Life was good

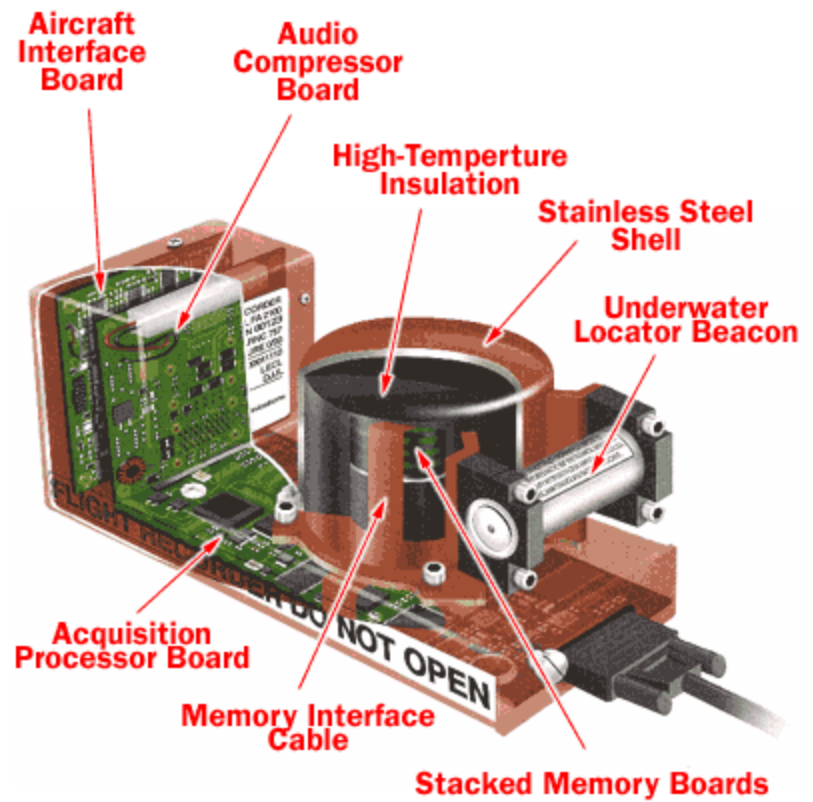

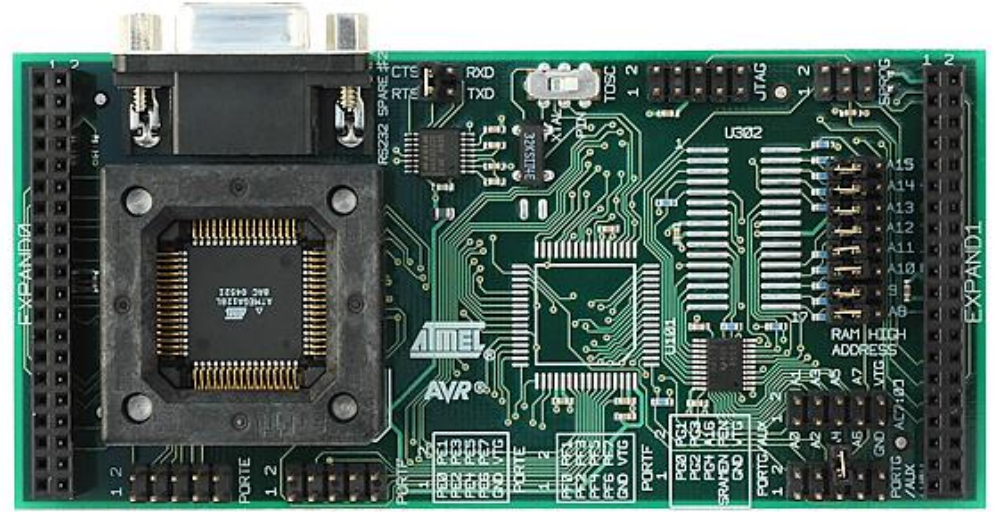

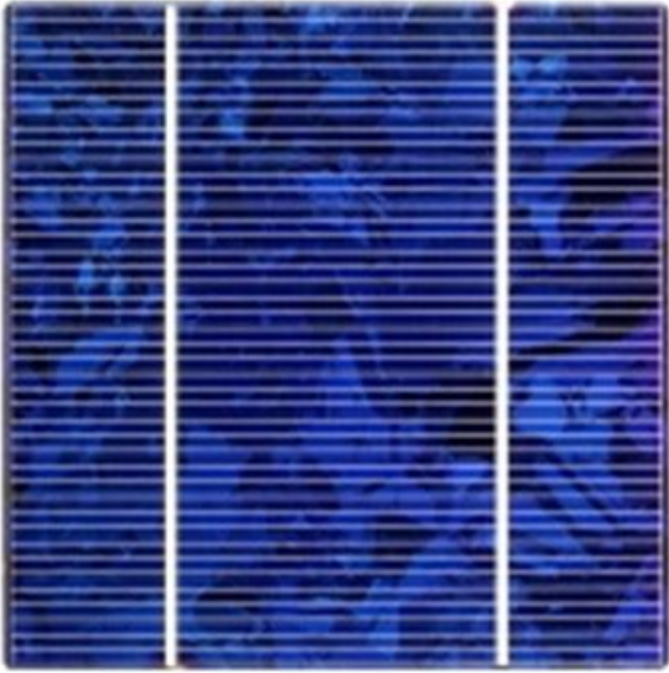

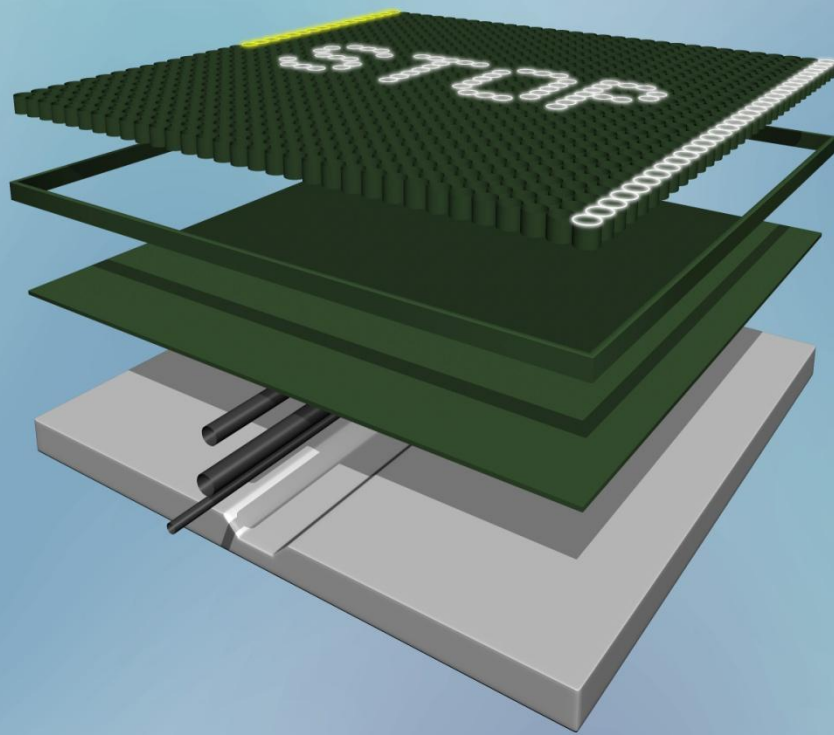

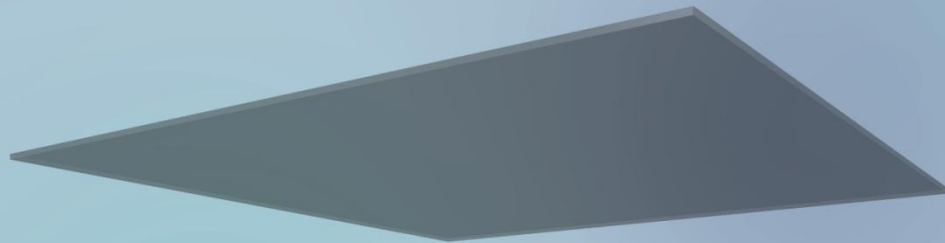

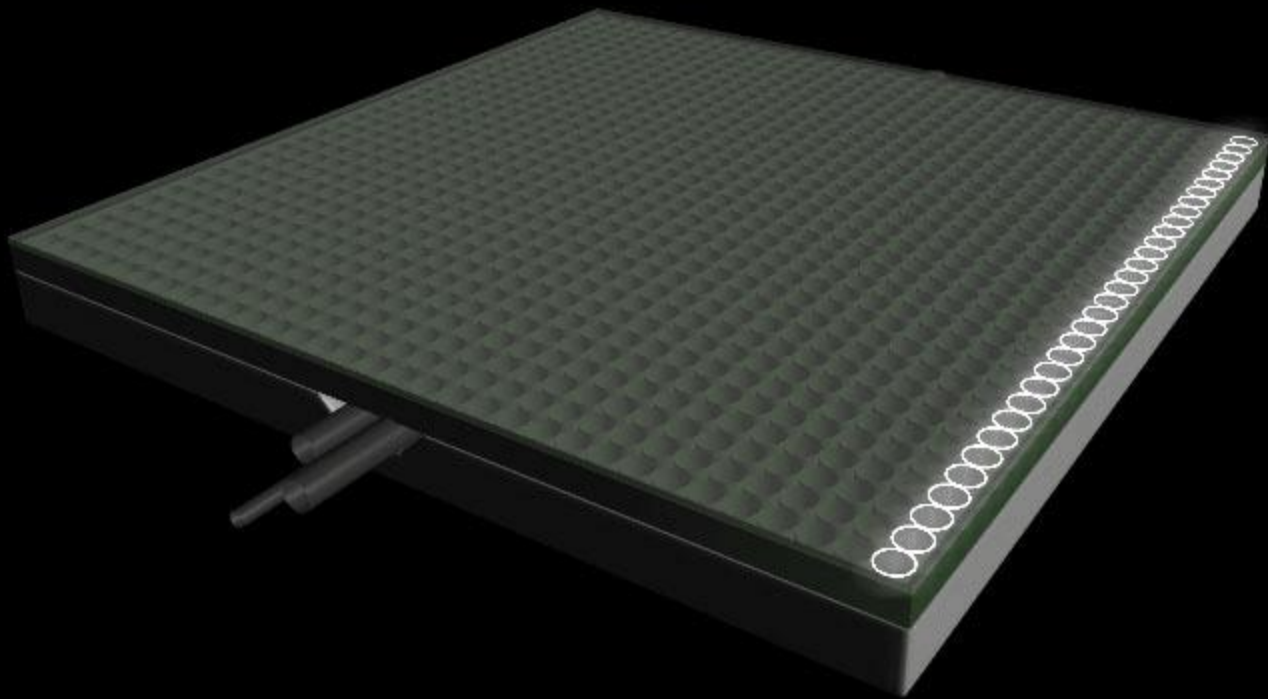

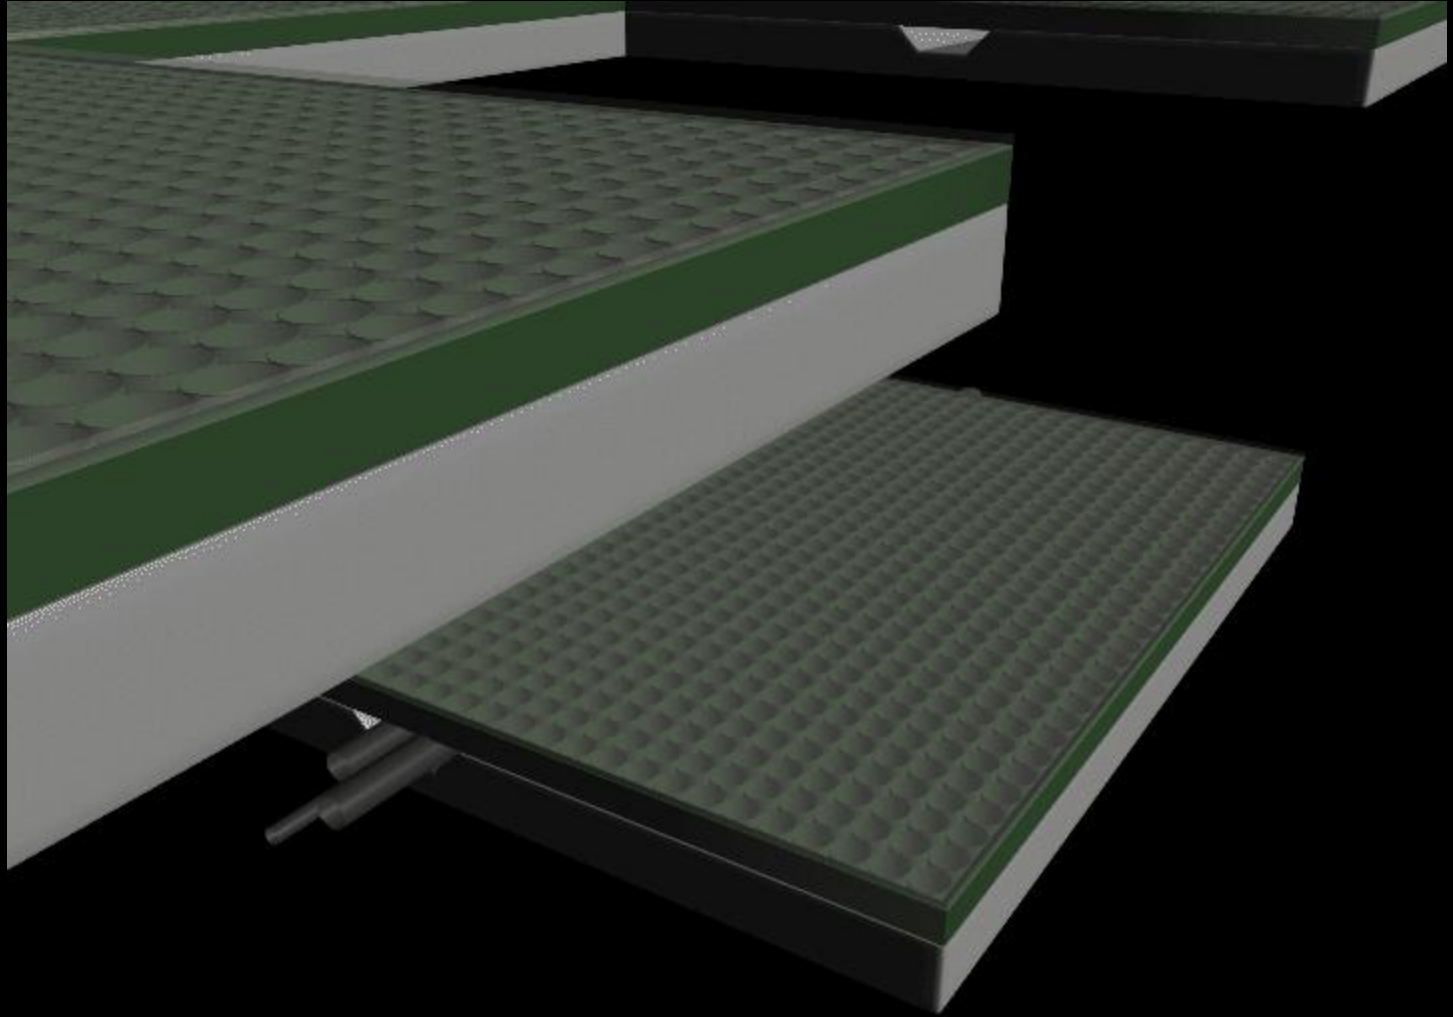

Now What?

Booz | Allen | Hamilton

Future Transportation Lab

Such a novel concept... everyone wins.

Using the sun to create energy is a really dumb stupid idea.

For the sake of our planet, let's hope it's sooner than later.

None of the parts for this road-thingie are durable, cheap or simple enough.

I would like to introduce these concepts to African governments.

The idea is more insane than space elevators.

I would like to buy some stock. Thank you.

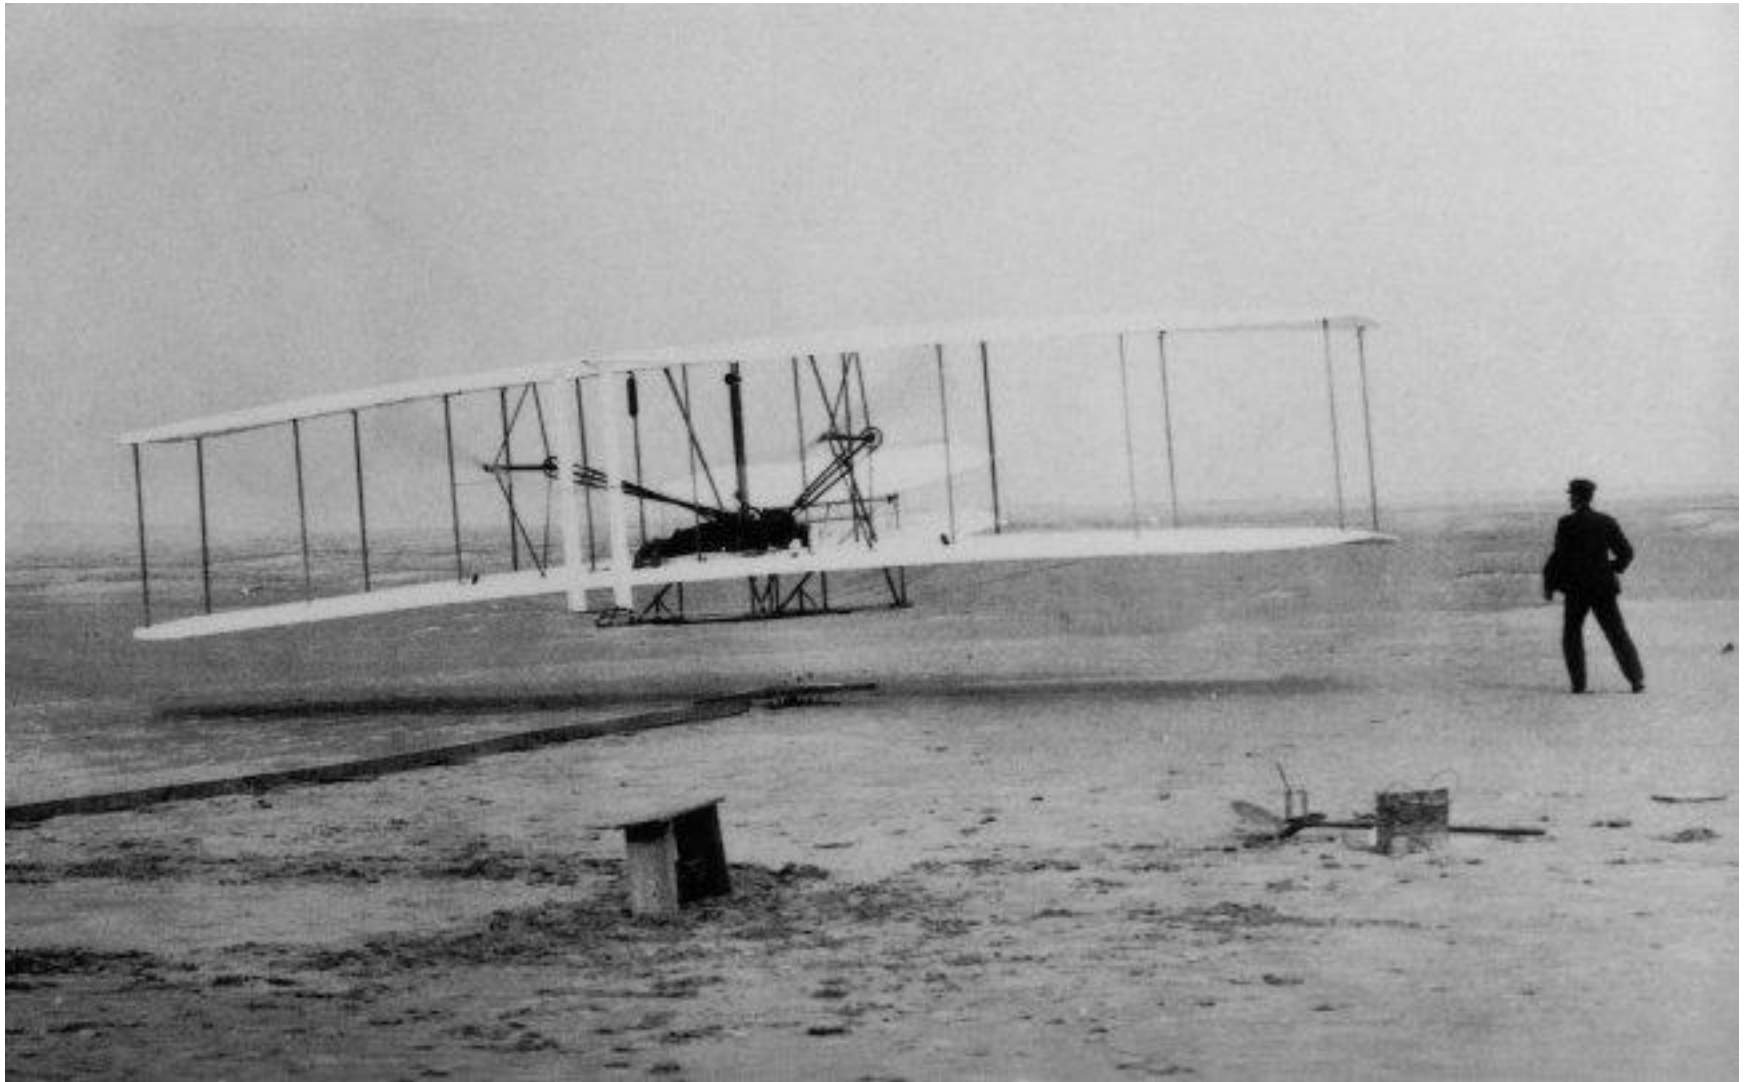

How long until hackers put a giant penis on the road?

It restores a glimmer of hope to sad eyes.

This concept is fundamentally stupid.

Well it's about #\*@% time!

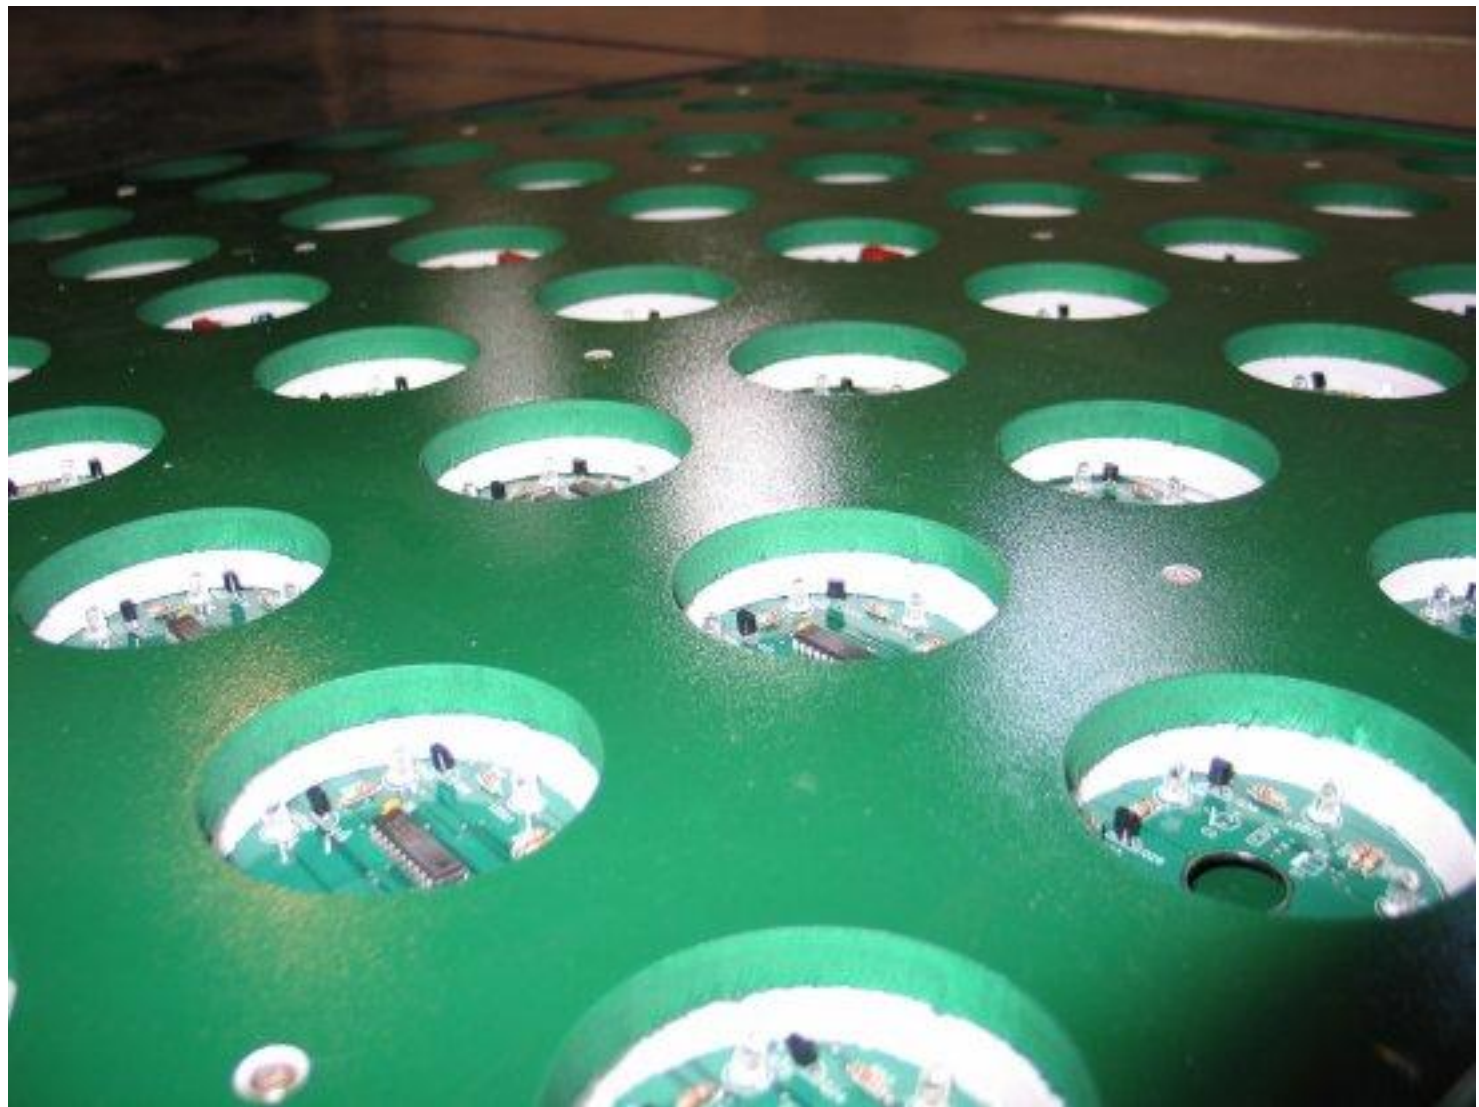

1903

GOD**

“I’d put my money on the sun and solar energy. What a source of power! I hope we don’t have to wait till oil and coal run out before we tackle that.”

– Thomas Edison, 1931
