

# Communities in Motion 2040 2.0 Development Review

The Community Planning Association of Southwest Idaho (COMPASS) is the metropolitan planning organization (MPO) for Ada and Canyon Counties. COMPASS has developed this review as a tool for local governments to evaluate whether land developments are consistent with the goals of *Communities in Motion 2040 2.0* (CIM 2040), the regional long-range transportation plan for Ada and Canyon Counties. This checklist is not intended to be prescriptive, but rather a guidance document based on CIM 2040 2.0 goals.

**Development Name: Rosti Farms**

**Agency: Star**

**CIM Vision Category: Future Neighborhoods**

**New households: 469**

**New jobs: ±75**

**Exceeds CIM forecast: No**

	<p>CIM Corridor: <b>Highway 16</b>                  Pedestrian level of stress: <b>R</b>                  Bicycle level of stress: <b>R</b></p>	<p>Level of Stress considers facility type, number of vehicle lanes, and speed. Roads with <b>G or PG</b> ratings better support bicyclists and pedestrians of all ages and comfort levels.</p>
	<p>Housing within 1 mile: <b>730</b>                  Jobs within 1 mile: <b>250</b>                  Jobs/Housing Ratio: <b>0.3</b></p>	<p>A good jobs/housing balance – a ratio between <b>1 and 1.5</b> – reduces traffic congestion. Higher numbers indicate the need for more housing and lower numbers indicate an employment need.</p>
	<p>Nearest police station: <b>2.2 miles</b>                  Nearest fire station: <b>2.3 miles</b></p>	<p>Developments within <b>1.5 miles</b> of police and fire stations ensure that emergency services are more efficient and reduce the cost of these important public services.</p>
	<p>Farmland consumed: <b>Yes</b>                  Farmland within 1 mile: <b>1,167 acres</b></p>	<p>Farmland contributes to the local economy, creates additional jobs, and provides food security to the region. Development in farm areas decreases the productivity and sustainability of farmland.</p>
	<p>Nearest bus stop: <b>&gt;4 miles</b>                  Nearest public school: <b>2.9 miles</b>                  Nearest public park: <b>2.9 miles</b>                  Nearest grocery store: <b>2.3 miles</b></p>	<p>Residents who live or work less than <b>½ mile</b> from critical services have more transportation choices. Walking and biking reduces congestion by taking cars off the road, while supporting a healthy and active lifestyle.</p>

## Recommendations

The proposal would extend Floating Feather Road to Highway 16 (Emmett Hwy). Coupled with existing Floating Feather access location, this would add another access point within ¼ mile. Preserving access management on Highway 16, without increasing access points is necessary to promote efficiency and safety on this regional corridor. Work with the Idaho Transportation Department on an access plan for this proposal.

This location is on the fringe of urban development in an area removed from employment centers and public transportation. The closest bus route is more than four miles away and there are no plans for public transportation to this location. However, the neighborhood commercial area will help by decreasing the amount of single occupancy vehicle trips generated on the transportation network and by encouraging non-motorized travel as long as there are safe crossings of Floating Feather Road and internal connectivity.
