Communities in Motion 2040 Development Checklist

The Community Planning Association of Southwest Idaho (COMPASS) is the metropolitan planning organization (MPO) for Ada and Canyon Counties. COMPASS has developed this checklist as a tool for local governments to evaluate whether land developments are consistent with the goals of *Communities in Motion 2040* (CIM 2040), the regional long-range transportation plan for Ada and Canyon Counties. CIM 2040 was developed through a collaborative approach with COMPASS member agencies and adopted by the COMPASS Board on July 21, 2014.

This checklist is not intended to be prescriptive, but rather a guidance document based on CIM 2040 goals, objectives, and performance measures. A checklist user quide is available here; and more information about the CIM 2040 goals can be found here; and information on the CIM 2040 Vision can be found here.

Communities in Motion 2040 Complete Streets Scorecard

The purpose of this checklist is to provide a tool for local governments to evaluate whether land developments are in accordance with the goals of *Communities in Motion 2040* (CIM 2040). Complete Streets Level of Service (LOS) refers to the multimodal (automobile, bicycle, pedestrian, and transit) experience and grades a roadway (A-F) for each mode. COMPASS conducts Complete Streets Level of Service (CSLOS) analysis for developments on arterial roads.

	Mode	Existing	With bicycle lane and sidewalk		
		Link LOS	Link LOS		
McMillan Road	Transit	F	F		
Goddard Creek Way	Bike	D	В		
to Cortona Way	Ped	E	В		
Highway Capacity Manual 2010 Methodologies					

Walkscore: 39 Car-Dependent. Walkscore is a walkability index that assigns a numerical walkability on a scale from 0 - 100 based on walking routes to destinations such as grocery stores, schools, parks, restaurants, and retail. Scores of 50 or higher are considered at least "Somewhat Walkable" while scores less than 50 are "Car-Dependent."

Additional Comments:

The *Ada County Highway District Livable Street Design Guide* indicates that this section of McMillan Road is classified as a Residential Arterial with bicycle lanes and detached sidewalks. Bicycle lanes would improve Bicycle LOS from D to LOS B and a detached sidewalk would improve Pedestrian LOS from LOS E to LOS B.
