

Communities in Motion 2040 Development Checklist

The Community Planning Association of Southwest Idaho (COMPASS) is the metropolitan planning organization (MPO) for Ada and Canyon Counties. COMPASS has developed this checklist as a tool for local governments to evaluate whether land developments are consistent with the goals of *Communities in Motion 2040* (CIM 2040), the regional long-range transportation plan for Ada and Canyon Counties. CIM 2040 was developed through a collaborative approach with COMPASS member agencies and adopted by the COMPASS Board on **July 21, 2014**.

This checklist is not intended to be prescriptive, but rather a guidance document based on CIM 2040 goals, objectives, and performance measures. A checklist user guide is available [here](#); and more information about the CIM 2040 goals can be found [here](#); and information on the CIM 2040 Vision can be found [here](#).

Communities in Motion 2040 Complete Streets Scorecard

The purpose of this checklist is to provide a tool for local governments to evaluate whether land developments are in accordance with the goals of *Communities in Motion 2040* (CIM 2040). Complete Streets Level of Service (LOS) refers to the multimodal (automobile, bicycle, pedestrian, and transit) experience and grades a roadway (A-F) for each mode. COMPASS conducts Complete Streets Level of Service (CSLOS) analysis for developments on arterial roads.

Highway 69 (Meridian Road)	Mode	Existing	With attached sidewalk and bicycle lane	With detached pathway
		Link LOS	Link LOS	Link LOS
Columbia Road to Hubbard Road	Transit	F	F	F
	Bike	E	C	B
	Ped	F	D	D
Highway Capacity Manual 2010 Methodologies				

Walkscore: 0 Car-Dependent. Walkscore is a walkability index that assigns a numerical walkability on a scale from 0 - 100 based on walking routes to destinations such as grocery stores, schools, parks, restaurants, and retail. Scores of 50 or higher are considered at least "Somewhat Walkable" while scores less than 50 are "Car-Dependent."

Additional Comments:

Highway 69 (Meridian Road) is currently served by a Bicycle LOS of "E" and a Pedestrian LOS of "F." An attached sidewalk and bicycle lane would improve Pedestrian LOS from "E" to "C" and Bicycle LOS from "F" to "D." A separated or detached pathway would improve Pedestrian LOS to a "D." The detached pathway would also improve Bicycle LOS to a "B."
