Meet the Speaker

Sarah Williams

Sarah Williams, PE, MBA, is a Transit and Transit Oriented Development (TOD) Project Development Lead at the US Department of Transportation’s Build America Bureau.

She has over 14 years of experience in transportation and structural engineering, supporting outreach and project development activities for the Bureau’s rail, port, transit, and TOD programs.

Sarah has supported transportation and mobility go-to-market strategy development and served as a project/program manager with experience in stakeholder and team coordination, budgeting, scheduling, and other management responsibilities. She has provided project management oversight services on state, federal, private, and jointly funded transit/rail projects and has worked directly with state and federal departments of transportation, other transportation agencies, and a federal agency’s engineering group.

Additionally, Sarah led the development of asset management strategies for federal clients. She has a master’s in business administration from Loyola University, a master’s in structural engineering from University of Maryland, and a bachelor’s in structural engineering from Bucknell University.
