

Communities in Motion 2050 Development Review

The Community Planning Association of Southwest Idaho (COMPASS) is the metropolitan planning organization (MPO) for Ada and Canyon Counties. COMPASS has developed this review as a tool for local governments to evaluate whether land developments are consistent with the goals of *Communities in Motion 2050* (CIM 2050), the regional long-range transportation plan for Ada and Canyon Counties. This checklist is not intended to be prescriptive, but rather a guidance document based on CIM 2050 goals.

Development Name:

CIM Vision Category:

New Households:

Safety

Level of Stress measures how safe and comfortable a bicyclist or pedestrian would feel on a corridor and considers multimodal infrastructure number of vehicle lanes, and travel speeds.

- Pedestrian level of stress
- Bicycle level of stress

Economic Vitality

These tools evaluate whether the location of the proposal supports economic vitality by growing near existing public services.

- Activity Center Access
- Farmland Preservation
- Net Fiscal Impact
- Within CIM Forecast

Convenience

Residents who live or work less than 1/2 mile from critical services have more transportation choices, especially for vulnerable populations.

- Nearest bus stop
- Nearest public school
- Nearest public park

Quality of Life

Checked boxes indicate that additional information is attached.

- Active Transportation**
- Automobile Transportation**
- Public Transportation**
- Roadway Capacity**

Improves performance

Does not improve or reduce performance

Reduces performance

Public Transportation Infrastructure

Providing safe and comfortable transit stops and appropriate amenities can make public transportation a more convenient and competitive option, reduce the overall cost of housing + transportation, and expand the potential customer base for businesses.

While stop location and spacing will depend on the circumstances of the route, there are some general guidelines to improve the user experience:

Locate bus stop amenities in areas that are expected to generate the most ridership, such as near employment centers, residential areas, retail centers, education centers, or major medical facilities.

- ✓ Provide sidewalks and/or bike paths designed to meet the needs of all users (including elderly, children, and individuals with disabilities) to connect development to transit stops.
- ✓ Provide bicycle parking that includes covered bike racks at transit stops; ensure it does not conflict with vehicular or pedestrian travel.

Provide shelters, benches, trash receptacles, lighting, and landscaping to enhance the overall comfort and attractiveness of transit; ensure amenities do not block pathways, sidewalks, or bike lanes.

Join the Valley Regional Transit group pass program:

Use Valley Regional Transit's [Bus Stop Location and Transit Amenities Development Guidelines](#) for siting new bus stops and reviewing current and bus stops.

Transit - State Street Premium Corridor, Part 1, Boise Area, VRT

Regionally Significant: Inflated

Key #: 23178

Requesting Agency: Valley Regional Transit

Project Year: 2022

Total Previous Allocations: \$0

Total Programmed Budget: \$1,500

Total Cost (Prev. + Prog.): \$1,500

Project Description

Implement Part 1 of the State Street Premium Corridor improvements project in the Boise Urbanized Area. Project will improve infrastructure and pedestrian connections to public transportation on State Highway 44 (State Street) between State Highway 55 (Eagle Road) in the City of Eagle and downtown Boise. The enhanced bus stops will be compliant with the Americans with Disabilities Act, improve safety, and provide passenger amenities such as benches, distinct shelters, real-time information, off-board fare payment, lighting, and bicycle racks.

Transit - State Street Premium Corridor, Part 2, Boise Area, VRT

Regionally Significant: Inflated

Key #: 23179

Requesting Agency: Valley Regional Transit

Project Year: 2023

Total Previous Allocations: \$0

Total Programmed Budget: \$5,882

Total Cost (Prev. + Prog.): \$5,882

Project Description

Implement Part 2 of the State Street Premium Corridor improvements project in the Boise Urbanized Area. Project will include deployment of real-time information, off-board fare payment, raised platforms, and necessary pullouts to accommodate all bus stops along State Highway 44 (State Street) between State Highway 55 (Eagle Road) in the City of Eagle and downtown Boise. Improvements will also include bus stop and vehicle branding.

Fiscal Impact Analysis Supplemental for the Development Review Checklist

The purpose of the fiscal impact analysis is to better estimate expected revenues and costs to local governments as a result of new development so that the public, stakeholders, and the decision-makers can better manage growth. Capital and operating expenditures are determined by various factors that determine service and infrastructure needs, including persons per household, student generation rates, lot sizes, street frontages, vehicle trip and trip adjustment factors, average trip lengths, construction values, income, discretionary spending, and employment densities.

The COMPASS Development Checklist considers the level of fiscal benefits, how many public agencies benefit or are burdened by additional growth, and how long the proposal will take to achieve a fiscal break-even point, if at all. More information about the COMPASS Fiscal Impact Tool is available at: www.compassidaho.org/prodserv/fiscalimpact.htm.
