## MAJOR STREETS FOUR LINE STREETS

FOUR LINE THOROFARES WITH TRANSIT LINES INADEQUATE FOR MAJOR STREET PURPOSES. THERE SHOULD BE ROADWAY SPACE FOR AT LEAST ONE FREE MOVING LINE OF VEHICLES IN EACH DIRECTION.

NORMAL WIDTH 80'  
MINIMUM WIDTH 60'

ALL NEW MAJOR STREETS SHOULD HAVE A MINIMUM WIDTH OF 80 FEET. THE STREET SHOULD BE DEVELOPED SO THAT IT CAN ULTIMATELY BE WIDENED TO A 6 LINE THOROFARE AND PUBLIC UTILITIES SHOULD BE INSTALLED IN ACCORDANCE WITH FINAL DEVELOPMENT.

## SIX LINE STREETS

FINAL STAGE - FULL BUSINESS USE  
DOUBLE ROADWAY TYPES

# “Science” of Traffic Planning = Induce Driving

# Parking

But Which is **Cause**?

And Which is **Effect**?

Do we build more **parking** because **driving is increasing**?

Or does **more parking** lead to **more driving**?

According to repeated nationwide surveys,

# More Doctors Smoke **CAMELS** than any other cigarette!

Doctors in every  
branch of medicine  
were asked, "What  
cigarette do you smoke?"  
The brand named most  
was Camel!

You'll enjoy Camels for the same reasons  
so many doctors enjoy them. Camels have  
cool, cool *mildness*, pack after pack, and  
a *flavor* unmatched by any other cigarette.  
Make this sensible test: Smoke only  
Camels for 30 days and see how well Camels  
please your taste, how well they suit  
*your* throat as your steady smoke. You'll  
see how enjoyable a cigarette can be!

THE DOCTORS' CHOICE IS AMERICA'S CHOICE!

MAUREN O'HARA says: "I pick Camels. They agree with my throat and taste wonderful!"

DICK HAYMES states: "I get more pleasure from Camels than from any other brand!"

RALPH BELLAMY reports: "Camels suit my taste and throat. I've smoked 'em for years!"

S. J. Reynolds Tobacco Co.  
Winston-Salem, N. C.

For 30 days, test Camels in your "T-Zone" (T for Throat, T for Taste).

**Sir Austin Bradford Hill** (with Richard Doll) demonstrated the connection between **smoking and lung cancer**

The so-called **Bradford Hill Criteria** were formulated as a way to demonstrate a causal association

# Bradford Hill's Criteria For Assessing Causality

1. Strength of Association
2. Consistency
3. Specificity
4. Temporality
5. Dose Response (biological gradient)
6. Plausibility and Coherence
7. Experiment
8. Analogy

**Our study found that the majority of these criteria fit when applied to parking in cities**

# Hartford 2009

More parking induces more driving

*Hartford's property **tax** structure makes little sense.*

*By assessing vacant lots and surface parking lots at a much lower rate than commercial buildings, the city has encouraged the proliferation of what urban designers call "parking craters"*

MARK GOLDMAN

CITY  
ON  
THE  
EDGE

BUFFALO, NEW YORK

Buffalo, NY  
1950s

*“The city projected a need for 14,000 new spaces.*

*According to Mayor Joseph Mruk, not only would the city **build 3 parking garages** but would encourage private development of parking lots **by condemnation** and assembly of necessary sites.”*

From Mark Goldman’s City on the Edge

Buffalo, NY

*“The campaign to build parking spaces for 25,000 cars began in 1950 and 50 years later is **still ongoing**”*

From Mark Goldman’s City on the Edge

“The people of Buffalo watched as the fabric of their City came tumbling down. Falling with it was their history and their heritage and, unbeknownst to them, their future as well.”

## Hartford Eliminates Parking Minimums Citywide

By Angie Schmitt | Dec 13, 2017 |  29 COMMENTS

## *Hartford Set to Pass New **Parking** Ordinance*

Ordinance will impose new fee on Parking equivalent to 25 cents per space/day  
This fee will go to 50 cents in 2025 and \$1 in 2030

At current rate fee will raise about **\$2 million** annually

# Six Essential Rules for Effective Parking Management

1. Base decisions on actual data
2. Eliminate minimum parking requirements
3. Optimize the use of available parking
4. Recognize that free parking is not a thing
5. Eliminate/reduce subsidies for driving
6. Subsidize more sustainable forms of travel
