

# Meet the Speaker

## **Suseel Indrakanti**

Suseel Indrakanti is a Practice Lead (Principal) for Resilience and Sustainability at Cambridge Systematics, Inc. with 17 years of experience in climate risk and resilience assessments, transportation planning, and climate mitigation and adaptation. He has led multiple projects that focused on considerations of the impacts of severe weather in transportation planning and policy.

Indrakanti leads several national cooperative highway research projects on risk and resilience as a principal investigator and a core research team member. He also has experience supporting local, state, national, and international clients in the area of transportation system resilience and working with interdisciplinary groups of stakeholders. He is an alumnus of Boise State University with a Master of Civil Engineering.
