.

\*\*Total cost is shown in "year of expenditure" and includes all costs, not only programmed costs.

# Additional Projects

### **Local Expansion for Public Transportation**

The Cities of Boise, Eagle, and Meridian and Ada County committed to increasing their contributions to VRT to improve service and fund capital (such as buses, equipment, and facilities). The additional funding will increase service in these areas, including a new fixed-line service in Meridian. This new bus service will require a larger bus fleet; new fixed-line service is expected to begin in FY2021. The expanded service is not shown in the TIP because the funds are local, and not considered regionally significant.

#### Other Congestion-Related Projects Not Included in the TIP

The TIP does not list every project. Many projects are budgeted with local funding or may even be requirements of development. Therefore, congestion-related improvements are much more numerous than reported in the TIP. Below is an example of additional projects that agencies across the Treasure Valley have completed or planned that will help relieve congestion.

- ACHD completed improvements on three priority corridors
- Canyon Highway District No. 4 and the City of Caldwell are planning a multilane roundabout to replace a four-way stop sign at Middleton Road and Linden Road in FY2021.
- Nampa Highway District No. 1 budgeted three roundabouts in FY2021:
  - o Idaho Center Boulevard and Cherry Lane
  - Happy Valley Road and Victory Road
  - Star Road and Cherry Lane
- Local agencies throughout the Treasure Valley have budgeted funding to maintain and expand the active transportation system. Table 2 reports progress made on various measures for active transportation.

Table 2: Progress on the Active Transportation System

| COMPASS Performance<br>Measure                           | 2017         | 2018         | 2019              | 2040 Target |
|--|--------------|--------------|-------------------|-------------|

<sup>\*</sup>Measure added or modified in 2019. Targets or data for past years are currently unavailable. Grey highlight = targets or totals

Peach highlight = does not meet targets

## V. TIP ACHIEVEMENT

Each project funded in the TIP supports one or more COMPASS performance measures as identified in CIM 2040 2.0; many projects also support federally required performance measures. COMPASS identifies in the TIP which performance measure(s) each project supports. This helps ensure all projects receiving federal funds support the goals and vision of CIM 2040 2.0 and/or federally required performance measures.

Staff is constantly evaluating better ways to examine data to report the analysis in a more meaningful way. As methods are developed, staff will update this report in future versions.

#### **COMPASS Performance Measures**

CIM 2040 2.0 includes performance measures and targets addressing transportation, economic development, farmland, health, housing, land use, and open space.

Fifty-six <u>performance measures</u><sup>26</sup> were approved for CIM 2040, adopted in 2014. To streamline reporting, the 56 measures were grouped into 13 "Achievement Categories." These measures were largely carried forward into CIM 2040 2.0, adopted in 2018. Table 3 provides a matrix demonstrating how the TIP achievement categories reflect the original CIM 2040 performance measures. This section will be updated soon to reflect changes in performance measures as approved for CIM 2040 2.0.

Table 3: TIP Achievement Categories

| TIP<br>Achievement<br>Category                | Example of Type of Projects  | CIM 2040 2.0<br>Performance<br>Measures |
|---|--|---|
| Maintenance                                   | <ul> <li>Projects to maintain the current transportation<br/>system (roadway chip seals, rehabilitation, or<br/>replacing a public transportation vehicle)</li> </ul>        | *                                       |
| Transportation<br>Infrastructure              | <ul><li>Bridge repair or rebuild</li><li>Bus or van replacement</li><li>Increase bus service</li></ul>   | 1-3, 10-13                              |
| Congestion<br>Reduction/System<br>Reliability | <ul> <li>Add park and ride spaces</li> <li>Increase vanpool service</li> <li>Increase opportunities to walk and ride bicycles</li> </ul>                                     | 4-9, 26-29                              |
| Freight Movement and Economic Vitality        | Safety or capacity improvements to decrease congestion on freight routes   | 14                                      |
| Transportation<br>Safety                      | <ul> <li>Safety projects for autos, sidewalks, bicycle<br/>pathways, or public transportation services or<br/>facilities (such as bus stops or transfer stations)</li> </ul> | 15-24                                   |
| Environmental<br>Sustainability               | <ul> <li>Additional public transportation service</li> <li>New sidewalks or pathways</li> <li>Signalization improvements to improve traffic flow</li> </ul>                  | 25                                      |
| Land Use                                      | Improve quality of living in downtowns or in-fill areas  | 31                                      |

<sup>&</sup>lt;sup>26</sup> COMPASS Performance Measures:

\_

| TIP<br>Achievement<br>Category  | Example of Type of Projects  | CIM 2040 2.0<br>Performance<br>Measures |
|---|--|---|
| Housing   | <ul> <li>Widen a medium-to-high congested road to increase<br/>access to employment opportunities</li> </ul>                     | 38                                      |
| Community<br>Infrastructure   | New sidewalks in urban areas   | 41-42                                   |
| Health  | <ul> <li>Specifically add connectivity and accessibility option<br/>to parks, schools, or grocery stores</li> </ul>              | 44-47                                   |
| Open Space  | <ul> <li>New or improved connections or access to parks and<br/>pathway amenities, such as the greenbelt</li> </ul>              | 50-52                                   |
| Farmland  • Maintaining a roadway, but not purchasing prime farm land to widen the road |  | 55-56                                   |
| Support   | <ul><li>Planning projects</li><li>Staff salary</li><li>Technology improvement</li><li>Public transportation operations</li></ul> | **                                      |

<sup>\*</sup>No performance measures are established for this category, as measurements are not consistent across the region; however, maintaining our current transportation system is a high priority for the region. COMPASS will continue to work toward establishing performance measures for maintenance activities.

The criteria used to determine how projects in the TIP align with the TIP achievement categories are shown in Table 4.

Table 4: Criteria for TIP Achievement Categories

| TIP<br>Achievement<br>Category                 | Criteria*   |
|--|---|
| Maintenance**                                  | <ul> <li>Does the project: <ul> <li>Improve a roadway using preventive maintenance techniques such as an overlay, thin lift overlay, or micro seal?</li> <li>Maintain vehicles for public transportation (such as oil changes, tires, or engine overhaul)?</li> <li>Replace a vehicle for public transportation?</li> </ul> </li> </ul>                                       |
| Transportation<br>Infrastructure               | <ul> <li>Does the project:         <ul> <li>Improve a "functionally obsolete" bridge back to functional condition? (PM 1)</li> <li>Improve a "structurally deficient" bridge back to quality condition? (PM 2)</li> <li>Improve public transportation vehicles to extend vehicle life (PM 3) or provide new public transportation vehicles? (PM 10-13)</li> </ul> </li> </ul> |
| Congestion<br>Reduction/<br>System Reliability | <ul> <li>Does the project:</li> <li>Improve capacity on the transportation network? (PM 4-6, 9)</li> <li>Add park and ride spaces? (PM 7)</li> <li>Add vanpool vehicles? (PM 8)</li> <li>Add a bus route or improve quality of service? (PM 10-13)</li> <li>Add, improve, or plan for bicycle or pedestrian infrastructure? (PM 26-29)</li> </ul>                             |
| Freight Movement<br>and Economic<br>Vitality   | Does the project:  • Improve capacity or travel time on a designated freight corridor? (PM 14)  |
| Transportation<br>Safety                       | Does the project:  • Propose a reduction in the number of automobile, bicycle, pedestrian, or public transportation related crashes? (PM 15-24)   |

<sup>\*\*</sup> No performance measures are established for this category. These types of projects provide the background to improve performance in the future through planning and operations of the system.

| TIP<br>Achievement<br>Category  | Criteria*   |  |  |  |  |
|---------------------------------|---|--|--|--|--|
| Environmental<br>Sustainability | <ul> <li>Does the project reduce vehicle emissions by:</li> <li>Increasing public transportation (including vanpool) options? (PM 25)</li> <li>Increasing bicycle and pedestrian infrastructure? (PM 25)</li> <li>Adding signalization or traffic timing, which improves traffic flow? (PM 25)</li> </ul> |  |  |  |  |
| Land Use                        | <ul> <li>Is the project located in or improve multimodal access to:</li> <li>A designed downtown area? (PM 31)</li> <li>A current or designated Major Activity Center? (PM 33)</li> <li>An infill area<sup>27</sup> (see map)? (PM 34)</li> </ul>   |  |  |  |  |
| Housing                         | <ul> <li>Does the project increase access to additional employment by:</li> <li>Improving congestion on a roadway considered "medium congestion" or "high congestion" based on the most recent travel time index<sup>28</sup>? (PM 38)</li> </ul>   |  |  |  |  |
| Community<br>Infrastructure     | Is the project:  • Within city limits? (PM 41)  • Within a city area of impact? (PM 42)   |  |  |  |  |
| Health                          | Does the project improve bicycle and/or pedestrian infrastructure:  • Within ¼-mile of a park, school, or grocery store? (PM 44-47)   |  |  |  |  |
| Open Space                      | Does the project improve bicycle or pedestrian access to or build:  • A trail and/or pathway <sup>29</sup> ? (PM 50)  • The greenbelt? (PM 51)  • Parks or open space? (PM 53)  |  |  |  |  |
| Farmland                        | Does the project:  • Include widening roadways adjacent to farmland? (PM 56)  |  |  |  |  |
| Support***                      | Does the project:     • Provide support, such as planning, staff salaries, or operations of public transportation?  |  |  |  |  |

<sup>\*</sup>PM = performance measure

To further report on the support of CIM 2040 2.0 performance measures, Table 5 provides an analysis of the distribution of funding and number of projects across all TIP achievement categories. A project may meet the goals of up to five different performance measures. These measures are not weighted, but are divided based on the number of performance measures for each project. For example, if a project meets the goals of two performance measures, 50% of the project cost is reported for each measure.

<sup>\*\*</sup>No performance measures are established for this category, as measurements are not consistent across the region; however, maintaining our current transportation system is a high priority for the region. COMPASS will continue to work toward establishing performance measures for maintenance activities.

<sup>\*\*\*</sup> No performance measures are established for this category. These types of projects provide the background to improve performance in the future through planning and operations of the system.

Table 5: Analysis of TIP Achievement (as of September 2020)

| TIP Achievement Category                | Number of<br>Projects* | Dollar<br>Amount** | Percentage of<br>Dollar Amount |  |
|---|------------------------|--------------------|--------------------------------|--|
| Maintenance                             | 47                     | \$152,365,000      | 23.74%                         |  |
| Transportation Infrastructure           | 17                     | \$23,848,000       | 3.72%                          |  |
| Congestion Reduction/System Reliability | 55                     | \$132,496,000      | 20.64%                         |  |
| Freight Movement and Economic Vitality  | 23                     | \$69,594,000       | 10.84%                         |  |
| Transportation Safety                   | 65                     | \$102,656,000      | 15.99%                         |  |
| Environmental Sustainability            | 15                     | \$8,899,000        | 1.39%                          |  |
| Land Use                                | 4                      | \$745,000          | 0.12%                          |  |
| Housing                                 | 15                     | \$17,966,000       | 2.80%                          |  |
| Community Infrastructure                | 51                     | \$64,436,000       | 10.04%                         |  |
| Health                                  | 24                     | \$18,868,000       | 2.94%                          |  |
| Open Space                              | 8                      | \$3,912,000        | 0.61%                          |  |
| Farmland                                | 11                     | \$7,473,000        | 1.16%                          |  |
| Support                                 | 24                     | \$38,655,000       | 6.02%                          |  |
|   | Total                  | \$641,913,000      | 100.00%                        |  |

<sup>\*</sup>Most projects are reported in multiple TIP achievement categories; therefore, the sum of the total number of projects would be skewed, and is not reported.

#### **Federal Performance Measures**

The last two federal transportation authorization bills, the *Moving Ahead for Progress in the 21st Century* (MAP-21) and *Fixing America's Surface Transportation* (FAST) Acts, placed an emphasis on performance-based planning and programming. MPOs have the option to either create regional targets or support the statewide targets. The COMPASS Board of Directors chose to assist ITD in obtaining federal targets on a statewide basis, rather than to set specific regional targets. Projects that help improve conditions to meet statewide targets are represented in the TIP project list with icons. Table 6 shows the federal target areas and deadlines for reporting, with currently-approved targets highlighted in gray.

<sup>\*\*</sup>Totals may not sum due to rounding. Reported in year of expenditure costs.

Table 6: Federal Performance Measures

| Icon in TIP<br>Project List | Targets   | Beginning MPO<br>Target<br>Deadline<br>(updates) | Reporting<br>Deadline |  |
|-----------------------------|---|--|-----------------------|--|

| <b>(3)</b>                  | Public Transportation Safety                              | December 2020<br>(annually)                      | June 2021             |  |
| 屜                           | Congestion Mitigation Air Quality – Traffic<br>Congestion | November 2022<br>(biennially)                    | May 2023              |  |

Approved targets are provided below, with analysis regarding projected outcomes. It is important to note that support of statewide targets does NOT mean that COMPASS is required to address a regional "share" of the statewide goals; that is, COMPASS does not have specific goals for Ada and Canyon Counties. It simply means that COMPASS is supporting ITD's statewide efforts. However, when available, regional data are shown for informational purposes.

Additional analysis is available in Appendix D.

On December 18, 2017, the COMPASS Board of Directors adopted a position to support the statewide safety targets established by ITD.

RTAC recommended updated statewide safety targets on November 20, 2019, which seek to improve upon the benchmark five-year statewide average (2013-2017) (Table 7), taking into account population growth trends. The COMPASS Board of Directors approved the safety targets on December 16, 2019. While the current approved target (grey) is for the years 2015-2019, projects in the FY2021 -2027 TIP will help ITD reach future targets (shown through 2022, below).

Table 7: Idaho Statewide Safety Targets, approved December 2019

| Idaho   | Benchmark | FY2020<br>Actual | Target<br>FY2021 | Target<br>FY2022 | Target<br>FY2023 | Target<br>FY2024 |
|---|-----------|------------------|------------------|------------------|------------------|------------------|
|   | 2013-2017 | 2014-<br>2018    | 2015-<br>2019    | 2016-<br>2020    | 2017-<br>2021    | 2018-<br>2022    |
| Fatalities                                      | 223       | 243              | 249              | 247              | 245              | 240              |
| Serious Injuries                                | 1,293     | 1,290            | 1,290            | 1,287            | 1,285            | 1,283            |

<sup>\*</sup>VMT = vehicle miles traveled per 100 million miles Grey highlight = current target

Projects with an emphasis on safety in the FY2021-2027 TIP are shown in Table 8. Only projects shown between FY2021 and FY2025 are included in the analysis, as projects beyond FY2025 are considered preliminary. An analysis is provided regarding how each project is expected to decrease overall crashes, as this is the finest level of analysis staff is able to determine at this time. Reduction in overall crashes based on measures reported in the Crash Modification Factors (CMF) Clearinghouse, which contains predictive data based on studies of similar projects across the nation, will result in reduction of fatalities and serious injuries as well, which are the actual targets. Not every safety measure has predictive data to determine changes in crash rates.

Overall, projects that emphasize safety in the FY2021-2027 TIP are projected to prevent 247 crashes in Ada and Canyon Counties. Almost \$413 million is budgeted towards projects with safety benefits.

<sup>\*</sup>Only safety projects with construction in the first five years of the TIP are included in this table.

<sup>\*\*</sup>Only safety improvements that have Crash Modification Factors applied are analyzed here.

<sup>\*\*\*</sup>K= Fatal crash; A= Serious injury; B= Minor injury; C= Possible injury; O= Property damage "All" crashes = K+A+B+C+O

<sup>\*\*\*\*</sup>Based on crash history. Information is not available for every safety-related project.

#### Transit Asset Management

On August 26, 2019, the COMPASS Board of Directors adopted a position to support regional transit asset management targets for "state of good repair" as described in VRT's Transit Asset Management Plan.

RTAC recommended updated statewide safety targets on May 27, 2020, which seek to improve upon the condition of transit assets in the Treasure Valley. The COMPASS Board of Directors approved the transit asset management targets on August 17, 2020 (Table 9).

Table 9: VRT - Transit Asset Management Targets

| Asset<br>Category | Performance Measure   | FY2020<br>Target | FY2020<br>Actual | Variance | FY2021<br>Target |
|-------------------|---|------------------|------------------|----------|------------------|
| Rolling Stock     | Age - % of revenue vehicles that have met                     | <24.67%          | 27.59%*          | -2.92%*  | <24.67%          |
| Equipment         | or exceeded their Useful<br>Life Benchmark (ULB)              | <12.70%          | 5.00%            | 7.70%    | <12.70%          |
| Facilities        | Condition - % of facilities with a condition rating below 3.0 | <42.86%          | 37.50%           | 5.36%    | <42.86%          |

<sup>\*</sup>Corrected from version provided to the COMPASS Board.

Grey highlight = current target Green highlight = meets targets

Peach highlight = does not meet target

In January 2019, the VRT Board of Directors approved a Transit Asset Management Plan (a "TAM Plan"), with an overall goal for all assets to reach a minimum score of at least 2.5 (on a scale of 0-5), bringing the asset inventory to an acceptable level of condition. VRT estimates the total cost of bringing all those assets into a state of good repair is approximately \$36 million. The FY2021-2027 TIP includes \$14.4 million budgeted to improve or add capital assets in Ada and Canyon Counties between FY2021 and 2024, as the TAM Plan is a four-year plan. With these programmed funds, VRT will address approximately half of the need for transit asset replacement below the minimum 2.5 score. Although these investments will address essentially all assets with a score of less than 1.5, it still leaves approximately \$17 million in deferred transit asset replacement.

VRT leverages local dollars with federal funds to address capital needs in both the large and small urban areas. In the past, VRT has not been able to secure enough local match in the small urban area to access all the federal funds available. Increasing local match for in the small urban area will be necessary to address the transit assets below their TAM score in the small urban area.

Projects listed in Table 10 emphasize transit asset management (state of good repair) included in the FY2021-2027 TIP. The costs are shown only for FY2021-

2024, as the TAM Plan is based on a four-year horizon. The TAM Plan is posted on VRT's website<sup>31</sup> (under Resources).

#### Pavement Condition

On August 20, 2018, the COMPASS Board of Directors adopted a position to support statewide pavement condition targets established by ITD, which is to maintain a certain percentage of pavement on the NHS in "good" condition, as well as maintain a minimum percentage of pavement in "poor" condition (Table 11).

Peach highlight = does not meet targets

2017 pavement conditions are shown on an interactive map called the COMPASS TIP Viewer found on the COMPASS website<sup>32</sup>. Figure 9, below, is an excerpt of this map showing segments that are in good (green), fair (yellow), or poor (red) condition. As updated information is available, this section will be updated.

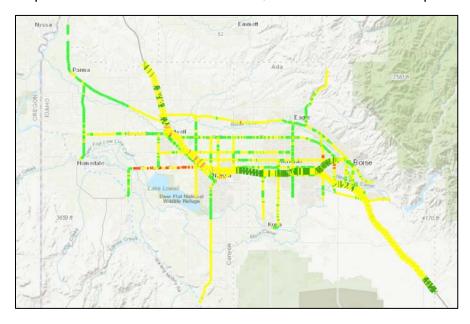

Figure 9: 2017 Interstate and Non-Interstate Pavement Condition, NHS

<sup>&</sup>lt;sup>32</sup> COMPASS TIP Viewer:

Pavement condition targets aim to keep a certain percentage of pavement in good condition. It is less costly to keep roads in good condition than to repair roads in poor condition. Costs increase exponentially when more involved treatments are needed to repair them. Figure 10 provides general information about how pavement management, such as chip sealing and payment overlays, save money over time.

# **Prevention Saves Costs**

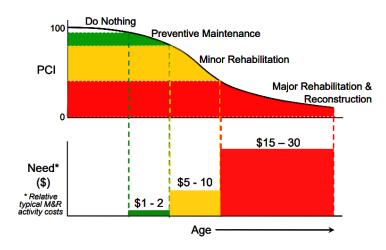

Figure 10: Pavement Asset Management Cycle (graphic from David Hein, PE, ARA, used with permission)

COMPASS currently does not have the tools to estimate exactly how projects will accomplish overall pavement condition goals. However, projects are selected by ITD and local agencies to strategically produce the best treatment for dollars available. Many projects shown in the TIP are "placeholders" for pavement management work. Since projects in the TIP start five years or more from the date they are added, the local agency selects the segments of roadway that are most appropriate for the funding when the design phase begins. Through projects in the FY2021-2027 TIP between FY2021 and FY2025, as projects beyond the first five years are considered to be "illustrative" (Table 12), local agencies plan to spend almost \$50 million on pavement condition improvements on non-interstate local roadways and ITD plans to spend almost \$302 million on interstate and non-interstate pavement condition improvements. In addition, local agencies also plan to fund maintenance projects with local funds.

Even with almost \$50 million budgeted for non-interstate local pavement improvements in the TIP and additional local funds for pavement improvements, local agencies report deferred maintenance estimated at \$60 million in Ada and Canyon Counties.

Table 12: Analysis of Projects that Improve Pavement Condition on the NHS, FY2021-2025 (as of September 2020)

| Key<br>Number | Project   | Roadway<br>Type | Total Project<br>Cost |

| Total         |  |                 | \$351,602,000         |

<sup>\*</sup>The "Capital Maintenance" and "Roadway and ADA Improvement" projects listed above may not have specific segments identified. Some segments may not be on the NHS.

## Bridge Condition

On August 20, 2018, the COMPASS Board of Directors adopted a position to support statewide bridge condition targets established by ITD, which aim to improve or maintain a certain percentage of bridges in "good" condition and a minimum percentage of bridges in "poor" condition on the NHS (Table 13).

Table 13: FY2018 and FY2019 Bridge Conditions and FY2022 Targets

| Bridge<br>Condition | FY2018<br>Regional<br>Condition<br>Percentage | FY2018<br>Statewide<br>Condition<br>Percentage | FY2019<br>Regional<br>Condition<br>Percentage | FY2019<br>Statewide<br>Condition<br>Percentage | FY2022<br>Target |
|---------------------|---|--|---|--|------------------|
| Good                | 38.7%   | 18.9%  | 29.09%  | 17.75%   | At least 19%     |
| Fair                | 60.7%   | 78.8%  | 70.46%  | 77.95%   | N/A              |
| Poor                | 0.6%  | 2.3%   | 0.45%   | 4.30%  | <3%              |
| Total               | 100%  | 100%   | 100%  | 100%   |                  |

Grey highlight = targets or totals Green highlight = meets targets

Peach highlight = does not meet targets

2018 bridge conditions are shown on an interactive map called the COMPASS TIP Viewer found on the COMPASS <u>website</u><sup>33</sup>. The map is not shown in this report, as the scale is difficult to see in a small print version.

Bridge condition targets aim to improve or maintain a certain percentage of bridges in good condition on the NHS. In the COMPASS planning area, only two bridges on the NHS are considered to be in poor condition: 10<sup>th</sup> Avenue Bridge in Caldwell and the I-84, Blacks Creek Road Interchange. These two bridges were both funded in FY2019 and are currently under construction for full replacement. The Snake River Bridge, on the southern edge of the COMPASS planning area, is also under

https://compassidaho.maps.arcgis.com/apps/Cascade/index.html?appid=b0a54a77f8d047aa 9b8b479347cc0463 Contact COMPASS staff if you need assistance at 208-855-2558.

<sup>\*\*</sup>The I-84, Franklin Interchange to Karcher Interchange, Canyon County includes rebuilding existing lanes and also widening the interstate to add one additional lane in each direction.

<sup>&</sup>lt;sup>33</sup> COMPASS TIP Viewer:

construction for full replacement. See Table 14 for a list of bridge projects in the TIP.

<sup>\*</sup>Project cost includes multiple segments; some of which are outside the COMPASS planning area.

Level of Travel Time Reliability

On August 20, 2018, the COMPASS Board of Directors adopted a position to support statewide level of travel time reliability targets established by ITD, which are to improve travel time reliability on the NHS (note that this does not mean to improve travel times, but to improve the *consistency* of travel times) (Table 15).

Table 15: FY2018 and FY2019 Level of Travel Time Reliability and FY2022 Targets

| Interstate   |                                      |  |   |  |                  |  |  |
|--------------|--------------------------------------|--|---|--|------------------|--|--|
| Condition    | FY2018 Regional Condition Percentage | FY2018<br>Statewide<br>Condition<br>Percentage | FY2019<br>Regional<br>Condition<br>Percentage | FY2019<br>Statewide<br>Condition<br>Percentage | FY2022<br>Target |  |  |
| Reliable     | 92.70%                               | 97.90%   | 90.40%  | 97.20%   | > 90%            |  |  |
| Not Reliable | 7.30%                                | 2.10%  | 9.60%   | 2.80%  |                  |  |  |

Grey highlight = targets or totals Green highlight = meets targets

Travel time reliability provides a more complete look at the on-the-ground experience for the road user than simply reporting congestion, as travel times can vary greatly day-to-day (Figure 11). Congestion of roadways and other factors, such as weather, events, or construction, often makes it difficult to predict how long it will take to travel from one destination to another. One day, it may take 20 minutes to travel from the City of Nampa to the City of Boise, and another day, it may take an hour. The overall goal of level of travel time reliability targets is to make travel times *predictable*. The intent of these targets is not necessarily to decrease the amount of time it takes to travel, although many of the projects will do just that, but to make travel times as consistent and predictable as possible.

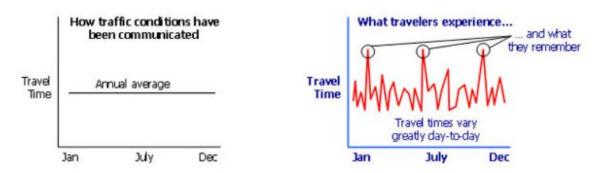

Figure 11: Reliability Measures Capture the Benefits of Traffic Management, from FHWA's Performance Measure website

Level of travel time reliability is defined as the ratio of the longer travel times (80th percentile) to a "normal" travel time (50th percentile), using data from the Federal Highway Administration's NPMRDS, or equivalent. Data are collected in 15-minute segments during all time periods between 6:00 a.m. and 8:00 p.m. local time.

Travel time reliability measures how consistent travel times are from one point to another, from one day to the next. To determine reliability, data on travel time are examined to see how they vary over time. If the difference between the normal travel time (50th percentile) and the longer travel time (80th percentile time) is greater than 50%, then the segment is unreliable.

Improvements in the reliability of the NHS due to projects programmed through the TIP will be reported in the Congestion Management Annual Report, discussed in Section IV. A sample of the measurement is provided in Figure 12.

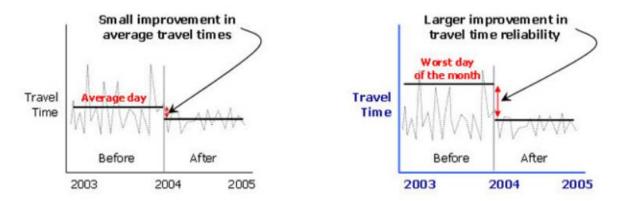

Figure 12: Sample Improvements in Average Travel Times, from FHWA's Performance Measure website

The 2019 level of travel time reliability is shown on an interactive map called the COMPASS TIP Viewer found on the COMPASS website<sup>34</sup>. Figure 13, below, is an excerpt of this map showing segments (by direction) that are reliable (gray) and not reliable (red).

<sup>\*</sup>Continuous Flow Interchange

Truck Travel Time Reliability (Freight Movement)

On August 20, 2018, the COMPASS Board of Directors adopted a position to support freight movements through statewide level of truck travel time reliability targets established by ITD, which is to improve upon truck travel time reliability on the interstate system (note that this does not mean to *improve* travel time, but to improve the *consistency* of travel times — similar to the level of travel time reliability above, but specific to truck travel on Interstate 84 and Interstate 184) (Table 17). The overall goal of truck travel time reliability is to make freight travel more predictable. Delivery of goods and services in a timely manner is important to the success of the freight industry.

Table 17: FY2017 and FY2019 Truck Travel Time Reliability and FY2018 Target

| Interstate |                         |                          |                         |                          |        |  |  |  |  |
|------------|-------------------------|--------------------------|-------------------------|--------------------------|--------|--|--|--|--|
| Condition  | FY2017                  | FY2017                   | FY2019                  | FY2019                   | FY2018 |  |  |  |  |
|            | Regional<br>Reliability | Statewide<br>Reliability | Regional<br>Reliability | Statewide<br>Reliability | Target |  |  |  |  |
|            | Score                   | Score                    | Score                   | Score                    |        |  |  |  |  |
| Reliable   | 1.47                    | 1.17                     | 1.50                    | 1.20                     | <1.3   |  |  |  |  |

Grey highlight = targets or totals

Peach highlight = does not meet targets

2019 truck travel time reliability is shown visually on an interactive map called the COMPASS TIP Viewer found on the COMPASS website<sup>35</sup>. Figure 14, below, is an excerpt of this map showing segments that are considered fair (orange) and poor (pink) in regards to truck travel time reliability on the interstate system.

Figure 14: 2019 Truck Travel Time Reliability on the Interstate

The target of less than 1.3 means it would take less than 30% longer at a highly congested level of service to travel through that same segment. The target of less than 1.3 is the statewide target along Interstate 84. Regional travel through Ada and Canyon Counties is likely to score higher due to higher rate of congestion in the area.

Freight movement is assessed by the Truck Travel Time Reliability (TTTR) Index. Reporting is divided into five periods: morning peak, midday, and afternoon peak Mondays through Fridays; weekends; and overnights for all days. The TTTR ratio is similar to the level of travel time reliability described earlier, but instead of the 80th percentile, truck travel time reliability is assessed by dividing the 95th percentile

https://compassidaho.maps.arcgis.com/apps/Cascade/index.html?appid=b0a54a77f8d047aa 9b8b479347cc0463 Contact COMPASS staff if you need assistance at 208-855-2558.

<sup>&</sup>lt;sup>35</sup> COMPASS TIP Viewer:

time by the normal time (50th percentile) for each segment. See Table 18 for an example of how the index works.

Table 18: Truck Travel Time Reliability (TTTR) Index Example

| Segment: Longer Travel Time (95 <sup>th</sup> ) divided by Normal Travel Time (50 <sup>th</sup> ) = $\#$ seconds $\div$ by $\#$ seconds = TTTR |            |                             |  |  |  |  |  |
|--|------------|-----------------------------|--|--|--|--|--|
|  | 6am – 10am | TTTR=72 sec ÷ 50 sec = 1.44 |  |  |  |  |  |
| Monday - Friday  | 10am – 4pm | TTTR = 1.39                 |  |  |  |  |  |
|  | 4pm – 8pm  | TTTR = 1.49                 |  |  |  |  |  |
| Weekends   | 6am – 8pm  | TTTR = 1.31                 |  |  |  |  |  |
| Overnight  | 8pm – 6am  | TTTR = 1.20                 |  |  |  |  |  |
| Maximu   | 1.49       |                             |  |  |  |  |  |
| Moasuro: TTTP Indov  |            |                             |  |  |  |  |  |

Measure: TTTR Index

- Length x Max TTTR = Length-weighted TTTR
- $\Sigma$  (All segment length weighted TTTR)  $\div \Sigma$  (All segment lengths)

This example segment does not meet the target of less than 1.3; therefore it is considered "not reliable."

More than \$183 million is budgeted to improve truck travel time reliability in Canyon County on Interstate 84 in the FY2021-2027 TIP (Table 19). Within the funded projects, several segments currently not performing well will be widened, which is expected to increase the reliability of these segments, and could possibly improve reliability on adjacent segments of the interstate as well. As these projects are completed, COMPASS will report on how truck travel times and the reliability of travel on Interstate 84 change in the Congestion Management Annual Report <sup>36</sup>.

The widening of Interstate 84 from the Karcher Road Interchange to Franklin Boulevard in the City of Nampa is currently under construction, funded in FY2019-2020 (therefore, not included in the FY2021-2027 TIP).

Table 19: Analysis of Projects that Improve Truck Travel Time Reliability on the Interstate in the FY2021-2027 TIP (as of September 2020)

| Key<br>Number | Project*  | Treatment | Total Project<br>Cost |
|---------------|---|-----------|-----------------------|
| 22196         | I-84, Franklin Interchange to Karcher Interchange,<br>Canyon County | Widen     | \$183,344,000         |
| 22619         | I-84, Ustick Road Overpass, Canyon County                           | Widen     | \$10,349,000          |
| Total         |   |           | \$183,344,000         |

<sup>\*</sup>Projects include some segments that perform within the target.

36 Congestion Management Process: http://www.compassidaho.org/prodserv/cms-intro.htm

CMAQ – Emissions
On August 20, 2018, the COMPASS Board of Directors adopted a position to support the CMAQ – emissions target established by ITD. The ITD target is zero, as ITD does not claim "emission reductions" when CMAQ funds are used on a project; therefore, no changes to vehicles emissions as a result of this funding are reported. See page 14 for more information on how CMAQ funds are used in Idaho.

## VI. AIR QUALITY CONFORMITY

The Clean Air Act mandates that any transportation project using federal funds or deemed to be "regionally significant" in nonattainment or maintenance areas, as defined by the Interagency Consultation Committee, cannot contribute to a degradation of air quality. Thus, transportation plans must "conform" to air quality plans. Transportation conformity is demonstrated in a nonattainment or maintenance area when it can be shown, within the applicable guidelines and regulations, that planned transportation projects listed in a transportation program (e.g., a TIP) or plan will not cause or contribute to exceedances of the U.S. Environmental Protection Agency's (EPA's) health- based air quality standards. A finding of nonconformity would prevent the implementation of certain federally funded and/or regionally significant transportation projects.

The air quality conformity demonstration finds that the projects contained in the DRAFT FY2021-2027 TIP meet air quality conformity requirements for Northern Ada County.

The Northern Ada County PM10 State Implementation Plan, Maintenance Plan: Ten-Year Update<sup>37</sup> contains motor vehicle emissions budgets for three pollutants: PM<sub>10</sub>, oxides of nitrogen, and volatile organic compounds. Emissions budget tests, as required by 40 Code of Federal Regulations (CFR) 93.118, demonstrate conformity of the FY2021-2027 draft TIP. The Northern Ada County Air Quality Maintenance Area Second 10-Year Carbon Monoxide Limited Maintenance Plan<sup>38</sup> does not contain any motor vehicle emissions budgets. However, COMPASS conducts a build versus no build carbon monoxide emissions analysis per the carbon monoxide limited maintenance plan in accordance with EPA's limited maintenance plan option.

The complete air quality conformity demonstration, *Conformity Demonstration for the FY2021-2027 Regional Transportation Improvement Program*, Report Number 02-2021, is provided under separate cover and can be found <u>online</u>.<sup>39</sup>

<sup>&</sup>lt;sup>37</sup> Northern Ada County Maintenance Plan: <a href="https://www.deq.idaho.gov/media/971222-ada\_county\_pm10\_sip\_0213.pdf">https://www.deq.idaho.gov/media/971222-ada\_county\_pm10\_sip\_0213.pdf</a>

<sup>&</sup>lt;sup>38</sup> Northern Ada County Second 10-Year Carbon Monoxide Limited Maintenance Plan: <a href="https://www.compassidaho.org/documents/planning/studies/909866-ada-county-comaintenance-plan-2011.pdf">https://www.compassidaho.org/documents/planning/studies/909866-ada-county-comaintenance-plan-2011.pdf</a>

<sup>&</sup>lt;sup>39</sup> Air Quality Conformity Demonstration: <a href="http://www.compassidaho.org/prodserv/aq-demo.htm">http://www.compassidaho.org/prodserv/aq-demo.htm</a>.

## VII. REGIONALLY SIGNIFICANT PROJECTS

The TIP includes all federally funded and "regionally significant" projects, regardless of funding source, in COMPASS' planning area. If federal funds are not used on the project, the listing is considered more informational in nature and may not include as much detail or review as a federally-funded project.

40 CFR 93.101 defines a regionally significant project as:

... a transportation project (other than an exempt project) that is on a facility which serves regional transportation needs (such as access to and from the area outside of the region, major activity centers in the region, major planned developments such as new retail malls, sports complexes, etc., or transportation terminals as well as most terminals themselves) and would normally be included in the modeling of a metropolitan area's transportation network, including at a minimum all principal arterial highways and all fixed guideway transit facilities that offer an alternative to regional highway travel.

# VIII. LOCAL PLANNING ACTIVITIES

The TIP was developed in accordance with the area's development goals and priorities as specified in the long-range transportation plans. The following planning documents were consulted in preparing this TIP:

2020-2024 Integrated Five-Year Work Plan, ACHD, September 2020.

2040 Long-Range Transportation Plan, ITD, December 2019.

ACHD's 2016 Capital Improvement Plan, ACHD, August 2016.

Blueprint Boise, City of Boise, November 2011.

Campus Master Plan, Boise State University, January 2016.

Communities in Motion 2040 2.0, regional long-range transportation plan for Ada and Canyon Counties, COMPASS, December 2018.

Downtown Boise Mobility Study, VRT, October 2005.

Draft 2021-2025 Integrated Five-Year Work Plan, ACHD, June 2020.

Draft FY21 to FY27 Idaho Transportation Investment Program (ITIP), Draft for Public Comment, ITD, July 2020.

Idaho Public Transportation Plan, ITD, April 2018.

Northern Ada County Air Quality Maintenance Area Second 10-Year Carbon Monoxide Limited Maintenance Plan, Idaho Department of Environmental Quality (DEQ), September 2012.

Northern Ada County PM<sub>10</sub> State Implementation Plan, Maintenance Plan: Ten-Year Update, DEQ, March 2013<sup>40</sup>.

State Street Corridor Strategic Plan, ACHD and City of Boise, February 2004.

State Street Corridor Transit Oriented Development Policy Guidelines, State Street Corridor partners, April 2008.

State Street Transit and Traffic Operational Plan, Implementation Plan, ACHD, City of Boise, and Valley Regional Transit, June 2011.

Treasure Valley Transportation System: Operations, Management, and ITS, created by the IBI Group, March 2014.

ValleyConnect 2.0, VRT, April 2018.

## IX. FINANCIAL CONSTRAINT

The TIP is a financially driven document. Financial constraint is required by federal law and guidance, meaning that the TIP can only be programmed to the level that funding is available. In addition, financial constraint must show that agencies receiving the funds programmed through this document are able to continually maintain and operate the transportation systems for which they receive funding. Based on COMPASS' analyses, funding is reasonably assumed to be available for the projects contained in this document.

COMPASS uses ITD's funding assumptions to estimate available funds for highways and public transportation programs.

47

<sup>&</sup>lt;sup>40</sup> On May 17, 2013, EPA announced receipt of the maintenance plan and issued determination of adequacy of the motor vehicle emission budgets for transportation conformity purposes.

#### A. Highway Funding Assumptions

Highway funding assumptions for individual funding sources are based on apportionment levels provided in the FAST Act and from ITD forecasts of state funding levels. Actual funding levels are often not known until after the beginning of each fiscal year (October 1). Therefore, assumptions are made regarding future funding to allow uninterrupted development of projects. The following list of highway assumptions and guidelines is used to develop the highway funding levels shown in the TIP.

# 1. Federal-Aid Funding Assumptions

Program funding levels for FY2020 are reflective of apportionments in the FAST Act. FY2021 through FY2027 funding levels are flat-lined based on FY2020 apportionments, as the FAST Act expires in FY2020.

Funds in the list of projects (Appendix A) are shown in year-of-expenditure dollars, meaning the costs are inflated to reflect anticipated costs based on the year the project will occur. Inflation is estimated at 2% annually.

Obligation authority is assumed to be equal to 100% of estimated apportionments. Funding forecasts do not include year-end redistribution or obligation authority not used by other states.

## 2. State Funding Assumptions

Estimates of state funds available for capital construction take into account projected revenues, the availability of state matching funds for federal aid, and other operational needs not shown in ITD's funding program.

The amount of state highway funding can be impacted by legislation passed in any given year. Two bills were passed in FY2020 that affect transportation funding.

House Bill 334 increases funding for the local bridge inspection account by \$75,000 annually to \$175,000. While this legislation does not impact revenue, it does reduce the amount available for distribution from the Highway Distribution Account.

Senate Bill 1379 uses existing law enforcement and ITD resources to inspect commercial vehicles for dyed fuel. This should increase revenue from special fuel taxes because it will act as a deterrent to those drivers who illegally use dyed diesel on highways.

Senate Bill 1201, passed in the FY2019 Legislative session, removes the Idaho State Police from the Highway Distribution Account distribution formula over a period of five years beginning with the FY2022 appropriation. This action will result in an additional \$1.9 million per year for a total of approximately \$11 million to the State Highway Account when the transition is complete in FY2026.

The estimated state funding for FY2021 through FY2027 for highway capital construction ranges from \$106,200,000 to \$142,500,000 annually.

## 3. GARVEE Bonding Assumptions

ITD uses GARVEE bonds to help fund transportation projects. These bonds do not pledge the full faith and credit of the state; ITD uses federal highway revenue to repay them. Idaho Code allows no more than 30% of ITD's federal apportionment to be used for debt service.

Prior to FY2017, the Idaho Legislature authorized ITD to secure financing to fund \$857,000,000 of infrastructure improvements in the GARVEE program. Projects funded by those pre-FY2017 authorizations were completed and closed out during FY2016.

In March 2017, the Idaho Legislature authorized the issuance of up to \$300,000,000 in new GARVEE bonds to fund additional projects to be selected by the Idaho Transportation Board.

Estimated debt service is approximately \$69,500,000 annually, including the original \$857,000,000 and the new \$300,000,000 legislative authorization. Approximately \$64,000,000 of the debt service are federal funds and approximately \$5,500,000 are state matching funds.

#### B. Public Transportation Funding Assumptions

ITD is the direct recipient of FTA funding for rural and some small urban programs, and VRT is the direct recipient for large urban and other small urban programs. The funds managed by ITD and VRT support fixed route and paratransit services, mobility management, program administration support, transportation services for the elderly and people with disabilities, buses and bus facilities, and general operations and maintenance of the public transportation system in Ada and Canyon Counties.

The FAST Act is set to expire on September 30, 2020. Recipients of federal funds typically assume the same levels of funding for planning purposes until a new authorization bill is passed by Congress. Based on this assumption, the total estimated federal funding for rural and small urban programs for FY2021 is \$15.1 million.

Total estimated funding under the FAST Act for non-ITD recipients (transit service providers in the urbanized areas, such as VRT) is estimated to be \$12.2 million in FY2021.

Dedicated state funds of \$312,000 annually are available for vehicle replacement needs under the Vehicle Investment Program and are awarded through a statewide competitive application process.

#### C. Reference to MPOs

The STIP does not list projects located in MPO planning areas, but refers to the local TIP in each MPO area; therefore, all projects located in Ada or Canyon Counties are only listed in the COMPASS TIP. Unlike ITD, the COMPASS Board of Directors opted not to group projects; all projects are listed individually in the COMPASS TIP.

## **Financial Status of ITD Projects**

The FY2021-2027 STIP provides financial data and financial constraint for ITD projects.

ITD seeks to make the best use of its resources and assets through a mixture of performance management and financing options. Idaho's transportation revenue comes from three sources. The State of Idaho receives 46.0% of its transportation funds from federal revenues such as the National Highway Trust Fund and the Airport and Airways Trust Fund, 51.7% from state revenues generated by transportation-related taxes and fees paid by Idaho citizens into the state's Highway Distribution Account (HDA) and air-fuel tax accounts, and 2.3% from other revenues such as local match (Table 20).

Table 20: ITD FY2021 Appropriations

#### Amounts in millions and rounded.

| Fund Sources  | State            | Federal           | Other                     | Total             |
|---|------------------|-------------------|---------------------------|-------------------|
| Distribution of Highway User Revenue to ITD                               | \$301.6          | -                 | 1                         | \$301.6           |

HDA revenue is obtained from various sources and distributed to multiple agencies. ITD's revenue forecast (Table 21) provides the summary of how these funds are forecasted for FY2021.

Table 21: ITD Highway User Revenue - FY2021

Amounts in millions and rounded.

| Revenue Sources  | HDA      | New     | Total    |
|--|----------|---------|----------|
|  |          | Revenue |          |
| Motor Fuel Taxes                                       | \$283.5  | \$72.6  | \$356.1  |
| Less: Parks, Tax Commission, Refunds, Railroad, Bridge | (\$21.2) |         | (\$21.2) |
| Inspection   |          |         |          |
| Less: Ethanol transfer to ITD                          | (\$17.7) |         | (\$17.7) |
| Net Motor Fuel to Distribute                           | \$244.6  | \$72.6  | \$317.2  |
| Registrations  | \$122.5  | \$41.1  | \$163.6  |
| Other  | \$11.2   |         | \$11.2   |
| Net to Distribute                                      | \$378.2  | \$113.8 | \$492.0  |

| Distributions                                  | HDA     | New     | Total   |
|--|---------|---------|---------|
|  |         | Revenue |         |
| ITD (57% HDA) / (60% New Revenue)              | \$215.6 | \$68.3  | \$283.9 |
| Ethanol Transfer to ITD                        | \$17.7  |         | \$17.7  |
| Total to ITD                                   | \$233.3 | \$68.3  | \$301.6 |
| Idaho State Police (5% HDA) / (0% New Revenue) | \$18.9  |         | \$18.9  |
| Locals (38% HDA) / (40% New Revenue)           | \$143.7 | \$45.5  | \$189.2 |
| Total Distributions                            | \$378.2 | \$113.8 | \$492.0 |

| Sub-Allocation of Locals Distribution | HDA     | New     | Total   |
|---------------------------------------|---------|---------|---------|
|                                       |         | Revenue |         |
| Locals (38% HDA) / (40% New Revenue)  | \$143.7 | \$45.5  | \$189.2 |
| Less: LHTAC                           | (\$0.5) | (\$0.1) | (\$0.6) |
| Net Local to Distribute               | \$143.2 | \$45.4  | \$188.6 |
| Cities (30%)                          | \$43.0  | \$13.6  | \$56.6  |
| Counties and Highway Districts (70%)  | \$100.2 | \$31.8  | \$132.0 |

Based on August 2020 Forecast

New revenue is the result of 2015 legislation (HB312)

ITD's STIP outlines the department's transportation revenues and expenditures for capital improvement and preservation projects from FY2021 through FY2027. It contains projects impacting highways, public transportation, aeronautics, bicycle and pedestrian facilities, and safety that will both maintain and improve a wide variety of transportation choices in all areas of the state. It also includes reference to projects found in Idaho's five MPO's TIPs.

ITD's budget policy section estimates revenues into the state HDA based on past performance and future economic and use factors (Table 22). The amounts shown include the match and federal funds estimated to be available to programmed projects.

Table 22: Available Funding\* with Match vs. Programmed Projects DRAFT FY2021-2027 Idaho Transportation Investment Program

<sup>\*</sup> Available estimates are to be used for planning purposes only. Federal FY2020 is last year of FAST Act. FY2021 and later are flat-lined at FY2020 levels. Funds expressed in Year-Of-Expenditure Dollars assuming 2% annual inflation.

Funding levels assume 100% Obligation Authority Includes set-asides for short/under-programmed programs

Grant Anticipation Revenue Vehicle (GARVEE) bonds provide no net additional transportation funding as they are repaid with future federal funds via debt service.

PREL = preliminary development, or beyond the first five years of the program

TEA-21 (Transportation Equity Act for the 21st Century) = the transportation authorization bill enacted in 1998

### **Financial Status of Project Sponsoring Entities**

#### Roadway Jurisdictions

While local agencies with roadway jurisdiction develop their own budgets, and allocate funding to transportation projects in their jurisdictions, each agency is required to report budgetary information to ITD on an annual basis through the annual "Road and Street Report." The following information is summarized from each agency's Road and Street Report to provide background budgetary information.

In FY2019, the local roadway jurisdictions in Ada and Canyon Counties budgeted only 1.82% of their budget on capital construction projects. The majority of their funds (58.98%) were budgeted for reconstruction and routine maintenance, demonstrating that maintaining the existing system is a very high priority for the region. Another 21.44% was budgeted for "other expenses," such as property purchase and engineering. Equipment consumed 9.35% of the budgets. Finally, administrative costs were 8.41% of the overall expenses for roadway jurisdictions.

The local roadway jurisdictions collectively reported on their FY2019 Road and Street Reports that over \$60 million of maintenance work is currently deferred, due to lack of funding.

Tables 23 through 25 provide FY2019 financial information from local agencies with roadway jurisdictions in Ada and Canyon Counties. Additional information is provided in Appendix D. Detailed information is available by contacting COMPASS staff at <a href="mailto:info@compassidaho.org">info@compassidaho.org</a>.

Table 23: Total Local Income Sources for Agencies with Roadway Jurisdiction, FY2019

#### Valley Regional Transit (VRT)

VRT, the regional transit authority, is the main recipient of the FTA funds in the Treasure Valley — specifically formula funds for the Boise and Nampa Urbanized Areas and programs for elderly persons or persons with disabilities and for bus and bus facilities in the Boise Urbanized Area.

All local match for the large and small urban areas, outside of directly generated revenues, comes from the voluntary contributions of local jurisdictions from their general funds. Local contributions are determined through the annual budgeting process of each local jurisdiction. This ties VRT's funding levels directly to the annual funding priorities of local jurisdictions. Future service and capital expenditures depend on local jurisdiction priorities and financial capacity; as local priorities change, so does the forecast for public transportation service levels and capital investments.

Budget projections, including inflation, predict that without additional funding, service could be negatively affected and/or VRT would need to push out needed maintenance and capital projects in the Boise and Nampa Urbanized Areas. See additional details in Appendix D. VRT reports a capital shortfall of \$17 million.

Table 26 provides VRT's FY2021 summary budget. VRT's future budget is based on historical trends and assumes continuation of funding from local jurisdictions at least at the current rate, plus an approximate 2% increase to cover inflation. However, in FY2020, the City of Boise committed to increasing its contribution to VRT to increase service and fund capital replacements (i.e., buses, equipment, and facilities). The City of Eagle and Ada County are providing additional funding to increase service within the City of Eagle, and the City of Meridian is providing funds to start a fixed-line service within the city. The City of Meridian's expanded contribution for FY2020 and FY2021 will expand the bus fleet; new fixed-line service is expected to begin in FY2021.

In order to provide more certainty to the public transportation program, VRT is developing a five year service and capital plan called the Transportation Development Plan (TDP). This plan will provide more opportunities to align local funding priorities with multi-year public transportation investments. VRT presented the first draft of the TDP to its board in August 2020 and expects a final TDP to be adopted in January 2021.

#### **General Statement of Financial Constraint**

The projects programmed in this document can reasonably be funded through anticipated funding sources. Table 27 demonstrates available funding versus programmed funding for all funding sources in the COMPASS planning area. Funds in programs not managed by COMPASS are assumed to be available if funds are programmed; there is not a specific budget for the COMPASS planning area for these programs. Projection of local revenues is based on assumptions of continued development and economic activities in the area. In light of these facts, it is concluded that the sponsoring agencies listed in this document are capable of providing the required local match and that the document meets the requirement of financial constraint.

Table 27: COMPASS Region Available vs. Programmed Funding (as of September 2020)

| Funding Source*                | 2021      |            | 2022      |            | 2023      |            | 2024      |            | 2025      |            | PD**      |            |

All amounts shown in \$1,000, most including required local match and shown in year of expenditure – inflated.

<sup>\*</sup>Descriptions of funding sources and definitions of abbreviations can be found in Section IX "Funding Sources and Uses"

<sup>\*\*</sup>PD=Preliminary Development, meaning the project does not have a construction year, but may begin design work. Column includes projects reported as funded in FY2026 or FY2027.

\*\*\*Funds are shown as federal only because local match rates vary from 0% to 50%. Available funds for year shown only, but program may include previous year carry-over funds. Blue highlight = programs managed by COMPASS or VRT.

# X. PROGRAM FUNDING ALLOCATIONS

The TIP is required to provide a breakdown of federal and regionally significant projects into roadway and alternative solutions. This information is provided in Table 28.

Many projects are complex, containing various transportation elements. The following assumptions were made when developing these data:

- Roadway projects that do not include some aspect of transit, sidewalks, bicycle lanes, and/or air quality improvements are shown as 100% roadway solutions.
- Projects dedicated to transit, pathway, bicycle lanes, or sidewalk improvements are shown as 100% alternative solutions.
- Roadway projects that also have some aspect of transit, pathway, bicycle lanes, and/or sidewalks are shown as 75% roadway and 25% alternative solutions.
- Projects that affect air quality, such as ITS projects, are shown as 50% road and 50% air quality.
- Other projects that cannot be classified into one of the above categories, such as planning and safe routes to school coordination, are included as "other."

Table 28: Share of Project Costs Allocated by Type of Project (as of September 2020)

| Year  | Total<br>Programmed<br>Funds* | Amount<br>Allocated to<br>Roadway<br>Solutions | Amount<br>Allocated to<br>Alternative<br>Solutions | Amount<br>Allocated<br>to Air<br>Quality | Amount<br>Allocated<br>to Other | Percent to<br>Roadways<br>Solutions | Percent to<br>Alternative<br>Solutions | Percent<br>to Air<br>Quality | Percent<br>to<br>Other |

## Peckham Road Intersections, Canyon County

Regionally Significant:

Project Year: 2022

Kev #: 22101

Inflated

**COMPASS PM:** 

Congestion Reduction/System Reliability

Farmland

Community Infrastructure

Freight Movement and Economic Vitality

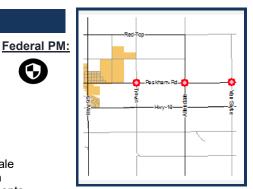

**Total Previous Expenditures: \$63** Total Programmed Cost: \$371 Total Cost (Prev. + Prog.): \$434

Requesting Agency: Golden Gate HD

Project Description: Reconstruct three intersections on Peckham Road at Travis Road, Allendale

Road, and Van Slyke Road, between the Cities of Wilder and Greenleaf in Canyon County. Each intersection is substandard for truck turning movements. The reconstruction will provide larger turning radii to eliminate truck off-tracking and reduce edge breakup. The intersection improvements will also allow trucks to maintain their own travel lane while making turns. All construction will adhere to current Association of Canyon County Highway District (ACCHD)

standards.

#### Study, Fiscal Impact Analysis, COMPASS

Inflated Regionally Significant: **COMPASS PM: Federal PM:** 

Support

Requesting Agency: COMPASS

Project Year: 2025

Key #: 22395

**Total Previous Expenditures: \$0 Total Programmed Cost: \$60** Total Cost (Prev. + Prog.): \$60

Project Description: To better implement the goals of Communities in Motion, this project will provide information on the fiscal impact of various growth patterns. Work will develop a fiscal impact analysis calculator, analyze the public costs and revenues of various land use patterns, build an economic model that can be used in the COMPASS development checklist for highlighting the costs of development, and conduct outreach and training for local decision-makers so that fiscal analysis can be used in local land use decision-making.

# **APPENDIX B: FUNDING TYPES AND ACRONYMS**

Provides a way to decipher transportation and federal jargon.

Federal funds administered by ITD are received from FHWA, the Federal Transit Administration (FTA), the Federal Aviation Administration, and the National Highway Safety Administration. Federal-aid projects generally require state or local matching funds of 7.34% to 50%, depending on the type of project and funding source.

Federal and state funding combined allow the state to preserve and improve the current transportation system. Table 29 provides a brief description of those funding sources.

COMPASS staff created a <u>funding fact sheet</u><sup>41</sup> titled *Transportation Funding Terms* and *Acronyms...Unraveling the Jargon*, for a more succinct version of the information below, including definitions of transportation acronyms.

The information below reflects typical use of funds and is provided to help the reader understand terms used in the TIP. It is NOT intended to set policy regarding the use of federal or state funds. Federal and state regulations provide additional details that further describe how funds can and cannot be used, and by whom. Contact COMPASS with specific questions on any funding source or type of project.

Table 29: Funding Sources and Uses

| Funding source*                           | What it's used for   | Example  | Whose can use<br>this funding in<br>Ada/Canyon<br>Counties**   |
|---|--|--|--|
| Bridge (Local)                            | Replacing or rehabilitating local (non ITD) bridges.   | Fixing a current bridge or replacing an old bridge with a new one.                   | Local highway<br>districts or cities   |
| Bridge<br>Discretionary                   | Replacing or rehabilitating bridges using funds from a nationally competitive program.   | Fixing a current bridge or replacing an old bridge with a new one.                   | Any (nationally competitive)   |
| Federal Lands<br>Access Program<br>(FLAP) | Projects that enhance access to federal lands. Program managed by the Western Federal Lands division of the US Department of Transportation. | Improvements to Bogus<br>Basin Road.   | Any (must be associated with federal lands)  |

|-----------------|---|--|---|
| FTA 5307 SU     | Planning, developing, improving, and operating public transportation services in small urban areas with a population between 50,000 and 200,000.  | Purchasing new buses, or paying operating costs, such as fuel and drivers' salaries. | Public transportation<br>providers in the<br>Nampa Urbanized<br>Area (generally,<br>eastern Canyon<br>County) |
| FTA 5310 LU     | Public transportation services and equipment that directly benefit the elderly and people with disabilities in large urban areas with populations over 200,000.   | Purchasing buses or vans for senior centers.   | Public transportation<br>providers in the<br>Boise Urbanized Area<br>(generally, northern<br>Ada County)      |
| FTA 5310 R      | Public transportation services and equipment that directly benefit the elderly and people with disabilities in rural areas with a population less than 50,000.  | Purchasing buses or vans for senior centers.   | Public transportation<br>providers outside of<br>the Boise and Nampa<br>Urbanized Areas                       |
| FTA 5310 SU     | Public transportation services and equipment that directly benefit the elderly and people with disabilities in small urban areas with a population between 50,000 and 200,000.                                      | Purchasing buses or vans for senior centers.   | Public transportation<br>providers in the<br>Nampa Urbanized<br>Area (generally,<br>eastern Canyon<br>County) |
| FTA 5311        | Planning, developing, improving, and operating public transportation services in large urban areas with populations under 50,000.   | Purchasing new buses, or paying operating costs, such as fuel and drivers' salaries. | Rural public<br>transportation<br>providers   |
| FTA 5339 LU     | Capital funding to replace or rehabilitate buses or bus facilities, purchase buses and related equipment, and to construct busrelated facilities in large urban areas with a population over 200,000.               | Purchasing buses or building bus shelters.   | Public transportation<br>providers in the<br>Boise Urbanized Area<br>(generally, northern<br>Ada County)      |
| FTA 5339 R      | Capital funding to replace or rehabilitate buses or bus facilities, purchase buses and related equipment, and to construct busrelated facilities in small urban areas with a population between 50,000 and 200,000. | Purchasing buses or building bus shelters.   | Public transportation<br>providers in rural<br>areas (5,000<br>population or less)                            |
| FTA 5339 SU     | Capital funding to replace or rehabilitate buses or bus facilities, purchase buses and related equipment, and to construct busrelated facilities in small urban areas with a population between 50,000 and 200,000. | Purchasing buses or building bus shelters.   | Public transportation<br>providers in the<br>Nampa Urbanized<br>Area (generally,<br>eastern Canyon<br>County) |
| Freight         | Capital funding to improve freight movement on prioritized freight corridors.   | Providing wider turning movements at an intersection.                                | ITD, local highway<br>districts, or cities<br>(but must be on<br>prioritized freight<br>corridor)             |

| Funding source*  | What it's used for   | Example  | Whose can use this funding in Ada/Canyon Counties**                                     |
|--|--|--|---|
| Highway Safety<br>Improvement<br>Program (HSIP)                | A project that improves safety on state managed roadways.  | Adding rumble strips along the side of a road.   | ITD   |
| Highway Safety<br>Improvement<br>Program (HSIP)<br>(Local)     | A project that improves safety on locally managed roadways.  | Adding safety lighting along a corridor.   | Local highway<br>districts or cities  |
| House Bill 132 and<br>House Bill 312<br>(HB132 and<br>HB312)   | Increased taxes for projects to keep roads and bridges in good condition.  | Rehabilitating a road.   | ITD (other agencies<br>receive these funds,<br>but they are not<br>reported in the TIP) |
| Interstate<br>Maintenance (IM)                                 | A project to resurface, restore, rehabilitate or reconstruct most routes on an Interstate System.  | Replacing an interchange on Interstate 84.   | ITD   |
| Local Participating  | A project that is primarily federally funded, but the sponsoring agency (and/or others) pay more than the minimum required match. Thus, the local agencies are "participating" in the funding.                                 | Any project where the sponsoring agency (and/or others) chooses to pay more than the minimum to help make the project more competitive when projects are selected for funding. | Any   |
| Local (Regionally<br>Significant)                              | Locally funded projects (no state or federal funds) that are included in the TIP because they meet the definition of "regionally significant."   | Adding an additional traffic lane between two intersections on a major roadway, using local (not state or federal) funds.  | Local highway<br>districts or cities  |
| National Highway<br>Performance<br>Program (NHPP)              | A project that provides support for the condition and performance of the National Highway System.  | Intersection improvements at a congested intersection on a state highway.  | ITD   |
| Metropolitan<br>Planning                                       | FHWA funding for metropolitan planning.  | Funding COMPASS to conduct regional transportation planning.   | COMPASS   |
| Sales Tax<br>Anticipated<br>Revenue (STAR)                     | Refunding money to a developer who pays for transportation improvements up front. Refunds come from anticipated sales tax generated by the new development.  | Improvements funded by a developer, such as widening a road to accommodate increased traffic at a new shopping mall.   | Private Developers  |
| Surface<br>Transportation<br>Block Grant – Rural<br>(STBG – R) | Mainly roadway projects in small towns and rural areas with populations under 5,000. However, this funding has flexibility to fund a broad range of projects, including studies, maintenance, sidewalks, bike lanes, and more. | Nearly any type of road construction project, including projects such as road widening or chip sealing.  | Jurisdictions in areas<br>with populations<br>under 5,000                               |

| Funding source*   | What it's used for   | Example   | Whose can use<br>this funding in<br>Ada/Canyon<br>Counties**  |
|---|--|---|---|
| Surface<br>Transportation<br>Block Grant –<br>State (STBG –<br>State)                           | Mainly roadway projects for use anywhere in<br>the state. However, this funding has flexibility<br>to fund a broad range of projects, including<br>studies, maintenance, sidewalks, bike lanes,<br>and more.                     | Nearly any type of road construction project, including projects such as road widening or chip sealing.                             | ITD   |
| Surface<br>Transportation<br>Block Grant –<br>Transportation<br>Management Area<br>(STBG – TMA) | Mainly roadway projects in urbanized areas of 200,000 or greater population. However, this funding has flexibility to fund a broad range of projects, including studies, maintenance, sidewalks, bike lanes, and more.           | Nearly any type of road construction project, including projects such as road widening or chip sealing.                             | Generally<br>jurisdictions in the<br>Boise Urbanized Area   |
| Surface<br>Transportation<br>Block Grant –<br>Urban<br>(STBG – U)                               | Mainly roadway projects in urbanized areas with populations between 5,000 and 200,000. However, this funding has flexibility to fund a broad range of projects, including studies, maintenance, sidewalks, bike lanes, and more. | Nearly any type of road construction project, including projects such as road widening or chip sealing.                             | Jurisdictions in the<br>Nampa Urbanized<br>Area   |
| State Funds   | Any project on a state-owned facility. Funds are very flexible.  | Any type of road improvement, including operations, technology, planning, support projects, and limited alternative transportation. | ITD   |
| Transportation Expansion and Congestion Mitigation (TECM)                                       | Projects to expand the existing system to relieve congestion on state highway.   | Widening a highway.   | ITD   |
| Transportation<br>Alternatives<br>Program State<br>(TAP – State)                                | Projects that support "alternative" (non-motorized) transportation options anywhere in the state.  | Building a walking or biking path.  | Any local<br>transportation<br>agency, city, or<br>county (including<br>jurisdictions in the<br>Boise Urbanized Area) |
| Transportation Alternatives Program – Transportation Management Area (TAP – TMA)                | Projects that support "alternative" (non-motorized) transportation options in urbanized areas of 200,000 or greater population.  | Building a walking or biking path.  | Generally,<br>jurisdictions in the<br>Boise Urbanized Area  |
| Transportation<br>Alternatives<br>Program Urban<br>(TAP – Urban)                                | Projects that support "alternative" (non-motorized) transportation options in urbanized areas of 50,000 to 200,000 population.   | Building a walking or biking path.  | Any local<br>transportation<br>agency, city, or<br>county   |

<sup>\*</sup>Funding Source: The source of funds used to fund the project. These can include funds from federal, state, or local sources.

<sup>\*\*</sup>Who can use this funding? Many types of funding are designated for specific uses, by specific types of agencies, for specific types of areas (e.g., rural vs urban). The information in this column shows the types of agencies within Ada and Canyon Counties who may apply for particular types of funding for particular types of projects. With the exception of TMA funds, all other funding sources can be used by other appropriate agencies throughout Idaho as well, based on funding definitions.

Table 30 provides general acronyms and terms found throughout the TIP or in discussions about projects and funding.

Table 30: General Acronyms and Terms Used in the TIP

| Acronym or Term  | Definition   |
|--|--|
| ACHD   | Ada County Highway District; the agency responsible for all non-state roadways in Ada County.  |
| ACCHD  | Association of Canyon County Highway Districts   |
| ADA  | Americans with Disabilities Act; civil rights legislation prohibiting discrimination against persons with disabilities.  |
| Boise Area / Boise<br>Urbanized Area /<br>Large Urban (LU) | Generally, northern Ada County, including the cities of Boise, Eagle, Garden City, and Meridian.  For FHWA funding: Generally, eligible for Transportation Management Area (TMA) funds.  For FTA funding: Eligible for "large urban" (LU) funds.                           |
| CAL  | Part of a City of Caldwell key number. Local key numbers are used when a project is regionally significant, but 100% locally funded.   |
| CFI  | Continuous flow intersection; a type of intersection where vehicles attempting to turn cross the opposing direction of traffic before they enter the intersection  |
| CFR  | Code of Federal Regulations; federal interpretation of United States law   |
| COMPASS/CPA  | Community Planning Association of Southwest Idaho  |
| HD   | Highway district   |
| Federal funding  | Transportation funding collected by the federal government, then distributed to the states for use on both state and local transportation projects. The main purpose of the TIP is to budget federal funding.  |
| Federal Highway<br>Administration<br>(FHWA)                | An agency within the US Department of Transportation (DOT) that provides financial and technical assistance to state and local governments for the construction, maintenance, and preservation of the nation's highways, bridges, and tunnels.                             |
| Federal Transit<br>Administration (FTA)                    | An agency within the US Department of Transportation (DOT) that provides financial and technical assistance to local public transportation systems.  |
| FY   | Fiscal year (refers to the federal fiscal year, which runs October 1 – September 30).  |
| GARVEE   | Grant Anticipation Revenue Vehicle (bonds).  |
| Hwy (Highway)  | Used with a funding program (e.g., State Hwy – System Support)   |
| I-84   | Interstate 84.   |
| IN   | Part of an ACHD key number. Local key numbers are used when a project is regionally significant, but 100% locally funded.  |
| Idaho Transportation<br>Department (ITD)                   | The state agency responsible for state and national highways in Idaho, such as Interstate 84, US 20/26, and State Highway 55. ITD receives state and federal funding for transportation projects, primarily from state and federal fuel taxes and state registration fees. |
| ITS  | Intelligent transportation systems; advanced technologies to improve the efficiency and safety of transportation systems.  |
| Key number (KN)  | A unique identification number assigned to each project in the TIP.  |
| Local funding  | Funding collected by local agencies, such as Ada County Highway District, for use on local projects.   |

| Acronym or Term   | Definition   |
|---|--|
| Local match   | The portion of a primarily federally funded project paid for with state or local funds. While match is required for most federally funded projects, the minimum required amount varies based on the type of funding.   |
| MPO   | Metropolitan planning organization (COMPASS is the MPO for Ada and Canyon Counties).   |
| NAM   | Part of a City of Nampa key number. Local key numbers are used when a project is regionally significant, but 100% locally funded.  |
| Nampa Area /<br>Nampa Urbanized<br>Area / Small Urban<br>(SU) | Generally, eastern Canyon County, including the cities of Nampa, Caldwell, and Middleton.  For FHWA funding: Eligible for "urban" funds.  For FTA funding: Eligible for "small urban" (SU) funds.  |
| National<br>Environmental Policy<br>Act (NEPA)                | A law that requires the assessment of the environmental effects of proposed actions prior to making decisions on federally funded projects. A "NEPA study" refers to the documentation required for compliance with NEPA.  |
| PD  | Preliminary Development; design may begin, but construction is not yet programmed (budgeted) in a specific year.   |
| PM  | Performance Measure. Refers to either of two sets of performance measures reported in the TIP: one to meet the vision of goals of the regional long-range transportation plan ( <i>Communities in Motion</i> ) and one that meets federal requirements.  |
| ORN   | OTIS reference number (temporary key number).  |
| OTIS  | Office of Transportation Investment Systems (Department at ITD).   |
| RC  | Part of an ACHD key number. Local key numbers are used when a project is regionally significant, but 100% locally funded.  |
| RD  | Part of an ACHD key number. Local key numbers are used when a project is regionally significant, but 100% locally funded.  |
| Rural (R)   | For FHWA funding: An area with less than 5,000 in population.  |
| SH  | For FTA funding: An area with less than 50,000 in population.  |
| SR2S  | State highway (e.g., SH-16).  Safe Routes to School; a program to improve the health of children by enabling and encouraging them to walk and bike to school safely.   |
| State funding   | Transportation funding collected by the State of Idaho for use by ITD and local roadway agencies.  |
| TIP   | Regional Transportation Improvement Program. A seven-year budget of projects in Ada and Canyon Counties paid for with federal or state transportation dollars and/or that are "regionally significant."  |
| Transportation<br>Management Area<br>(TMA)                    | Any urbanized area over 200,000 in population. The Boise Urbanized Area (generally, northern Ada County) is the only TMA in Idaho. TMAs receive dedicated transportation funding not shared with the rest of the state. See specific policy regarding TMA funds at <a href="https://www.compassidaho.org/documents/prodserv/trans/TMApolicy.pdf">www.compassidaho.org/documents/prodserv/trans/TMApolicy.pdf</a> . |
| TVT   | Treasure Valley Transit, a private, non-profit public transportation company operating in rural southwest Idaho  |
| Urban (U)   | For FHWA funding: An area with more than 5,000 in population.  For FTA funding: An area with more than 50,000 in population.   |
| US  | When used with a number, refers to a US highway (e.g., US-20).   |
| VRT   | Valley Regional Transit; the regional public transportation authority for Ada and Canyon Counties.   |

# **APPENDIX C: PUBLIC COMMENTS**

Provides verbatim comments received on the project list, as well as any amendments that require a public comment period.

# **Public Comments Received (Verbatim)**

- Draft FY2021-2027 Regional Transportation Improvement Program
- Proposed changes to the regional long-range transportation plan, *Communities in Motion* 2040 2.0 (CIM 2040 2.0)
  - Air Quality Conformity Demonstration for Northern Ada County

Public Comment Period: August 14 – September 14, 2020

Total number of individuals submitting comments: 60

# Comments on projects in the DRAFT FY2021-2027 Regional Transportation Improvement Program (TIP)

ADA Ramps, Greenleaf - As a person in an electric wheelchair, if that picture is accurate, my wheelchair will not be able to negotiate the ramp. It will turn off as soon as it hits that "bump" to go up the ramp. I don't care about what the ADA approves, unless you have someone actually show you, in an electric wheelchair that it is not negotiable, you wouldn't understand the difficulty.

Centennial Way Roundabout, Caldwell -Round-a-bouts cause more confusion, driver hesitancy, possible increase in accidents, than a traditional four-way stop. It would be more prudent to install a signal. This may be a more costly idea, but it is so much easier to handle.

Franklin Boulevard and Karcher Road, Intersection Improvements, Nampa - See above - no more round-a-bouts.

Middleton Road and Ustick Road, Roundabout, Caldwell - Please, just put in traffic lights with crossing abilities. These are all roads that I Thank you for your comments. Your comments will be shared with the COMPASS Board of Directors, the Idaho Transportation Department and the Cities of Caldwell and Nampa, and Valley Regional Transit.

The picture of the ADA ramp was intended to provide an example for those who do not understand the term. The picture was replaced to better represent current quidelines.

Multiple projects are included for "Transit – Rolling Stock, Infrastructure, and Technology." 1) Some projects are for the Boise Urbanized Area and some for Nampa Urbanized Area, 2) projects include various funding sources. More explanation is provided in Valley Regional Transit's (VRT's) Program of Projects, which is developed each year. These projects are also tied closely to VRT's Transit Asset Management Plan

(<a href="http://valleyregionaltransit.org/">http://valleyregionaltransit.org/</a>) which is a program to replace assets at the end of their service life - Rolling Stock (buses, commuter vans, support vehicles), equipment (for operations and maintaining vehicles), and facilities (buildings, bus stops). 147

Sue Hoffman 83651

| (The comments below are verbatim, as submitted by the commenter. As such, typographical errors have not been corrected.)  | Staff Response   | Name, Zip Code,<br>Affiliation | Format |
| travel (see above), and I find myself trying to avoid the round-abouts that already exist. TRAFFIC LIGHTS!  |  |                                |        |
| SH-44 (State Street) and SH-55 (Eagle Road) Intersection, 1/2 CFI, Eagle - I see this, and I understand what you're trying to do - but there will be accidents!   |  |                                |        |
| May I suggest that the next time you put out items for comment:   |  |                                |        |
| 1. That the drafts are separated by city and county for relevancy, and then even more separated by types of issues like pavement redos, bridges, transportation purchases, etc.   |  |                                |        |
| 2. Put the information out in stages - this was very long and very detailed. Most people won't bother reading all of this.  |  |                                |        |
| 3. I noticed that in one of the Boise items - Transit - Rolling Stock, Infrastructure, and Technology, Boise Area, VRT - FY2025/6/7 - has three inputs. I am assuming that just because you gave them different numbers that it should be okay to request the same amount of money for three different things with the same descriptions. Nampa did that also for 2 things. I have no idea why you need that much money without more explanation. |  |                                |        |
| Key# 20428 SH-21, Technology Way to<br>Surprise Way, Boise. It isn't clear what if any<br>benefit a 4-foot median will provide, but we  | Thank you for your comments. Your comments will be shared with the COMPASS Board of Directors, the Idaho Transportation Department, and the City of Boise.   | Stephen Leonard<br>83716       | Online |
| badly need a left turn lane from Hwy 21 northbound into Alta Ridge Ct. Heartleaf Dr was vacant land five years ago, but now has 30 newly built homes and a lot more traffic. There are often a lot of trucks pulling big boats and moving fast on Hwy 21 during the summer, and that left turn lane would reduce some of the scary near-misses. Even a right turn lane from Hwy 21 southbound would be helpful, though less crucial.              | Key Number 20428 (State Highway 21) does include a continuous 14-foot turn lane. We apologize that the description did not indicate that. The description has been updated to read: "Widen State Highway 21 from Technology Way (near Micron) to Surprise Way (just west of the Boise River Bridge) in the City of Boise. The project will include two 12-foot travel lanes, a continuous 14-foot center turn lane, and two 6-foot shoulders." |                                |        |

| Comment  (The comments below are verbatim, as submitted by the commenter. As such, typographical errors have not been corrected.)   | Staff Response  | Name, Zip Code,<br>Affiliation | Format |
|---|---|--------------------------------|--------|
| ITD needs to look at placing an exit at Ustick Road on I-84. The Bridge is already going to be redesigned to accommodate increased traffic loads. In the next 5-7 yrs Ustick road will get encumbered with subdivision replacing open farm ground. Some Residence will need to get to work using I-84, they would need to use midland or northside. Which is already going though a redesign to "Catch up" with traffic loads. An exit at Ustick would help with midland congestion releasing pressure from the caldwell-nampa blvd. and help when accidents happen between exit 28 & exit 33, (2 happened today making me and others 40+ min late). Idaho has been playing catch up with traffic with regards to I-84 for my whole life, by the time 3 lanes are installed it will require a 4th. It would be proactive to install an exit for these new residence of our area, both Nampa and Caldwell are growing along Ustick. This will also help development along the Blvd, to facilitate growth around caldwells walmart making the area much easier to access. | Thank you for your comments. Your comments will be shared with the COMPASS Board of Directors, the Idaho Transportation Department, and the City of Caldwell.  The I-84, Ustick Road Overpass is currently scheduled for replacement in FY2022. An interchange at this location is not anticipated. | Kyle Schab<br>83661            | Online |
| Eagle road needs to expanded from I84 to chinden to 7 lanes in both directions. This could impact some biking/pedestrian ways that are in draft. Please consider it before proceeding. In addition to the expansion of Eagle Rd, it needs to include the tall barriers at the few subdivisions impacted similar to the barriers going up on Chinden. Eagle road is supposed to be up to 55 mph with often large trucks using it. It must be kept as a strong north/south thoroughfare. In future, laws should be changed that buildings cannot be placed so close to highways and highways should be built with large medians between the two directions to allow for future expansion to take place by using the land in the median.   | Thank you for your comments. Your comments will be shared with the COMPASS Board of Directors, the Idaho Transportation Department, and the Cities of Boise, Meridian, and Eagle.   | 83713                          | Online |

| (The comments below are verbatim, as submitted by the commenter. As such, typographical errors have not been corrected.)  | Staff Response  | Name, Zip Code,<br>Affiliation | Format |
|---|---|--------------------------------|--------|
| Highway 69 south to Kuna was repaved recently but right-hand turn lanes were not provided at major intersections any further South than at Columbia Rd. Kuna is growing at an incredibly fast pace and residents are using the shoulders as turn lanes as a courtesy to other drivers at Hubbard and other intersections along the highway. This is not what the shoulders were designed for. Please plan to add right turn lanes at every major intersection along HW69 south to Kuna. Thank   | Thank you for your comments. Your comments will be shared with the COMPASS Board of Directors, the Idaho Transportation Department, and the City of Kuna.   | 83634                          | Online |
| I would propose that the state street project should be light rail/ subway instead of bus. Also, the fare should be free to encourage more people to use.   | Thank you for your comments. Your comments will be shared with the COMPASS Board of Directors and Valley Regional Transit.  | 83616                          | Online |
| For the project with Key #20428, will the widening include a center turn lane? We have been asking for a center turn lane for the last 20 years and now, with the road widening, this would be the time to add the turn lane.  Additionally, will the road be extended on both sides from the widening or will it only affect the field? Will ITD be widening the road into the berm on the Superior/Legend Ridge Neighborhood side, as well?   | Thank you for your comments. They will be provided to the Idaho Transportation Department and the COMPASS Board of Directors and the City of Boise.  Yes, the continuous center turn lane will extend through the area/intersection in question (from Technology Way to Surprise Way).  No additional right-of-way is being acquired as part of this project; all widening will be within existing ITD right-of-way. Generally speaking, ITD will widen equally on both sides; however, in some locations, in order to make the drainage work ITD will widen towards the open land vs the existing rock walls or berms. | 83616                          | Phone  |
| I saw nothing in this document that addresses road improvements to serve the Hidden Springs/ Dry Creek area. With continued construction and increased population in this area, road improvements are needed on Seaman's Gulch, Dry Creek Road and Cartwright Road. There are many bicyclists sharing the roads with vehicular traffic. There are no designated bike lanes and vehicular traffic often crosses the double yellow line to pass slower moving cyclists. In addition, the current roads are eroding. If the County is approving land development projects in this area, road access and infrastructure to support additional traffic must be part of the plan and not an afterthought. If there is a plan in place to address these issues please inform me of the plan. | Thank you for your comments. Your comments will be shared with the COMPASS Board of Directors, the Idaho Transportation Department, the Ada County Highway District, and Ada County.  Widening State Highway 55 from Beacon Light Road to Ada/Boise County line is #8 of the unfunded state system priorities in Communities in Motion 2040 2.0. As part of the regional long-range transportation plan update, in 2021, COMPASS will develop a regional pathway plan that will include an analysis of other infrastructure accommodations.   | 83714                          | Online |

| proposed improvements so that the results will better benefit all of those who use HWY 21 and those who live off of Hwy 21. To be as concise as possible, I'll get right to bullet points.  - Currently, there is no turn lane into our neighborhood. There are 54 homes in this development, many of us with children who drive, so at least 120 drivers, not to mention guests. Stopping on Hwy 21, backing up traffic, to turn into our neighborhood is unsafe, and I have seen more than a few near accidents. This is especially true on the weekends as people head to Lucky Peak and beyond to go boating and camping. We desperately need a left turn lane into Legend Ridge as part of this widening project. The project identifies a 4ft center median, but it makes no mention of turn lanes.  - Similar to the last point, the increased traffic on HWY 21 makes it difficult to enter it and get up to 55 mph in the small gaps in traffic, again especially on the weekends. Moreover, the traffic at 55 mph creates a lot more noise than the 35 mph speed limit that was in place when we bought our lot. We request that the speed limit be reduced to 35 mph at least 1/4 mi before the entrance to Legend Ridge. The traffic flow from Lucky Peak is highly likely to be stopped at Technology Way (1/4 mi away) or at Federal Way (1/2 mi away) anyway, so this isn't a large impediment to their travel. Similarly, traffic flowing toward Lucky Peak is just taking off from one of those two lights and must use excessive fuel (causing unnecessary pollution) to get up to 55 mph (sometimes just to slow down again at Technology Way when coming from Federal Way). It makes more sense, and is more environmentally friendly, to stage the speed limit on Hwy 21, setting it to 35 mph from Federal Way to 1/4 mile past Legend Ridge entrance, then increasing it to 55 mph. This reduces the speed for only about 1 mile, but will make a world of difference to the residences of Legend Ridge. | Key Number 20428 (State Highway 21) does include a continuous 14-foot turn lane. We apologize that the description did not indicate that. The description has been updated to read: "Widen State Highway 21 from Technology Way (near Micron) to Surprise Way (just west of the Boise River Bridge) in the City of Boise. |---|---|--------------------------------|--------|
| Greenbelt comes down Surprise Way and ends at Hwy 21; similarly, there is a large pathway that runs alongside Federal Way ending at HWY 21. We get a lot of bikers coming down HWY 21 and it is unsafe because the shoulders are tiny. It seems to me that it would make a lot of sense to connect the Federal Way pathway to the Greenbelt with a wide, protected (either by separation from the highway, or a curb, or something), paved pathway on the south side of Hwy 21. This has the added benefit of connecting the paved trial systems to the Oregon Trail Reserve and recreational area. It is sad that we live less than 1 mile from these sites, but we can't travel to them safely without getting into our car. This connector would open many more opportunities for distance bikers and runners, as well as those venturing downtown on scooters, e-bikes, and such. |   |                                |        |
| - The plan calls for a 4ft center median, but it does not specify what kind of median. This area has a lot of new development, with a lot more to come. It is also the gateway to the local boating hot spot, as well as many camping spots. Accordingly, a raised median with trees, flowering bushes, etc. would be pleasing to users and would welcome the right kind of development in the area. Much like the other edge of Boise, bordering Meridian, used roadway improvements and development guidelines to minimize the effects of that area's industrial parts, we should be doing the same here.   |   |                                |        |
| Thank you for your time and consideration of my comments.  Project 20428: I live in Legend Ridge, near the fire station on Highway 21 where the speed limit is 55. I can't even count the number of times we've almost been rear-ended while trying to turn left into our neighborhood off 21. I once watched a motorcycle pass me on the left while I was stopped and had my turn signal on to turn left. During the summer, trucks w/ boats & campers, barrel down this stretch with no expectation of having to slow   | Thank you for your comments. | I am a resident of the Legend Ridge (Superior Ridge) subdivision off Highway 21. This stretch of road has become increasingly dangerous over the years with the increased speed limit (55 mph), the lack of a turn lane, and the increased volume of cars utilizing Hwy. 21. I strongly support the need to widen this stretch of road, but I am deeply concerned about the details outlined in the Regional TIP (Key #20428). A 4 ft. center median will not adequately ensure the safety of our residents as we enter and exit the subdivision, especially as we will now be required to cross 2 lanes of traffic. In addition, the speed limit of 55 mph is DANGEROUS when we are forced to stop on Hwy. 21 to make a left turn onto Alta Ridge Dr. There have been many accidents at this | Thank you for your comments. Your comments will be shared with the COMPASS Board of Directors, the Idaho Transportation Department, and the City of Boise. | location. Thankfully, to my knowledge, there have been no fatalities, but that possibility only increases with the addition of more lanes. Since Hwy. 21 is the only entrance / exit from our subdivision, there is no other option than to use this road. PLEASE consider 1) putting a turn lane on Hwy. 21 into the Legend Ridge (Superior Ridge) subdivision, and 2) lowering the speed limit to a maximum of 45 mph along this stretch of road. Thank you for your consideration.  More pedestrian improvements on Chinden/US | Thank you for your comments. Your comments will be  | 83704                          | Online |
| 20-26, please. One crosswalk in the year 2023 is inadequate. There should be crosswalks at 33rd, 34th, and 35th Streets so folks can cross the road safely when needed. Same goes for 44th, 46th and 48th. "Frogger"-style road crossing is for video games, not real life.   | shared with the COMPASS Board of Directors, the Idaho Transportation Department, the Ada County Highway District, and the City of Boise.  |                                |        |
| I am disappointed to see that a stoplight or traffic circle isn't on the plan for Hwy 45 at Locust Ln. in Nampa. It is a very dangerous intersection. Midland Ave. also needs a traffic circle at Lake Lowell Ave. where accidents occur frequently.  | Thank you for your comments. Your comments will be shared with the COMPASS Board of Directors, the Idaho Transportation Department, and the City of Nampa.  | 83686                          | Online |
| What is the ratio of planned capital expense on automobile infrastructure vs. bicycle infrastructure? Also, what is the net present value of maintenance liabilities that will be incurred from those new infrastructure investments? From a quick glance at the projects list, it is very light on spend for bicycle infrastructure. I would like to see at least one of the major intersection/interchange projects (ie. \$34 million) scrapped to make room for expanded spending on bicycle infrastructure.                   | Thank you for your comments. Your comments will be shared with the COMPASS Board of Directors.  Please note that some roadway projects include some aspect of public transportation, pathway, bicycle lanes, and/or sidewalks. In these cases, the ratio of cost is figured at 75% roadway solutions and 25% alternative solutions. With these assumptions, the overall percentage of funds programmed in the Draft FY2021-2027 TIP for roadways is 69.61% and alternatives solutions is 25.07%, air quality is 2.28%, and "other" is 3.04%.  The net present value of maintenance liabilities is not | 83703                          | Online |
| I would like to see more projects focusing on mass transit to move more people in smaller pockets of high density areas: e.g. expand bus service to Eagle, Star, Middleton and beyond, more bus stops; reinstate the rail system in Boise area up to Nampa, for example; or institute a modified rail system in Treasure Valley.  | readily available. |--|---|--------------------------------|--------|
| The growth in Southeast Boise has many more residents/people/recreationists using Highway 21. I live on Alta Ridge Court off of Highway 21. During the 21 years I have lived in the Legend Ridge subdivision we have more than doubled the amount of people/homes/drivers. Turning left or right in or out of our neighborhood to/from Highway 21 from Alta Ridge is treacherous. Cars travelling on Highway 21 are usually going much faster than the posted 55MPH. We need a sufficient turn lane that can keep everyone safe. The proposed 4-foot center median is not a sufficient improvement. In the last 5 years there have been 2 fatal accidents in this area. I recently went to turn left onto Alta Ridge Ct from Highway 21 and a car was attempting to pass me on the left as I was turning. We currently have a dotted yellow stripe right in front of our street. NO cars should be passing where there is an intersection. We often gets cars passing on the shoulder, which is also a violation since they are partially on the gravel. This section of Highway 21 is dangerous. As a neighborhood we also need a double yellow strip on this section of Highway 21 while we wait for the widening project to begin. As residents of Legend Ridge, we do not have the luxury of another entrance/exit to our neighborhood. We are bound to one way as an exit and entrance and we need to have a safe way to do that. We would also love if the speed limit could be lowered to 45 MPH when the project is completed. | been updated to read: "Widen State Highway 21 from Technology Way (near Micron) to Surprise Way (just west of the Boise River Bridge) in the City of Boise. The project will include two 12-foot travel lanes, a continuous 14-foot center turn lane, and two 6-foot shoulders."  The Idaho Transportation Department will review your inquiry about possibly reducing the speed limit and extending the "No Pass" zone.  |                                |        |
| I have viewed the proposed projects in the budget. That is a lot of material. It still seems inadequate and piecemeal. Perhaps because this is just the federal dollars being spent. Then there are other transportation projects funded by the state or county?   | Thank you for your comments. Your comments will be shared with the COMPASS Board of Directors.  The budget ("TIP") includes projects that are federally-funded, state-funded, and projects considered to be "regionally significant" (generally capital improvements on principal arterials) no matter the funding source. The cities and highway districts in Ada and Canyon Counties have additional projects funded with local funds that are not included in the TIP. | 83713                          | Online |

| THE LEGEND RIDGE SUBDIVISION. I constantly worry for myself, my neighbors, and especially my teenage drivers. There have already been fatal accidents in this corridor of Highway 21 in 2016 and 2018. I personally have had several instances where I've been in near collisions with speedy cars that drive around me while I'm waiting for a clear left turn onto my street. It is also crucial that the speed limit be lowered in the section of Highway 21 where you enter and exit neighborhoods. Perhaps 45 mph and NO PASSING until you hit Diversion Dam.  |  |                                |        |
| I don't want any more avoidable deaths or<br>near deaths in my neighborhood. Please make<br>this dangerous section of Highway 21 safe for<br>the thousands that use it daily!!  |  |                                |        |
| Project Key 20428: SH- Highway 21 Legend Ridge/Superior Ridge E. Alta Ridge Rd. Subject: Left turn lane needed for subdivision on Hwy 21.   | Thank you for your comments. | typographical errors have not been corrected.) been recognized. I am especially concerned about our young teen drivers who have not developed good judgement in evaluating speed of oncoming traffic when pulling out. The evidence of skid marks on the roadway is testimony to the close calls we have endured.  I also would love to see a paved bikeway   | The Idaho Transportation Department will review your inquiry about possibly reducing the speed limit.  |                                |        |
| added that would connect us to the greenbelt. The current rough, gravel path is very unsafe with traffic whizzing by at 55 mph. To safely access the greenbelt we must bicycle through Columbia Village then out to Amity Rd. It would be so nice to have easier access from our end of town.   |  |                                |        |
| This is regarding project key #20428, Technology way to Surprise Way in Boise (altering Highway 21). As a resident of Alta Ridge and with a NEW driver in the next two years, we are HIGHLY SUPPORTIVE of this plan! We would hope that a SLOWER SPEED LIMIT (55pmh is TOO FAST and drivers consistently exceed this limit making turning on to Alta Ridge dangerous) would be taken in to consideration, as well as NO PASSING lines and signs (trying to wait for traffic so I can turn left is scary as fast cars from the rear often GO AROUND a stopped car!), and a TURNING LANE available in both directions (a 4 foot center median is NOT SUFFICIENT!!! Instead of a 4 foot median and a 6 foot shoulder, we need a DESIGNATED TURNING LANE.). Noting that there is only ONE entrance end exit to Legend Ridge, I truly hope that by the tine my children are old enough to drive (18 months!!!!) that our access to our OWN HOMES is made SAFE. I am tired of being honked at and "flipped off" for slowing down to safely turn on to the street in which I LIVE with my children and husband. THANK YOU SO MUCH for your consideration and for your time in reading my comments. | Thank you for your comments. |---|---|-----------------------------------|---------------------------|
| I live in Legend Ridge off SH 21. There is only one way in and out of the neighborhood. We are a family of six with three inexperienced drivers. There have been numerous times I have been making a left-hand turn into our neighborhood and have nearly been rearended or the cars come up right on me and swerve into the dirt instead of stopping and waiting for me to turn. This is especially bad in the summer when there is far more traffic going to and coming from the lake.  Last week my husband was driving, I was in the passenger seat and my 12 year old was in the back. We made a RIGHT hand turn out of the subdivision onto SH21 and were nearly hit head-on by someone who was passing the cars travelling toward the lake. At a bare-minimum that should be a double-yellow line so, in theory, people wouldn't pass there.  We really need this widened with a turn lane into the subdivision. I have had too many near-misses and have only lived in the subdivision for 2 years. | Thank you for your comments. | and I have seen more than a few near accidents. This is especially true on the           |   |                 |        |
| weekends as people head to Lucky Peak and  |   |                 |        |
| beyond to go boating and camping. We   |   |                 |        |
| desperately need a left turn lane into Legend  |   |                 |        |
| Ridge as part of this widening project. The  |   |                 |        |
| project identifies a 4ft center median, but it   |   |                 |        |
| makes no mention of turn lanes.  |   |                 |        |
| - Similar to the last point, the increased traffic                                       |   |                 |        |
| on HWY 21 makes it difficult to enter it and get   |   |                 |        |
| up to 55 mph in the small gaps in traffic, again   |   |                 |        |
| especially on the weekends. Moreover, the  |   |                 |        |
| traffic at 55 mph creates a lot more noise than  |   |                 |        |
| the 35 mph speed limit that was in place when  |   |                 |        |
| we bought our lot. We request that the speed limit be reduced to 35 mph at least 1/4 mi  |   |                 |        |
| before the entrance to Legend Ridge. The   |   |                 |        |
| traffic flow from Lucky Peak is highly likely to   |   |                 |        |
| be stopped at Technology Way (1/4 mi away)   |   |                 |        |
| or at Federal Way (1/2 mi away) anyway, so   |   |                 |        |
| this isn't a large impediment to their travel.   |   |                 |        |
| Similarly, traffic flowing toward Lucky Peak is  |   |                 |        |
| just taking off from one of those two lights and   |   |                 |        |
| must use excessive fuel (causing unnecessary   |   |                 |        |
| pollution) to get up to 55 mph (sometimes just to slow down again at Technology Way when |   |                 |        |
| coming from Federal Way). It makes more  |   |                 |        |
| sense, and is more environmentally friendly, to  |   |                 |        |
| stage the speed limit on Hwy 21, setting it to   |   |                 |        |
| 35 mph from Federal Way to 1/4 mile past   |   |                 |        |
| Legend Ridge entrance, then increasing it to   |   |                 |        |
| 55 mph. This reduces the speed for only  |   |                 |        |
| about 1 mile, but will make a world of   |   |                 |        |
| difference to the residences of Legend Ridge.  |   |                 |        |

| that runs alongside Federal Way ending at   |  |                 |        |
| HWY 21. We get a lot of bikers coming down  |  |                 |        |
| HWY 21 and it is unsafe because the shoulders   |  |                 |        |
| are tiny. It seems to me that it would make a   |  |                 |        |
| lot of sense to connect the Federal Way   |  |                 |        |
| pathway to the Greenbelt with a wide,   |  |                 |        |
| protected (either by separation from the  |  |                 |        |
| highway, or a curb, or something), paved  |  |                 |        |
| pathway on the south side of Hwy 21. This   |  |                 |        |
| has the added benefit of connecting the paved   |  |                 |        |
| trial systems to the Oregon Trail Reserve and   |  |                 |        |
| recreational area. It is sad that we live less than 1 mile from these sites, but we can't |  |                 |        |
| travel to them safely without getting into our  |  |                 |        |
| car. This connector would open many more  |  |                 |        |
| opportunities for distance bikers and runners,  |  |                 |        |
| as well as those venturing downtown on  |  |                 |        |
| scooters, e-bikes, and such.  |  |                 |        |
|   |  |                 |        |
| - The plan calls for a 4ft center median, but it  |  |                 |        |
| does not specify what kind of median. This  |  |                 |        |
| area has a lot of new development, with a lot   |  |                 |        |
| more to come. It is also the gateway to the   |  |                 |        |
| local boating hot spot, as well as many   |  |                 |        |
| camping spots. Accordingly, a raised median   |  |                 |        |
| with trees, flowering bushes, etc. would be   |  |                 |        |
| pleasing to users and would welcome the right   |  |                 |        |
| kind of development in the area. Much like the  |  |                 |        |
| other edge of Boise, bordering Meridian, used   |  |                 |        |
| roadway improvements and development  |  |                 |        |
| guidelines to minimize the effects of that  |  |                 |        |
| area's industrial parts, we should be doing the   |  |                 |        |
| same here.  |  |                 |        |

| neighborhood is coming from the west (due to I-84 access) and requires a left turn. We must slow down from the 55mph road and signal left. The cars traveling behind are not always expecting this change in speed and it can be dangerous. Many of us have experienced "close calls" performing this left hand turn. As we have new drivers each year I worry about their ability to navigate this situation.  | Technology Way (near Micron) to Surprise Way (just west of the Boise River Bridge) in the City of Boise. The project will include two 12-foot travel lanes, a continuous 14-foot center turn lane, and two 6-foot shoulders."  The Idaho Transportation Department will review your inquiry about possibly reducing the speed limit and extending the "No Pass" zone. |                                |        |
| #2 Please include a NO passing zone near all residential access streets along this stretch of Hwy 21. a. Currently traffic heading to Lucky Peak can pass on either side. The landscape appears very remote (for now) and drivers heading to recreation really aren't expecting residents to be turning out onto the road. Drivers can pass each other on the left or right. If a resident is making a right hand turn out of the neighborhood they can encounter a head-on collision if a driver is trying to pass another at that same point in the road. My neighbors have had "close calls" with this scenario as well. |   |                                |        |
| #3 Please decrease the speed limit to 35mph on this stretch of Hwy 21. a. It is difficult to turn into a neighborhood off of a 55mph street. There are 4 residential streets that intersect with Hwy 21 along this stretch. This is especially difficult for new drivers to navigate. b. It is very common to have bikers along this stretch of the highway. There is a nice spot for bikers to come off Federal Way in front of Albertsons. They can pick up the greenbelt across the bridge or access it from Surprise Way. It would be safer for the speed limit to be less to accommodate for this type of recreation.  |   |                                |        |
| #4 It is worth considering a biking lane along this stretch of Hwy 21. a. As mentioned above, bikers can enjoy what Boise has to offer the outdoor scene by riding down Federal Way and connecting to the greenbelt. Having a safer way to close this loop for them would be safe and increase our bike friendly scene. b. I personally would enjoy easier access to the green belt and Bown Crossing from my home.   | 167   |                                |        |

| wide then it needs to be 5 lanes. Honestly, I'd   | Transportation Department, and the city of Boise.           |                 |        |
| take a center lane over having duplicate lanes  | Key Number 20428 (State Highway 21) does include a          |                 |        |
| in each direction. The center lane would also   | continuous 14-foot turn lane. We apologize that the         |                 |        |
| definitely need several hundred feet of length  | description did not indicate that. The description has      |                 |        |
| so that during the snow season there is   | been updated to read: "Widen State Highway 21 from          |                 |        |
| enough room to safely slow down from 55mph.   | Technology Way (near Micron) to Surprise Way (just west     |                 |        |
| No matter what the solution ends up being the   | of the Boise River Bridge) in the City of Boise. The        |                 |        |
| goal must be to allow cars to safely slow down  | project will include two 12-foot travel lanes, a continuous |                 |        |
| for a left turn without risking a rear end  | 14-foot center turn lane, and two 6-foot shoulders."        |                 |        |
| collision or slowing everyone down to a stop.   |   |                 |        |
| For Westbound traffic it would also be  | The Idaho Transportation Department will review your        |                 |        |
| extremely beneficial to have a dedicated turn   | inquiry about possibly reducing the speed limit.            |                 |        |
| lane on to Alta Ridge for those turning right   |   |                 |        |
| after coming up the hill. This, again, would  |   |                 |        |
| allow cars to safely slow down to a reasonable  |   |                 |        |
| turning speed without affecting the other cars  |   |                 |        |
| behind or risking a rear end collision in the   |   |                 |        |
| snow season.  |   |                 |        |
| We don't need that much excess capacity   |   |                 |        |
| that two lanes (or wider lanes) in each   |   |                 |        |
| direction would provide but we do need safe   |   |                 |        |
| ways to turn off of (and maybe even on to) Hwy 21 without risking damage or safety.           |   |                 |        |
| The proposed plans do not help the safety   |   |                 |        |
| situation. The shoulders don't solve the  |   |                 |        |
| problem of a single car having to stop  |   |                 |        |
| completely while waiting for a gap in opposing  |   |                 |        |
| traffic to turn onto Alta Ridge. The larger   |   |                 |        |
| shoulders do not solve the problem, the center  |   |                 |        |
| median don't solve the problem, and the one   |   |                 |        |
| thing (a full on center lane) isn't even  |   |                 |        |
| mentioned.  |   |                 |        |
| I strongly encourage someone from the   |   |                 |        |
| planning agency to come talk to every single  |   |                 |        |
| house of the Legend Ridge community (Alta   |   |                 |        |
| Ridge, Heartleaf Drive, and all the off shoot   |   |                 |        |
| streets) so that the situation can be properly  |   |                 |        |
| understood. If congestion is the thing that is  | 168   |                 |        |

| being solved then it must be understood that it  |   |                 |        |
| is only congested because of the times when  |   |                 |        |
| people have to stop, or nearly stop, traffic to  |   |                 |        |
| safely turn on to Alta Ridge. Anything that is   |   |                 |        |
| done that does not solve that problem is   |   |                 |        |
| entirely a waste of funds! The residents of  |   |                 |        |
| Legend Ridge are part of the Boise community and contribute a lot to taxes (especially |   |                 |        |
| property taxes) and we deserve access in and   |   |                 |        |
| out of our street to be safe for us and for  |   |                 |        |
| everyone using Hwy 21. As it stands now  |   |                 |        |
| there have been far too many accidents and   |   |                 |        |
| too many times we have been at a stop and  |   |                 |        |
| watching with held breaths wondering if the  |   |                 |        |
| person behind us is actually going to stop or if                                       |   |                 |        |
| they won't notice the brake lights or realize  |   |                 |        |
| that it is icy and ram into us.  |   |                 |        |
| Center turn lane for East bound, right turn  |   |                 |        |
| lane for west bound, and maybe even a merge  |   |                 |        |
| lane going westbound for people exiting  |   |                 |        |
| Legend Ridge. These are the things that will   |   |                 |        |
| reduce congestion and contribute greatly to  |   |                 |        |
| safety. Please pay attention and solve the real  |   |                 |        |
| problem and not spend a lot of time and  |   |                 |        |
| money (because we know whatever is done  |   |                 |        |
| will take the better part of two years to  |   |                 |        |
| accomplish) on things that won't help the  |   |                 |        |
| problem.  Key #: 20428 - widening highway 21 from T                                    | Thenk you for your comments. Your comments will be  | Jared Adams     | Online |

| speeding up to you until it is too late. You   |   |                 |        |
| either have to gun it onto the highway or you  |   |                 |        |

| (The comments below are verbatim, as submitted by the commenter. As such, typographical errors have not been corrected.)   | Staff Response | Name, Zip Code,<br>Affiliation | Format |
|--|----------------|--------------------------------|--------|
| make them slow down as they come upon you (road rage waiting to happen).   |                |                                |        |
| 2. Please add a dedicated turn lane from the highway into our subdivision. A 4 food wide center meridian with an opening into our subdivision is not sufficient. It is extremely dangerous to turn left into our subdivision when you make drivers slow down from 55+to 0. Many times they try to go around you onto the dirt edging, several months back I was turning left Waiting for traffic the opposite direction to clear when a car came fast upon me, slammed on their breaks and the car behind them did not have time to stop and slammed into them and they went careening off the side of the road. The speed limit HAS TO CHANGE! And for public safety there has to be a dedicated turn lane much like the turn into Columbia village just down the road before the bridge.     |                |                                |        |
| 3. Please make this widening extension into the BLM Land and not take up any space into our subdivision. The road noise is already really bad. Putting the vehicles closer to our subdivision will make the noise even worse. Slowing the speed down will also help the road noise.  |                |                                |        |
| 4. Perhaps the center meridian will solve this problem, but there should not be a passing lane going too or from the entrance of our subdivision. When I moved in a few years ago, I almost got in a head-on with a car passing in The opposite lane in front of our subdivision. It is a dashed yellow line, not solid. When turning right, since it is difficult to see fast moving traffic coming up the hill, you focus most your attention looking to the left, you assume no one is coming from the Right, so when you pull out, that is when you notice cars passing. In my case I swerved off the side of the road just missing the head on collision. Please make solid yellow or no passing meridians to prevent this from happening. Note: we only have one in trance in and out of |                |                                |        |
| our subdivision.   |                |                                |        |

| Dear IDT, I am writing you as a resident of the Superior Ridge I subdivision and would like for you to please consider adding a center turn lane for project #20428 (SH-21, Technology Way to Surprise Way, Boise). I have lived at E. Alta Ridge since year 2000 and over the years have seen many residence have very close calls getting rear ended turning off the highway into our sub-division. Also as our city growth rate continues to rapidly increase it is getting much harder to pullout of our subdivision due to the heavy traffic on HWY 21. Turning east bound on the weekend is very difficult. If we had a center lane it would be much easier to turn out into the center lane and then continue to merge as traffic permits. Please consider the safety of the residence living in both Superior Ridge I and II as you proceed with the build out of this project. With the planned 4 ft median it would seem like making some modifications to the current plan to change this median to an 8ft center lane could be considered. Thank you for allowing me to provide feedback and I hope you will please take this into consideration. | Thank you for your comments. Your comments will be shared with the COMPASS Board of Directors, the Idaho Transportation Department, and the City of Boise.  Key Number 20428 (State Highway 21) does include a continuous 14-foot turn lane. We apologize that the description did not indicate that. The description has been updated to read: "Widen State Highway 21 from Technology Way (near Micron) to Surprise Way (just west of the Boise River Bridge) in the City of Boise. The project will include two 12-foot travel lanes, a continuous 14-foot center turn lane, and two 6-foot shoulders."  The Idaho Transportation Department will review your inquiry about possibly reducing the speed limit. | Shawn Gunter<br>83716          | Online |
| Letter from the Ada County Highway District attached at the end of this table.  | Thank you for your comments. They will be provided to the COMPASS Board of Directors, Ada County, the Idaho Transportation Department, the City of Boise, and the City of Meridian.   | 83714                          | Letter |

| Comr  | nents on changes to CIM  | 2040 2.0                       |        |
| Exit at Ustick. It is going to be 5 Lanes wide without an large ingress-egress route to the interstate. It is just creating a corridor to be clustered up with all the 4 way stop idaho likes to put in. Creating back ups at each mile causing more expensive redesigns to elevate traffic in Congestion areas (Northside). The road need to be designed to accommodate rush hour traffic. All this money is wasted on these projects if the Treasure valley turns into a small LA and 2 hr commutes are the norm. Plan for the busy times and the rest will work out. The last 3 yrs I have seen the congestion issue first hand with my commute into Nampa from Payette. Accidents on the interstate can completely clog 5 miles of traffic. Before Covid-19 an accident was happening in that corridor almost twice a week. It takes 25 min to drive from the Oregon border to Middleton, then traffic makes the next 10 miles take another 25 min. one fender bender it adds 10-20 more mins, increase the ability to exit the interstate between Caldwell and Nampa before development requires it. | Thank you for your comments. They will be provided to the COMPASS Board of Directors, the Idaho Transportation Department, and the Cities of Caldwell and Nampa.   | Kyle Schab<br>83661            | Online |
| I believe a light rail system that connects downtown Boise to Eagle, Meridian, and so forth should be in this plan.  This area continues to treat 'roads' like 'expressways'. It costs all of us constantly to  | Thank you for your comments. They will be provided to the COMPASS Board of Directors and the Cities of Boise, Eagle, and Meridian.  COMPASS also recently updated a 2009 High Capacity Transit Study on passenger rail connecting Caldwell and Boise (find the link here: <a href="https://www.compassidaho.org/documents/planning/studies/Treasure Valley High Capacity Transit Study 2020">https://www.compassidaho.org/documents/planning/studies/Treasure Valley High Capacity Transit Study 2020</a> Update Final0907.pdf). COMPASS will solicit public feedback on high capacity transit options via a survey in early 2021.  Thank you for your comments. They will be provided to the COMPASS Board of Directors and Valley Regional | 83616                          | Online |
| repair these roads that were not originally planned to carry so much traffic, so many heavy vehicles, create so much dirt, dust and noise next to homes. That is a raised interstate or expressway. Why do we continue to pay for this instead of creating a N-S expressway for all of this load?   | Transit.  In <i>Communities in Motion 2040 2.0</i> , State Highway 16 is envisioned as a north/south limited access expressway from I-84 to Ada/Gem County line. The segment from I-84 to US 20/26 has funding for preliminary engineering and right-of-way purchase, all construction is currently unfunded.  |                                |        |

|--|---|--------------------------------|--------|
| I would like an app that makes it easy for me to see where the buses are at and also exactly how I get from point A to point B. like google maps in big cities or something similar. I'm here, how to get there.   | Thank you for your comments. They will be provided to the COMPASS Board of Directors and Valley Regional Transit.  Real time bus information is currently available through the Routeshout app. It can also be accessed through the VRT website. VRT is working with Routematch on getting real time information about our buses available on other platforms. Trip planning is also currently supported through Google trip planning and other transit applications. These options are also identified on the VRT website (http://valleyregionaltransit.org/).   | Monte Gerlach<br>83713         | Online |
| Compass has been very wrong in recent history with determining growthing in the valley and needing to fix roads more upgrade roads. I feel that the Ustick overpass should be made into an on and off ramp as well to accomodate growth and help lessen congestion on the Karcher overpass in Nampa and on the 20/26 overpass in Caldwell. SH55 should be widened to five lanes from Middleton Rd to Farmway Rd. Would be nice to have more buses more frequently going back and forth between Ada and Canyon counties. Maybe look at developing plans for passenger rail to help reduce traffic at rush hour. | Thank you for your comments. Your comments will be shared with the COMPASS Board of Directors, the Idaho Transportation Department, and the City of Caldwell.  The I-84, Ustick Road Overpass is currently scheduled for replacement in FY2022. An interchange at this location is not anticipated.  The widening of SH-55 from Pear Lane to Indiana Avenue is #4 of the unfunded state system priorities in Communities in Motion 2040 2.0.  COMPASS also recently updated a 2009 High Capacity Transit Study on passenger rail connecting Caldwell and Boise (find the link here:  https://www.compassidaho.org/documents/planning/studies/Treasure Valley High Capacity Transit Study 2020  Update Final0907.pdf). COMPASS will solicit public feedback on high capacity transit options via a survey in early 2021. | 83607                          | Online |
| PLEASE provide a sidewalk alongside Eagle between Ustick and the Village. On either side of the road one encounters "no sidewalk" and must walk on the shoulder with traffic 55 mph two or three feet away; bicycles and strollers make me shudder.  | Thank you for your comments. Your comments will be shared with the COMPASS Board of Directors, the Idaho Transportation Department, and the City of Meridian.   | 83646                          | Online |

| The project Key number is: Key #: 20428 *A center turn lane is needed for the safety of our residents sure to the high volume of traffic on Highway 21 (previous accidents have happened). *Can the speed be reduced to 45MPH past our street? *A center turn lane is desperately needed since have no other safe alternative entering/exiting our street.   | Thank you for your comments. Your comments will be shared with the COMPASS Board of Directors, the Idaho Transportation Department, and the City of Boise.  Key Number 20428 (State Highway 21) does include a continuous 14-foot turn lane. We apologize that the description did not indicate that. The description has been updated to read: "Widen State Highway 21 from Technology Way (near Micron) to Surprise Way (just west of the Boise River Bridge) in the City of Boise. The project will include two 12-foot travel lanes, a continuous 14-foot center turn lane, and two 6-foot shoulders."  The Idaho Transportation Department will review your inquiry about possibly reducing the speed limit. | 83716                          | Online |
| A center turn lane is needed at all road/street intersections with Highway 21: this is a dangerous roadway with vehicles traveling in excess of speed limit of 55 MPH. A 4 foot center median will not be wide enough to handle the issue.   | Thank you for your comments. Your comments will be shared with the COMPASS Board of Directors, the Idaho Transportation Department, and the City of Boise.  Key Number 20428 (State Highway 21) does include a continuous 14-foot turn lane. We apologize that the description did not indicate that. The description has been updated to read: "Widen State Highway 21 from Technology Way (near Micron) to Surprise Way (just west of the Boise River Bridge) in the City of Boise. The project will include two 12-foot travel lanes, a continuous 14-foot center turn lane, and two 6-foot shoulders."  The Idaho Transportation Department will review your inquiry about possibly reducing the speed limit. | 83716                          | Online |
| I prefer that the roads are not widened. Please spend money on community transportation, protected bicycle lanes, and pedestrian improvements. Look to areas of Europe for ideas instead of congested areas in California. Making more space for traffic increases speed and congestion. We love our neighborhoods when roads don't get wider. People will choose to live near places that they usually drive if we keep narrower calmer roadways. Neighborhoods will be designed to meet the needs of people living within them. It is fine to have the interstate highway just leave the wide big roads out of the city. | Thank you for your comments. They will be shared with the COMPASS Board of Directors.   | Debi K<br>83702                | Online |
| I would like to see a 3-4 times a day shuttle from points in the western part of the Treasure Valley to the Boise Airport.   | Thank you for your comments. They will be provided to the COMPASS Board of Directors and Valley Regional Transit.   | 83686                          | Online |

| What would the cost be to repave sections of the greenbelt that are very rough and bumpy?   | Thank you for your comments. They will be shared with the COMPASS Board of Directors.   | 83703                          | Online |
| Can we include that on the spending list?   | To repave 11' wide pathway with 2.5" thickness costs about \$46/foot of pathway. This cost includes additional components such as tree removal, root cutting, fence removal and rebuilding, hydrant relocation, etc. <i>Communities in Motion</i> doesn't list individual maintenance projects (which this would be) even when they use federal funds.  |                                |        |
| Support dropping expansion to seven lanes on both Fairview and Overland. While useful, other items seem to have a higher priority.  | Thank you for your comments. They will be shared with the COMPASS Board of Directors.   | 83709                          | Online |
| Project Key 20428: SH- Technology Way to Surprise Valley. The proposed four foot median is not a safe or sufficient improvement. HWY 21 is dangerous and deadly. Please listen. With the growing sprawl of Southeast Boise (the ever-expanding Harris Ranch area and the subdivisions off Columbia Road behind Micron in particular), many more people are using Highway 21. I live on Alta Ridge Court off Highway 21. Over the past eight years my subdivision, Legend Ridge, has nearly doubled in the number of homes and drivers that access Highway 21. Turning left or right onto Highway 21 from Alta Ridge is treacherous. Oncoming cars on Highway 21 are often traveling sixty or more miles per hour. Please add a turn lane on Highway 21. The proposed four foot median is not a sufficient improvement. There already have been fatal accidents in this corridor of Highway 21 in 2016 and 2018. I've also had several instances where I've been in near collisions with speedy cars that drive around me while I'm waiting for a clear left turn onto my street. This section of Highway 21 is dangerous. How many more people need to die for ACHD to listen?  http://www.ktvb.com/article/news/local/man-killed-in-highway-21-motorcycle-crash-identified/277-197365078\  https://www.ktvb.com/article/news/local/boise-teen-dies-after-idaho-21-collision/277-534283359  I don't want any more deaths or near deaths in my neighborhood. | Thank you for your comments. They will be shared with the COMPASS Board of Directors, the Idaho Transportation Department, and the City of Boise.  Key Number 20428 (State Highway 21) does include a continuous 14-foot turn lane. We apologize that the description did not indicate that. The description has been updated to read: "Widen State Highway 21 from Technology Way (near Micron) to Surprise Way (just west of the Boise River Bridge) in the City of Boise. | I will be submitting comments on the Ustick Road, Ten Mile Road to Linder Road, Meridian Key#: RD207-24. I'm a resident of the Bridgetower Homes that are located in the square mile bordered by Ustick, Ten Mile, McMillan, and Linder roadways in Meridian. My home at W. Primeland Drive, is an original Phase I property that is closest to the Main Bridgetower entrance at Towerbridge and Ustick. Since we purchased our home in 2010, we haved experienced dramatic increases in the track at this intersection. During the evening commute traffic heading West on Ustick between Linder and Ten Mile because it is only a 2-lane road, traffic often is backed up from the traffic signal at Ten Mile all the way back to Linder. Heaven forbid we try to exit our tract from Towerbridge onto Ustick during these times! And now Owyhee High School will be opening in the Fall of 2021 about 2 miles to our West which will certainly make matters worse. In addition, there is currently no Bike Lane on Ustick because of the narrow roadbed caused by Ustick being paralleled on its Northside by Five Mile Creek. Whenever a bicyclist is riding on this section of Ustick, it is extremely unsafe with the current level of daily traffic. This project has been delayed and rescheduled several times and I believe that any further delay in scheduling this project beyond 2021, should be seriously reevaluated. Thank you for your consideration. | Thank you for your comments. They will be shared with the COMPASS Board of Directors, the Ada County Highway District, and the City of Meridian. | David Foster<br>83646 | Online                    |
| I am concerned as to how these surveys relate to municipality decision making inasmuch as, although the survey results in all cases confirm our neighborhood's position, yet the comprehensive plan developed by the City of Meridian contradicted our preferences in almost all ways, e.g. homes on larger lots,   | Thank you for your comments. They will be shared with the COMPASS Board of Directors and the City of Meridian.                                   | 83642                 | Hard Copy Comment<br>Form |

| study similar to the Northside Boulevard  | the COMPASS Board of Directors, the Idaho             | Mellin Properties Limited               |        |
| (Karcher Road to Birch Lane)'s "Complete  | Transportation Department, and the City of Boise.     | Partnership                             |        |
| concept and start the National Environmental  |   | 83709                                   |        |
| Policy Act (NEPA) alternative analysis study  |   |   |        |
| " for \$250,000. That would be to develop a   |   |   |        |
| study to place an interchange on I-84 at Five   |   |   |        |
| Mile Road with the same low level of early  |   |   |        |
| study money to be made. ACHD's Integrated   |   |   |        |
| Five Year Work Plan 2021-25 has a project to  |   |   |        |
| widen Five Mile Road from Overland Road to  |   |   |        |
| Franklin Road with design to be in 2023 and   |   |   |        |
| with the overpass cost to be by the Idaho   |   |   |        |
| Department of Transportation. The large   |   |   |        |
| distance of four miles between interchanges is  |   |   |        |
| likely greatly excessive in an urban area. It   |   |   |        |
| appears the standard distance is two miles  |   |   |        |
| from East Boise at Broadway Avenue for 21   |   |   |        |
| miles to the Karcher Road Interchange. (That  |   |   |        |
| is with the future connection of Idaho Highway  |   |   |        |
| 16 near McDermott Road.) It seem much   |   |   |        |
| beyond time for the City of Boise to stand up   |   |   |        |
| and advocate for their west side residents.   |   |   |        |
| Other towns are capturing the potential west  |   |   |        |
| side Boise development. The congestion on the four mile distance interchanges at Eagle Road |   |   |        |
| and the Cole Road areas seems very great and  |   |   |        |
| has the potential to become much greater with   |   |   |        |
| more development in these areas. Any study  |   |   |        |
| would seem, of course, limit Boise city center  |   |   |        |
| inbound users to their current routes because   |   |   |        |
| of lane cross-over constraints; however, I-184  |   |   |        |
| connector outbound users could be greatly   |   |   |        |
| benefitted as well as the nearby I-84 main  |   |   |        |
| road users. IN SUMMARY - Time is of essence   |   |   |        |
| because of the Five Mile overpass early rebuild   |   |   |        |
| design study in 2023. So again it beyond time   |   |   |        |
| for the City of Boise's leaders and other local   |   |   |        |
| leaders to get behind this west side Boise need   |   |   |        |
| that was first shown in a January, 1981, ITD  |   |   |        |
| interchange study.  |   |   |        |

| PLEASE provide a sidewalk alongside Eagle between Ustick and the Village. On either side of the road one encounters "no sidewalk" and must walk on the shoulder with traffic 55 mph two or three feet away; bicycles and strollers make me shudder.  | Thank you for your comments. They will be shared with the COMPASS Board of Directors. | 83646                          | Online |  |  |  |  |  |
| That's a lot of information to digest. Keeping things simple, if we encourage people to ride bikes instead of drive automobiles not only will that result in an IMPROVEMENT to air quality (unless those automobiles are run on 100% renewable energy), it will also result in a healthier population and community. | Thank you for your comments. They will be shared with the COMPASS Board of Directors. | 83703                          | Online |  |  |  |  |  |

|---|---|--------------------------------|---------------------------|
| This is probably the most important way in which our input (approximately 40 families) aligns with COMPASS concerns but which have been ignored or dismissed in planning during the last two years. Our subdivision of 50 acres has abundant, mature, diverse trees and open space, yet the City has projected in its FLOM replacing us with the commercial development. We believe this will destroy the great advantage and contribution our land currently adds to air quality. Could COMPASS please give us some attention in this overall process? | Thank you for your comments. They will be shared with the COMPASS Board of Directors and the City of Meridian.  COMPASS doesn't have authority for zoning or other land use decisions. COMPASS has designed the development review tool for local governments to evaluate whether land developments are consistent with the goals of Communities in Motion 2040 2.0 (CIM 2040 2.0). This checklist is not intended to be prescriptive, but rather a guidance document based on CIM 2040 2.0 goals. https://www.compassidaho.org/dashboard/devreview.htm | 83642                          | Hard Copy Comment<br>Form |

Mary May, President Kent Goldthorpe, Vice-President Rebecca W. Arnold, Commissioner Sara M. Baker, Commissioner Jim D. Hansen, Commissioner

September 9, 2020

Matt Stoll, Executive Director COMPASS 700 NE 2<sup>nd</sup> St., Ste. 200 Meridian, ID 83642

Dear Mr. Stoll:

ACHD appreciates the opportunity to comment on the DRAFT FY2021-2027 Regional Transportation Improvement Program (TIP). COMPASS' support of Ada County transportation projects through grants, federal funding, and planning is also greatly appreciated by ACHD. The draft TIP supports the Communities in Motion 2040 funding policy by dedicating a steady funding source for maintenance and Americans with Disabilities Act (ADA) projects within the Boise Urbanized Area. ACHD has found that these types of projects are an efficient and effective use of federal dollars, and support ACHD's efforts to sustain the public's infrastructure in a "very good" condition for motorists, cyclists and pedestrians. The TIP aligns with the ACHD Strategic Plan and supports ACHD's Capital Improvements Plan (CIP) by freeing up local dollars for capacity improvement and Community Programs projects.

ACHD offers the following specific comments on projects added to, or advanced in the draft FY2021-2027 TIP:

- The advancement of all FY2027 Roadway and ADA Improvement Part 1 and Part 2 projects (ORN22816 and ORN22817) supports ACHD's efforts to use federal funds to maintain the Ada County roads.
- The addition of three ITD pavement preservation/restoration projects supports the region's need to maintain its roads. The three Microseal projects on, Front/Myrtle/Broadway, Boise FY2022 (ORN22677, SH-55(Eagle Road), I-84 to SH-44 Meridian to Eagle (ORN22665) and SH-69, Pavement Preservation, Kuna to Meridian are all state routes that support the local network. ACHD is also pleased to see the addition of an I-84 Bridge repair project (KN 20405) that helps maintain the region's bridges.
- ACHD fully understands the necessity to sometimes delay large, complex projects like the State
  Tax Anticipated Revenue (STAR) capacity improvement project on US 20/26 from SH-16 to
  Linder Road (KN 21858). When completed in FY2021, this \$24 million project will benefit the
  residents of north Meridian and help share the traffic load on parallel ACHD roadways.
- The addition of the SH-44 (State Street), Palmer Lane Intersection Improvements project (ORN22718) supports the efficient operation of SH-44 and the local street network in the growing city of Star.

- The support of ACHD's Commuteride public outreach efforts is valuable for current and future commuters of the Treasure Valley. ACHD appreciates COMPASS' support through the advancement of ORN22386 and the addition of ORN22738.
- The new 5339 Small Urban funding project titled "Commuteride, ACHD, Van Replacements, Canyon County", will help Commuteride replace vans that have exceeded their useful life.
- ACHD welcomes the addition and highlighting of locally funded and regionally significant ACHD road capacity projects on Fairview Avenue, Locust Grove road to SH-55 (RC0133), Roadway and ADA Improvements, Part 3 (ORN22927) and Ustick Road, Ten Mile Road to Linder Road, Meridian (RD207-24).
- The funding of ACHD's Bicycle Improvements, Signs and Pavement Markings, Ada County (ORN22995) project will benefit cyclists with some of the first low-stress bikeways, based on ACHD's approved Roadways to Bikes plan.

The fiscal uncertainty of the FY2021 federal fiscal year prompts the need for continued good planning and cooperation. ACHD appreciates COMPASS' efforts to update the Treasure Valley's Regional Transportation Improvement Program, and COMPASS' oversight of the region's federal funds. ACHD will continue to work with its city and county partners, COMPASS and ITD to maintain the network and plan for necessary capacity improvements in growth areas across the county.

Thank you for the opportunity to provide these comments.

If you have any questions, please feel free to contact Tom Ferch, Transportation Funding Coordinator, at <a href="mailto:tferch@achdidaho.org">tferch@achdidaho.org</a> or 208-387-6157.

Sincerely,

ACHD Commission President

Cc: COMPASS Executive Committee

# **APPENDIX D: PERFORMANCE MEASURE ANALYSIS**

Provides in-depth analysis, using modeling tools, to explain how projects in the TIP will affect the transportation system.

### **Travel Demand Forecast Model**

COMPASS is responsible for the development, maintenance, and application of the regional travel demand forecast model covering Ada and Canyon Counties. An indepth analysis of the impact of major capital expansion projects programmed in the TIP on the state system was conducted using this model. A map showing the projects included in the analysis is shown in Figure 15 (segments included in the analysis are shown in blue; referred to as "NHS-State"); results are shown in Figures 16 through 21.

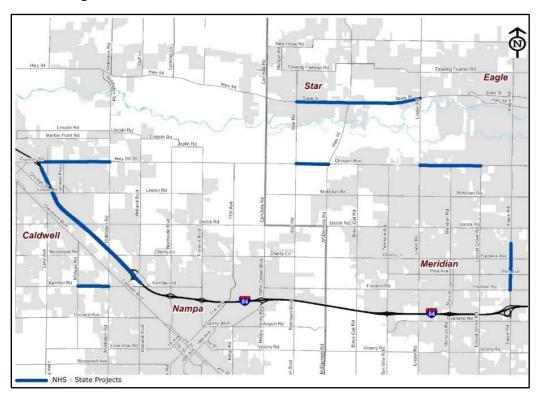

Figure 15: NHS-State System Capital Projects

COMPASS applied the regional travel demand forecast model to analyze how these projects could benefit regional transportation system by the year 2040. Figures 16 through 21 summarize vehicle hours of travel (VHT), congested vehicle miles of travel (CVMT), and vehicle miles of travel (VMT) for the overall system with and without the projects shown above. An assumption used in this analysis was that all other projects anticipated to be built by 2025 are constructed as scheduled. Projects programmed beyond 2025 are not included in this analysis. This analysis uses the official demographic data sets for the years of analysis. The population in Ada and Canyon Counties is forecasted to increase from 737,790 to 1,044,491 between 2020 and 2040.

Figure 16 demonstrates that regional VHT decreases by 4,360 hours per average weekday by 2025 if these projects are built as compared to if they *are not* built. By 2040, hours decrease by 11,070 per day when these projects *are* included.

Figure 17 demonstrates that the most significant benefit to building these segments is congestion relief. By 2025, the CVMT decrease by 226,300 per average weekday. However, by 2040, CVMT are reduced by more than 1.27 million on the entire transportation system because of these projects.

Figure 18 demonstrates VMT increase if these projects are built. VMT increases by 9,600 per average weekday by 2025, but only increases by 11,800 miles by 2040. The reason for the increase in miles of travel is because people are willing to travel a little farther for a more reliable and less congested route.

Another way to review the benefits of these projects is to look at the benefits within these corridors only; in other words, looking only at the travel on the specific segments that are being widened.

Figure 19 demonstrates that VHT on the scheduled NHS segments would be reduced by constructing the NHS projects. By 2025, VHT would decrease by 1,300 hours per average weekday, but these segments would realize a reduction of 3,630 hours of travel by 2040.

Figure 20 demonstrates that congestion is reduced significantly by constructing the NHS segments. By 2025, CVMT within the limits of the NHS projects decrease by 11,400 per average weekday. By 2040, CVMT within these same corridors decrease by 413,700.

Figure 21 shows the opposite when demonstrating total VMT. By 2025, VMT increase by 106,600 per average weekday. By 2040, VMT on these segments increase by 173,300. The reason for the increase in VMT is that people are willing to drive farther miles to take the less-congested route.

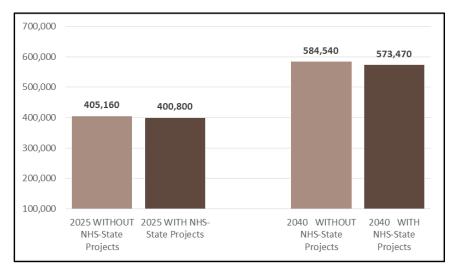

Figure 16: Vehicle Hours of Travel, Average Weekday, Overall System

### Crashes on the NHS

Another aspect of determining reliability of the NHS system is the rate of vehicle crashes, as crashes slow traffic and decrease reliability. These segments of the NHS system experience approximately one crash per day, on average. Figure 26 shows the locations of crashes between 2015 and 2019 on the NHS. Tables 31 and 32 provide the details of crashes over the last available five-years of data on the NHS-State system and also specifically on Interstate 84.

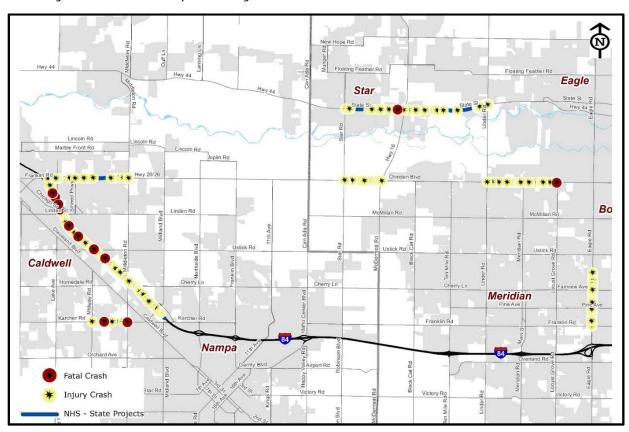

Figure 26: Location of Fatal and Injury Crashes, 2015-2019 on the NHS-State Project Limits

Table 31: Crash Events by Severity and Vehicle Types Involved, NHS-State Project Limits, 2015-2019

As projects are completed, COMPASS will report on how travel times and the reliability of travel on the NHS change in the <u>Congestion Management Annual Report</u><sup>42</sup>.

### **Benefit-Cost Analysis**

COMPASS prepared a benefit-cost analysis (BCA) with <u>TREDIS</u><sup>43</sup> software using outputs from four travel demand model runs: two for the base scenario (current and future year) and two for the project scenario (also current and future year). The current year is 2025, which is the year the projects will be completed, and the

<sup>\*\*</sup> Other includes units reported as other, motorcycle, moped, farm equipment, hit and run, construction equipment, motorhome, etc.

<sup>\*\*</sup> Other includes units reported as other, motorcycle, moped, farm equipment, hit and run, construction equipment, motorhome, etc.

<sup>&</sup>lt;sup>42</sup> Congestion Management Process: http://www.compassidaho.org/prodserv/cms-intro.htm.

<sup>&</sup>lt;sup>43</sup> About TREDIS: <a href="https://tredis.com/about-us">https://tredis.com/about-us</a>

future year is 2040, which is the horizon year of the current long-range transportation plan, <u>CIM 2040 2.0</u>44.

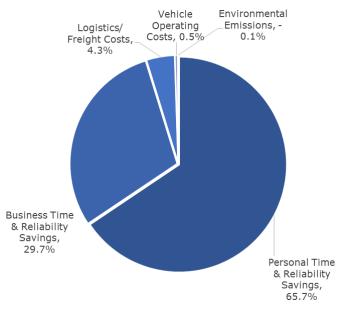

TREDIS requires input data including annual vehicle trips, VMT, VHT, and CVMT, and the fraction of internal, incoming, outgoing, and through trips, all of which are from the travel demand model.

Table 33 provides a summary of the BCA and Table 34 describes the benefits by category included in the BCA for the completion of NHS-State projects shown above and is for information only. This is not intended to be used for project selection, prioritization, or any other purposes. The NHS-State projects are already programmed in the TIP and some of them are underway.

Table 33: Summary of Benefit-Cost Analysis

| Benefits                            | 7% discount<br>rate<br>(in \$millions) |
|-------------------------------------|--|
| Vehicle Operating Costs             | \$6.9                                  |
| Business Time & Reliability Savings | \$442.5                                |
| Personal Time & Reliability Savings | \$979.8                                |
| Safety Benefits                     | reported separately                    |
| Environmental Emissions             | -\$0.8                                 |
| Logistics/Freight Costs             | \$63.5                                 |
| Total Benefits                      | \$1,491.9                              |

| Costs                              | \$millions |
|------------------------------------|------------|
| Capital Investment Costs           | \$209.6    |
| Operation and Maintenance<br>Costs | -\$9.4     |
| Total Costs                        | \$200.2    |
| Summary                            |            |
| Net Present Value                  | \$1,291.7  |
| Benefit-Cost Ratio                 | 7.45       |

<sup>&</sup>lt;sup>44</sup> Communities in Motion 2040 2.0: http://compassidaho.org/CIM2040-2.0/

Table 34: Description of BCA Analysis of NHS-State Projects

| Benefits                               | 7% discount (\$ in millions) | Narrative   |
|--|------------------------------|---|
| Total Benefits                         | \$4,491.9                    |   |
| Vehicle Operating Costs                | \$6.9                        | Vehicle operating costs (e.g., maintenance, tires, depreciation, and fuel) are affected by changes in vehicle miles traveled (VMT) and how much VMT occurs in congested conditions (causing higher fuel consumption). The completion of these projects contributes to an increase in VMT due to drivers traveling longer distance to access more efficient facilities, but reduces congested driving conditions, leading to a decrease in overall vehicle operating costs.  |
| Business Time and Reliability Costs    | \$442.5                      | Business time and reliability costs are two benefit categories associated with business (i.e., "on-the-clock") travel purposes and make up about 30% of the total benefit. Improved speeds on these corridors enable business-oriented travelers to reach their destinations faster and therefore provide a time savings benefit. Improvements in reliability also enable travelers to reduce the amount of "buffer" time (i.e., schedule padding) added into their planned trip to ensure an on-time arrival.  |
| Personal Time and Reliability<br>Costs | \$979.8                      | Personal time and reliability costs are two benefit categories associated with personal travel purposes and make up about 66% of the total benefits. Improved speeds on US 20/26 enable travelers to reach their destinations faster and therefore provide a time savings benefit. Improvements in reliability also enable travelers to reduce the amount of "buffer" time (i.e., schedule padding) added into their planned trip to ensure an on-time arrival.   |
| Safety                                 | Reported<br>separately       | Safety benefits (crash reductions) were not included in the BCA since they are part of the federal performance reporting. These projects are expected to reduce the overall number of crashes by 121 – see the safety federal performance measures in Section V.  |
| Logistics/Freight Costs                | \$63.5                       | The value of freight logistics cost savings is in addition to the values of savings in vehicle operating cost and driver time. The value of freight logistics cost represents the opportunity cost savings accruing to shippers and receivers related to freight handling, inventory/storage, and duration of delivery. Logistics/freight costs are affected by changes in vehicle hours traveled. Each commodity type has a unique cost reflecting the value industries place on travel time improvements expected to occur along these freight corridors. |

| Benefits                           | 7% discount (\$ in millions) | Narrative  |
|------------------------------------|------------------------------|--|
| Environmental Factors              | -\$0.8                       | Environmental benefits are directly affected by changes in VMT and congested conditions. Increases in VMT lead to higher emissions because vehicles consume more fuel as they travel longer distances. However, reductions in congestion reduce higher levels of emissions associated with stop-and-go traffic. These projects are expected to increase VMT but decrease traffic congestion. |
| Costs                              | 7% discount (\$ in millions) |  |
| Total Costs                        | \$200.2                      |  |
| Capital Investment Costs           | \$209.6                      |  |
| Operation and Maintenance<br>Costs | -\$9.4                       | Maintenance cost savings through the year 2040 are attributable to a mill/inlay on Interstate 84 and a pavement resurfacing, restoration, and rehabilitation (3R) treatment needed on both US 20/26 and State Highway 55 required in the "without" scenario. Combined, these maintenance projects cost \$19.1M.  |
| Benefit-Cost Ratio                 | 7.45                         | Benefit-Cost Ratio 7% discount rate for year 2040  |

A benefit-cost ratio over "1" is good. Therefore, it can be deducted from this analysis that the state projects on the NHS are a good value for the Treasure Valley.

Since projects on the interstate are significant for truck travel, additional analyses were conducted regarding how projects on these segments will affect travel throughout the region. These analyses included only the segments for which adequate data exist (Figure 27, marked in blue).

# Hey Ad Bay Star Star Suise BI Lincoln Rd Li

### Analysis for Level of Truck Travel Time Reliability on the Interstate System

Figure 27: Interstate Project Segments

### **Travel Demand Forecast Model**

COMPASS staff determined, through the travel demand forecast model, how scheduled projects on Interstate 84 (only) could benefit regional traffic flow. The model results below provide benefits to the overall system by adding only the specific corridors shown above. The population in Ada and Canyon Counties is forecasted to increase from 737,790 to 1,044,491 between 2020 and 2040.

Figure 28 demonstrates that VHT on the scheduled interstate segments would be reduced by constructing the projects. By 2025, VHT would be reduced by 630 hours. These segments would realize a reduction of VHT of 1,480 by 2040.

Figure 29 demonstrates that congestion is reduced completely by constructing the interstate segments. Even with a large population increase, the model shows no congested miles based on the configuration of the roadway.

Figure 30 again shows the opposite when demonstrating total VMT. By 2025, VMT increases by 26,300 miles. By 2040, VMT on these segments increases by 51,300 miles. The reason for the increase in VMT is because people are willing to drive further to take the less-congested route.

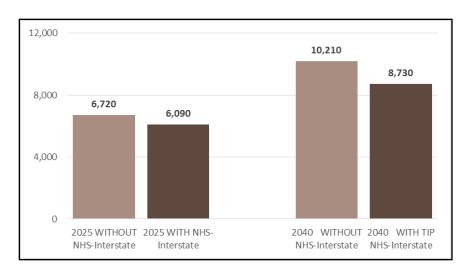

Figure 28: Vehicle Hours of Travel, Average Weekday, NHS Interstate Project Limits

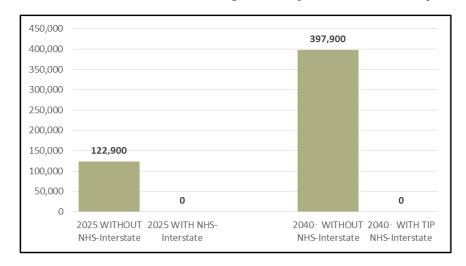

Figure 29: Congested Vehicle Miles of Travel, Average Weekday, NHS Interstate Project Limits

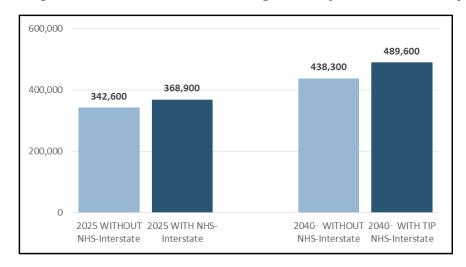

Figure 30: Vehicle Miles of Travel, Average Weekday, NHS Interstate Project Limits

### Crashes on the Interstate

As discussed for NHS projects (page 191), another aspect of determining reliability is the rate of vehicle crashes, since crashes cause delay and thus reduce reliability. The interstate system within the programmed segments experience a crash approximately every three days, on average.

Over 15% of crashes on NHS-State corridors between 2015 and 2019 occurred on Interstate 84 between Franklin Road in the City of Caldwell and State Highway 55/Karcher Road in the City of Nampa.

As projects are completed, COMPASS will report on how truck travel times and the reliability of travel on the interstate change in the <u>Congestion Management Annual Report</u><sup>45</sup>.

- Construction 1.32%
- Reconstruction/General Maintenance 61.45%
- Equipment 8.93%
- Administration 6.51%
- Other (property acquisition, design, etc.) 21.80%

Tables 39 through 44 provide summarized information projecting budgeting information for FY2020 - FY2025 extrapolated from the Road and Street Reports, using a five-year average of year-to-year changes in total income and total disbursement ratios.

The projections predict that some agencies will need additional funds to cover expected expenses, use reserve accounts, or remove projects in order to balance their budgets in the future.

Table 46 includes inflationary factors for the overall budget projections from FY2021-2025 for VRT. It is anticipated that, if inflation affects the overall system as predicted, additional funding will be needed for operations as well as capital replacements in order to maintain current service levels.

Revenue and expense projections are subject to change.

<sup>1</sup> Capital projects based on annual averages.

<sup>2</sup> Small Urban unfunded capital is due to local shortfall.

### Inflation is assumed as follows:

### • Revenue

- o Local contributions increase 2.7% each year
- o Fare box and other revenue increases 3% each year
- o Federal contributions increase 1% each year

### • Expenditures

- o Vehicle operations increase 2.7% each year
- o General operations increase 3% each year
- o Capital costs increase 3% each year

## **APPENDIX F: PRIOR YEAR PROJECTS**

Provides a list of projects that are still active, but no longer have budgeted funds. Projects could still need additional funding or release excess funding throughout the life of this program.

| Upgrade signals at the Midland Blvd. Union Pacific Railroad crossing.  22050 LOCAL, STODDARD PATH EXT PH 1, NAMPA 3 2020 Federal-Aid, Local Road System NAMPA PS&E (or equiv.) 532,783.0  The Stoddard City Pathway (lowa to Amity) project is an extension of the existing Stoddard Pathway located in Nampa, Canyon County. The current Stoddard Pathway is approximately 2-miles and connects neighborhoods to parks and schools in southeast Nampa. This extension would add approximately ½-mile to the paved trail starting at I lowa Avenue and ending at Amity Avenue.  22070 LOCAL, STODDARD PATH EXT PH 2, NAMPA 3 2020 Federal-Aid, Local Road System NAMPA PS&E (or equiv.) 539,066.0  The purpose of this project is to extend the Stoddard Pathway from Amity Avenue to Sherman Avenue. The Stoddard City Pathway (Amity to Sherman) extension will provide a safe route to Sherman Elementary, which is one of Nampa's highest needs school. Students and pathway users will be able to utilize an existing crosswalk with a Rapid Flashing Beacon at the Amity Avenue crossing. The project will also tie into the proposed Stoddard City Pathway (lowa to Amity), creating approximately 2 and ½ miles of continuous trail.  22076 OFFSYS, GRIMES CITY PATHWAY, NAMPA 3 2020 Federal-Aid, Local Road System NAMPA PS&E (or equiv.) 264,400.0  This project is on the Grimes Pathway between Birch Ln. and Karcher Rd and between Franklin Rd. and 11th Ave. It is located in Nampa, Canyon County. The southern section of the project begins by connecting to the existing Grimes Pathway in Sunset Oaks Park and extends north to Birch Ln.  22154 I 84, USTICK RD & MIDDLETON RD OVERPASSES, CANYON C 3 2020 State Funded Program STATE OF IDAHO (ITD) Development 5,804,298.0  Rebuild Middleton Rd. and Ustick Rd. overpasses at I-84 in Canyon Co.
